Subject: "Comment Letter: Salton Sea"

I am writing in hopes that somehow it can make a difference and the Salton Sea can be saved. I am a property owner and a registered voter.

I have lived at the Salton Sea for about 14 years. It is so peaceful and beautiful. We have so many birds it is truly spectacular. We have worked in the Palm Desert area and have always felt that Palm Desert is moving towards us. In other words civilization is heading our way. Actually, it would be so much more! It could be a desert resort with a huge lake. This is such a waste to let it dry up.

Now I am very concerned about my health. The toxins in the crust of the dried sea bed is what I have to breathe. I went to a meeting with the Salton Sea Authority and Imperial Irrigation Power District and when I asked about their plans for the sea in regard to my health was, I was told that they have no plans to keep the dust down. I care about the wildlife but it appears that the human life is not a priority.

We need to fill the sea up. These plans that have been approved do not solve our problems. A Sea to Sea transfer needs to be looked at as a permanent solution. The dust, wildlife and humans issues will all be resolved.

Please somebody care about my community!

Thank you,
Tracey Milsop
