Subject: Release the water

To quote a bipartisan letter re the issue of water release in the central valley, “We request that the Board and Mr. Howard immediately reconsider and reverse the February 3rd denial of the increased pumping provision of the TUCP. However, if after that review Mr. Howard and the Board determine that the denial should stand until the Board’s February 18th workshop, then we request that Mr. Howard and the Board provide a written description of the scientific analysis used to refute the scientific conclusions of the State and federal fish agencies.”
