**Subject:** California Water Board - Restore watersheds via Dam Removals - Klamath River

Parker Thaler

California State Water Board

Blessings Members of the Water Board [California] -

The best possible things we can be doing is restoring the natural balance of our lands. Please start with defunct or non-functional dams and remove them - restore the natural flow of waters on our land.

It has been demonstrated repeatedly that restoration via dam removal really does resolve our environment. I am hoping that we can see long term reversals even in our climate.

For too long, we have interfered with nature. Please allow the restoration of valuable watersheds all up and down California.

Let's lead the world in recovering our Earth.

Please be the leaders in this vast movement and please do your citizenry a favor for generations to come.

Sincerely,

Sumit Dongre
