Re: eWRIMS Workshop Comments

Dear Ms. Whitney:

Thank you for the opportunity to comment on the development of the eWRIMS software program. Stoel Rives LLP represents a vast client base, which requires this firm's staff to conduct detailed research on existing water rights. We are also required to assist clients with permitting of water projects, water purveyors with necessary analyses, protection of their existing water rights, including pre-1914 water rights, and water supply planning.

To better assist our clients the following enhancements would be most beneficial.

- The capability to search appropriation by stream name or stream code;
- Printing applications, permits and licenses.
- Online reporting parameters to include point source of diversion.

Thank you,

A handwritten signature in cursive script, appearing to read "Barbara A. Brenner".
