[3] Section 07, Township 5S, Range 8E

[4] Section 01, Township 5S, Range 7E

Project Description:

SoCalGas is continually repairing, maintaining, upgrading, and replacing pipelines and
gas facilities throughout its service territory. Ongoing operation and maintenance
activities are necessary to ensure safe, reliable service as mandated by the California

Public Utilities Commission. The proposed project involves inspection, pipeline repairs, and/or replacement at four locations along Line 2051.

Repair work will include exposing the pipeline at each site and inspecting the anomalies identified during internal pipeline inspection activities. If pipeline repairs are required, repairs will be completed while the pipeline is exposed and may include pipeline replacement and recoating. Construction activities at each site will generally include establishing a 50 foot by 250-foot temporary work area, excavating a trench, completing repairs, and backfilling the trench and restoring the area to pre-construction contours to the extent feasible. Site access, pipeline repair, workspace, and staging areas will occur within the SoCalGas existing right-of-way or along established roads and turnout areas.

The Project will result in 0.075 acres (273 linear feet) of temporary impacts to waters of the state. No permanent impacts are anticipated.

Anticipated Project Start and End Dates:

2024 – 2029 (Project Duration 4-5 months)

US Army Corps of Engineers Nationwide Permit Number(s):
