

Sirs,

I have lived here on the Monterey Peninsula for over 22 years and have gone through many moratoriums, cutback and retrofits and still that isn't enough for you. IF you are going to change water usage it should be statewide on an equal basis and not piecemeal on a whim. We on the Peninsula are a tourist destination and have no control over how many hotel rooms are rented, how many people visit our beaches on a sunny day as opposed to a foggy day, no control over how many people attended the AT&T golf tournament.... yet the proposal is that WE, the taxpaying citizens of this county. WE, because we live here, WE have to carry the burden of more cutbacks, more retrofits and the cessation of permitted building. If you can show me how everyone in California is sacrificing to exactly the same degree, then support changes.....if NOT....vote no.
