Protested: May 5, 2009, by the Pyramid Lake Paiute Tribe of Indians; May 8, 2009, by Churchill County

The Proposed Points of Diversion are shown on the map filed with Application:

Lake Tahoe:

Within the NE ¼ of the NW ¼ of Section 7, T. 15N., R. 17E., M.D.M., or from the Dam the southwest corner of said Section 7 bears South 29° 09' 30" West a distance of 5,182 feet, more or less. The capacity of Lake Tahoe is approximately 744,600 AF.

Donner Lake:

Within the SE ¼ of the NE ¼ of Section 18, T. 17N., R. 16E., M.D.M., or from the Dam the Southeast corner of said Section 18 bears South 04° 07' 14" East a distance of 2,981 feet, more or less. The capacity of Donner Lake is 9,500 AF.

Prosser Creek Dam (Reservoir):

Within the NW ¼ of the SW ¼ of Section 30, T. 18N., R. 17E., M.D.M., or from the Dam the Southeast corner of said Section 30 bears South 22° 58' 48" West a distance of 2,006 feet, more of less. The capacity of Prosser Creek Reservoir is approximately 29,840 AF.

Boca Dam (Reservoir):

Within the SE $\frac{1}{12}$ of the SW $\frac{1}{12}$ of Section 21, T. 18N., R. 17E., M.D.M., or from the Dam the Southwest corner of said Section 21 bears South 81° 05' 07" West a distance of 2,647 feet, more or less. The capacity of Boca Reservoir is approximately 40,870 AF.

Stampede Dam (Reservoir)

Within the NW ¼ of the NW ¼ of Section 28, T. 19N., R. 17E., M.D.M., or from the Dam the Northwest corner of said Section 28 bears North 36° 08' 27" West a distance of 636 feet, more or less. The capacity of Stampede Reservoir is approximately 226,500 AF.

Derby Dam:

Within the N 1/2 of the SW 1/4 of Section 19, T. 20N., R. 23E., M.D.M.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

The Proposed Points of Diversion are shown on the map filed with Application: 78034

Lake Tahoe:

Within the NE ¼ of the NW ¼ of Section 7, T. 15N., R. 17E., M.D.M., or from the Dam the southwest corner of said Section 7 bears South 29° 09' 30" West a distance of 5,182 feet, more or less. The capacity of Lake Tahoe is approximately 744,600 AF.

Donner Lake:

Within the SE ¼ of the NE ¼ of Section 18, T. 17N., R. 16E., M.D.M., or from the Dam the Southeast corner of said Section 18 bears South 04° 07' 14" East a distance of 2,981 feet, more or less. The capacity of Donner Lake is 9,500 AF.

Prosser Creek Dam (Reservoir):

Within the NW ¼ of the SW ¼ of Section 30, T. 18N., R. 17E., M.D.M., or from the Dam the Southeast corner of said Section 30 bears South 22° 58' 48" West a distance of 2,006 feet, more of less. The capacity of Prosser Creek Reservoir is approximately 29,840 AF.

Boca Dam (Reservoir):

Within the SE ¼ of the SW ¼ of Section 21, T. 18N., R. 17E., M.D.M., or from the Dam the Southwest corner of said Section 21 bears South 81° 05' 07" West a distance of 2,647 feet, more or less. The capacity of Boca Reservoir is approximately 40,870 AF.

Stampede Dam (Reservoir)

Within the NW ¼ of the NW ¼ of Section 28, T. 19N., R. 17E., M.D.M., or from the Dam the Northwest corner of said Section 28 bears North 36° 08' 27" West a distance of 636 feet, more or less. The capacity of Stampede Reservoir is approximately 226,500 AF.

Derby Dam:

Within the N ½ of the SW ¼ of Section 19, T. 20N., R. 23E., M.D.M.

T. 20 N. R. 24 E. M.D.B. & M.

Portions of Sections 9 and 10, Sections 11, 12, 13, 14 and 15; Portion of Sections 16, 17 and 20, Section 21, 22, 23, 24, 25, 26, 27 and 28; Portions of Sections 29, 30, 31, Sections 32, 33, 34, 35 and 36.

T. 20 N. R. 25 R. M.D.B. & M.

Sections 1, 2 and 3; Portions of Sections 4 and 5, Sections 7 through 36

I.20N. R.26R. MDB.&M.

Portion of Sections 5, Sections 6 and 7; Portion of Sections 8 and 17, Sections 18 and 19; Portion of Sections 20 and 29, Sections 30 and 31; Portions of Section 32.

T.21 N. R. 25 R. M.D.R. & M.

Portion of Sections 13, 23 and 24, Section 25; Portion of Sections 26, 27, 28 and 33, Sections 34, 35 and 36.

T.21 N. R. 26 R. M.D.R. & M.

Portions of Scotions 5, 7 and 8, Section 17; Postion of Section 18, Sections 19, 20, 29, 30, 31 and 32.

T. 22 N. E. 26 R. M.D.B. & M.

Portions of Sections 28, 32 and 33.

T. 19 N. R. 25 R. M.D.B. & M.

All of Sections 1 through 36

T. 19 N. R. 24 B. M.D.B. & M.

Sections 1, 2, 3, 4 and 5; Portion of Section 6, Sections 7 through 36.

T. 19N. R. 23 R. M.D.B. & M.

Portions of Sections 1, 12, 13, 14 and 23, Sections 24 and 25; Portion of Sections 26, 27 and 34, Sections 35 and 36.

2005 JUL -6 FH 3: 34

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

For Proposed POU use map on file under Application No. 71982 MM

For Existing POU use map to accompany these 5 applications.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

Portion of Sections 1, 12, 13, 14 and 23, Sections 24 and 25; Portion of Sections 26, 27 and 34, Sections 35 and 36.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

Attachment "A"

Item 4 (a)

This application is filed as part of the implementation of the operating agreement as described in Section 205 (a) of Title II of Public Law 101-618, which is referred to as the Truckee River Operating Agreement. This secondary application is filed for permission to use for wildlife purposes water stored pursuant to the Primary Application at the places of use described herein. It is one of three applications for secondary permits to be issued under the Primary Application. The quantity of water which may be released and used from storage under this and related secondary permits in any one year will not exceed the amounts allowed by the Truckee River Operation Agreement. The water released from one of more of the reservoirs described in Attachment "B" may be used for wildlife purposes within the limits of the natural stream bed and banks of the Truckee River from the existing reservoirs to Pyramid Lake.

Attachment "B"

The Proposed Points of Diversion are shown on the map filed with Application Number 78034:

Lake Tahoe:

Within the NE ¼ of the NW ¼ of Section 7, T. 15N., R. 17E., M.D.M., or from the Dam the southwest corner of said Section 7 bears South 29° 09' 30" West a distance of 5,182 feet, more or less. The storage capacity of Lake Tahoe is approximately 744,600 AF.

Donner Lake:

Within the SE ¼ of the NE ¼ of Section 18, T. 17N., R. 16E., M.D.M., or from the Dam the Southeast corner of said Section 18 bears South 04° 07' 14" East a distance of 2,981 feet, more or less. The storage capacity of Donner Lake is 9,500 AF.

Prosser Creek Dam (Reservoir):

Within the NW ¼ of the SW ¼ of Section 30, T. 18N., R. 17E., M.D.M., or from the Dam the Southwest corner of said Section 30 bears South 22° 58' 48" West a distance of 2,006 feet, more of less. The storage capacity of Prosser Creek Reservoir is approximately 29,840 AF.

Boca Dam (Reservoir):

Within the SE ½ of the SW ½ of Section 21, T. 18N., R. 17E., M.D.M., or from the Dam the Southwest corner of said Section 21 bears South 81° 05' 07" West a distance of 2,647 feet, more or less. The storage capacity of Boca Reservoir is approximately 40,870 AF.

Stampede Dam (Reservoir)

Within the NW ¼ of the NW ¼ of Section 28, T. 19N., R. 17E., M.D.M., or from the Dam the Northwest corner of said Section 28 bears North 36° 08' 27" West a distance of 636 feet, more or less. The storage capacity of Stampede Reservoir is approximately 226,500 AF.
