Subject: Comment Letters: 6/16-17/15 Water Regulations Board Meeting

We received your letter on Saturday, June 12th as did some of our neighbors, while others received no letter at all. Given that the matter at hand is serious enough to impact our everyday lives, every single person it affects, not only a select few, should have been sent a letter weeks ago. When there is a proposed change of this magnitude, it's the fundamental right of every person it could potentially affect to be given adequate notice i.e. a couple weeks or a month, not a couple days. By sending out this letter so close to the meeting, you've prevented us from having that and instead ensured that the majority of us won't be able to attend and express our views. It's a truly sad way to run a government.

Sincerely,
The Kraus Family (Extremely Concerned U.S.A Citizens & Homeowners)
