Remediation
Sections I and II
**Update on the Former Kast Property Tank Farm, Carousel Tract
Residential Neighborhood, Carson**

Activities related to site investigation and cleanup work performed in November and December 2023 include the following:

1. On November 3, 2023, the Los Angeles Water Board received documents titled *Sub-Slab Soil Vapor Monitoring Reports* for seven properties located within the former Kast Property: 24503 Marbella Avenue, 24512 Neptune Avenue, 24632 Neptune Avenue, 24633 Marbella Avenue, 24702 Neptune Avenue, 24733 Panama Avenue, and 24803 Panama Avenue. The reports summarize sub-slab soil vapor monitoring of volatile organic compounds and fixed gases at the six properties in accordance with the 2014 Revised Remedial Action Plan.
2. On November 21, 2023, the Los Angeles Water Board sent correspondence to Shell titled, *Review of Property-Specific Remediation and Construction Completion Report* (PSRCCR) for Cluster 23. The correspondence reviewed the PSRCCRs for Cluster 23. The PSRCCRs provide an overview of the remediation conducted, a summary of homeowner/resident meetings, discussion of construction drawings, permit summary, discussion of the remedial approach for the property, discussion of restoration activities, and long-term monitoring plan.
3. On November 21, 2023, the Los Angeles Water Board sent correspondence to Shell titled, *Review of Remediation and Construction Completion Report* (RCCR) for Cluster 23. The correspondence reviewed the RCCR for Cluster 23. The RCCR includes an overall summary of remedial actions implemented, methods employed, overall volumes and mass of soil excavated, transported, and either disposed or treated and recycled, and compliance with Project Design Features and Mitigation Measures. It also includes detailed field monitoring records associated with the construction work.
4. On November 22, 2023, the Los Angeles Water Board sent correspondence to Shell titled, *Review of Property-Specific Remediation and Construction Completion Report* (PSRCCR) for Cluster 24. The correspondence reviewed the PSRCCRs for Cluster 24.
5. On November 22, 2023, the Los Angeles Water Board sent correspondence to Shell titled, *Review of Remediation and Construction Completion Report* (RCCR) for Cluster 24. The correspondence reviewed the RCCR² for Cluster 24.
6. On December 19, 2023, the Los Angeles Water Board received documents titled *Sub-Slab Soil Vapor Monitoring Reports* for two properties located within the former Kast Property: 317 E. 244th Street and 24712 Neptune Avenue. The reports summarize sub-slab soil vapor monitoring of volatile organic compounds and fixed gases at the six properties in accordance with the 2014 Revised Remedial Action Plan.
7. To date the cleanup of 285 (100 %) properties are completed. As of December 31,

2023, the status of the implementation of the cleanup at the Carousel Tract are as follows:

- a. All remediation activities including excavation and installation of remediation systems, including the sub-slab depressurization (SSD) and soil vapor extraction (SVE) / bioventing, are complete.
- b. The SVE system is fully operational.
- c. All cluster work is complete.
- d. All residents have moved back home.
- e. Landscape and hardscape restoration of the properties is complete. All construction punch-list items are complete.
- f. Concrete work (sidewalk, curb & gutter, ADA ramps) throughout the Carousel Tract is complete. Asphalt paving of the roads is currently pending.

Former Athens Tank Farm / Ujima Village Apartments and Ervin Magic Johnson Regional Park (EMJRP), Los Angeles

Activities related to the environmental site investigation of the Former Athens Tank Farm conducted in November and December 2023 are summarized below:

1. Recent and ongoing activities for the former Athens Tank Farm site are as follows:

Phase II SVE Activities:

- a. SVE remediation wells SVE-04 and SVE-05 were still inaccessible during the fourth quarter of 2023 since this area continues to be fenced off by the Ujima Housing Corporation (UHC). Access negotiations with UHC are ongoing and the wells will be sampled once access has been granted.
- b. On November 9, 2023, Kleinfelder notified Los Angeles Water Board staff that the Phase II SVE System was shut down to repair and replace damaged burner cone and insulation. The damaged burner cone was sent to the manufacturer on November 13, 2023, for inspection and replacement options. The Phase II SVE System remained shut down during the month of December. Kleinfelder will keep Los Angeles Water Board staff informed on the Phase II SVE System repairs and the anticipated timing of when the Phase II SVE System can resume operations.
- c. As of August 31, 2023 – cumulative removal to date is approximately 770,937 pounds of VOCs and 144,241 pounds of methane have been removed from both Phase I and Phase II SVE systems.

Ongoing weekly Phase I/II remediation systems operation & maintenance (O&M).

Phase III Remediation Systems:

- a. Groundwater monitoring wells ATF-10A (shallow) and ATF-10B (deep) were still inaccessible during the fourth quarter of 2023 due to the placement of fencing by the Ujima Housing Corporation (UHC). Access to these wells is currently being negotiated with the UHC. These wells will be monitored and sampled during the next monitoring event following an access agreement.
- b. Weekly Phase III remediation systems O&M activities are ongoing.

NAPL Recovery Trailer

- a. The NAPL Recovery Trailer was fully operational during December 2023 following repair and replacement of the NAPL sensor probe.
- b. The NAPL Recovery Trailer has been and continues to operate primarily on wells ATF-19B, ATF-21B and ATF-28B; and
- c. The NAPL Trailer was positioned over well ATF-19B in December 2023.
 - NAPL Tier I cumulative recovery as of August 31, 2023, using the NAPL Recovery Trailer was 3,343 gallons; and
 - NAPL Tier II cumulative recovery as of August 31, 2023, using manual bailing methods was 290.55 gallons.
 - The NAPL Tier III recovery (oleophilic absorbent socks) is currently deployed in 12 wells: ATF-5B, ATF-10A, ATF-13B, ATF-22B, ATF-26B, ATF-28B, ATF-29B; KLFOB-01, KLFOB-02; and KLFSVE-01, KLFSVE-02, and KLFSVE-03. A cumulative total of 119 absorbent socks have been replaced as of August 31, 2023.

Air/Bio-Sparge System

1. The air sparge/bio-sparge system was non-operational during December pending Los Angeles Water Board review and comments on the proposed Phase III System Shutdown Request. Los Angeles Water Board staff has evaluated air/bio-sparging operations based on system performance and groundwater monitoring data and preparing a response.
2. As of August 31, 2023, the cumulative estimated mass of VOCs removed using Phase III air/bio-sparge systems was 250,842 pounds.

1. Staff Presentation at GRACast

On November 8, 2023, Los Angeles Water Board staff, Ms. Thizar Tintut-Williams, from the Site Cleanup Program and Dr. Weixing Tong, from the Underground Storage Tank Program provided regulatory updates on the following topics at Groundwater Resources Association (GRA) of California GRACast meeting:

1. Vapor Intrusion

In February 2023, the California Environmental Protection Agency (CalEPA) workgroup posted Final Draft Supplemental Vapor Intrusion

Guidance. The Los Angeles Water Board staff provided an overview of the Board's general application of the vapor intrusion guidance and recommendations for its use for consistency.

2. Per- and poly-fluoroalkyl substances (PFAS)

In 2019, State Water Resources Control Board issued Water Code Section 13267 Order requiring airports and chrome plating facilities statewide that have accepted, stored and/or used materials including fume suppressants or other substances that may contain PFAS to submit technical reports. The Los Angeles Water Board staff provided an overview of the requirements stated in the Order, the Board's review procedure on the information submitted by the facilities, and next steps after the facilities comply with the Order.

3. Oil and Gas Program

California Senator Bill 4 (SB4), the Water Boards Oil and Gas Water Quality Monitoring Program, was initiated in 2014 to assess potential impacts to groundwater associated with well stimulation (hydraulic fracturing) activities. The program now includes oilfield produced water and enhanced oil recovery activities as part of the underground injection control (UIC) program and regulation of produced water ponds. The Los Angeles Water Board staff provided an overview of how well stimulation and UIC activities are jointly regulated by the CalGEM and the Water Board, including procedures and checklists developed to streamline the review and approval process for operators.

Over one hundred consultants, regulators and stakeholders were attended this November 2023 virtual regulatory update meeting. The presentations were well received. Both speakers also participated in a question-and-answer session after.

Groundwater Permitting & Land Disposal Section

Summary of Activities Associated with General Waste Discharge Requirements

Chiquita Canyon Landfill

Chiquita Canyon landfill is a Class III municipal solid waste landfill, located in Castaic, an unincorporated community in Los Angeles County. It is owned and operated by Chiquita Canyon LLC, which is a wholly-owned subsidiary of Waste Connections, Inc. Chiquita is currently allowed to discharge under three Water Board permits, Order No. R4-2018-0172, which is an individual Waste Discharge Requirements (WDRs) to protect water quality from solid waste disposal activities and two statewide general NPDES stormwater permits to protect water quality from stormwater runoff from industrial and construction activities at the site.

In mid-2023, staff became aware of the elevated temperature condition in the northwest area (Reaction Area) of the Main Canyon caused by a reaction in the landfill. The elevated temperature was causing increased landfill gas emissions and increased leachate generation. The volume of leachate collected at the landfill increased about three to four times from the 1st Quarter of 2022 to the 3rd Quarter of 2023. The Landfill was managing the increased leachate production by increasing the number of storage tanks available for storage prior to offsite disposal. On September 28, 2023, staff was notified by the Los Angeles County Local Enforcement Agency that leachate seeps were observed at Chiquita Canyon Landfill. Landfill staff conducted a site inspection on October 3, 2023, and observed that leachate seeps in the northwest portion of the Main Canyon had escaped the leachate containment system and were being directed to a concrete ditch and pumped to storage tanks for disposal. On November 22, 2023, staff issued a Notice of Violation to Waste Connections, Inc., for violations of Sections F.6 and B.3 of the WDRs by failing to maintain adequate leachate and landfill gas condensate containment systems and failing to report the leachate seep. The Notice of Violation required submittal of a report on all corrective actions that have been taken and actions that will be taken to mitigate the violations of the WDRs by December 22, 2023, and a final report to demonstrate that the Landfill complies with the WDRs by February 20, 2024. The response, received on December 22, 2023, described the Discharger's plans to minimize contact between the surfacing leachate and stormwater and to prevent any possible leachate contaminated stormwater from reaching the unlined stormwater detention basins prior to discharging offsite. According to the response, the Discharger would implement temporary measures to manage and contain the leachate and install permanent measures to repair the Landfill liner.

In a December 29, 2023, report, the Discharger reported that the temporary measures to divert leachate to a containment system on top of the liner were overwhelmed during the recent rain events. Leachate reached the stormwater channel on site, so the Discharger installed a check dam to prevent leachate from moving downstream and reaching the stormwater basin, which allowed the Discharger to pump the leachate out of the stormwater channel. The Discharger collected samples from the stormwater basin on December 28, 2023. Staff recently received a verbal report from the facility that during the February 5, 2024, rain event, leachate made it to the stormwater channel and most likely flowed to the stormwater basin. The Discharger collected samples from the stormwater basin and is waiting for the laboratory results. Currently, staff is reviewing stormwater sampling results collected on December 28, 2023, and awaiting information on several subsequent sampling events conducted by the Discharger. Staff has identified several information needs to assess impacts to surface and groundwater quality,

including the landfill's plan to fully return to compliance with their WDRs due on February 20, 2024.

On January 9, 2024, the Assistant Executive Officer and landfill staff participated in a community meeting hosted by Los Angeles County to discuss landfill gas findings and environmental impact concerns and answered questions regarding surface and groundwater quality from the community. Staff plans to attend the February 13, 2024, community meeting to provide more information about water quality in and around the Landfill.

In December 2023, the USEPA became the lead of an interagency work group on Chiquita Canyon Landfill that meets weekly and includes Los Angeles County, AQMD, CalRecycle, CARB, DTSC, USEPA, and CalEPA to address the multi-media impacts resulting from the elevated temperature conditions at the landfill.

Regional Programs Section

Section 401 Water Quality Certification and Wetlands Program

From November 1, 2023, to December 31, 2023, the Regional Board has received 13 new applications for Section 401 Water Quality Certification (WQC) actions.

DATE OF APPLICATION	APPLICANT	PROJECT
11/8/2023	Southern California Edison	CEMA McBean Emergency Road Repair (RGP 63)
11/8/2023	City of Los Angeles, Department of Public Works	Los Angeles River Way-San Fernando Valley Completion Project (Vanalden to Balboa)
11/8/2023	Metropolitan Water District of Southern CA	Foothill Feeder Station 592+80 Cut Off Wall (RGP 63)
11/20/2023	Seminole Springs Mobile Home Park, Inc.	Seminole Springs Interim Flood Protection Project (RGP 63)
11/22/2023	Southern California Gas Company	Honor Rancho Emergency Repairs (RGP 63)
11/29/2023	Stokes Canyon LLC	Stokes Canyon – Farms at Malibu Valley (Phases 4 and 6)
11/30/2023	Mark Gravebliss	Graveline Emergency Bank Stabilization Project (RGP 63)
12/5/2023	The Nature Conservancy	Ormond Lagoon Waterway Velocity Flow Logger Installation Project (NOI)
12/12/2023	BLC Tesoro LLC	Tesoro Del Valle Residential Development Phase 2 Emergency Erosion Repair Project (RGP63)
12/14/2023	Southern California Gas Company	Pipeline Safety Enhancement Program Line 1004 Phase 1B Pipeline Replacement Project (WDR)
12/21/2023	Los Padres National Forest	Rose Creek Valley Restoration (NOI)

12/22/2023	Limoneira Lewis Community Builders, LLC	Santa Paula Street Bridge Crossing Project (WDR)
12/26/2023	City of South Gate	I-710 Firestone Boulevard Southbound On-Ramp Modification Project (WDR)

From November 1, 2023, to December 31, 2023, the Regional Board has issued 6 new Section 401 Water Quality Certification (WQC) actions.

DATE OF ISSUANCE	APPLICANT	PROJECT	ACTION
11/16/2023	Trump National Golf Course, LA	Outfall Structure Associated with Tract No. 50666 (Project)	WQC
11/21/2023	Casitas Municipal Water District	Robles Facility Forebay Restoration Project	Amendment
11/21/2023	Los Angeles County Flood Control District	Soft-Bottom Channel Reaches 112 and 117 Ballona Creek and Centinela Creek Maintenance Program	Denial
11/27/2023	Oxnard Harbor District	Port of Hueneme Berth 3 Deepening and Wharf Improvement Project	WQC

Ballona Wetlands Restoration –Staff in the TMDL and Wetland and Riparian Protection Unit continue to coordinate with other agencies concerning the Ballona Creek Wetlands Sediment and Invasive Exotic Vegetation TMDL and the proposed Ballona estuary restoration.

Irrigated Lands Regulatory Program

Following the adoption of the General WDRs for Irrigated Lands, staff has been working with growers and discharger groups to implement the permit. Staff has met monthly with both third party discharger groups to work through outstanding questions on the new permit. On November 28, 2023, staff attended and presented at a Ventura County grower informational meeting. On December 15, 2023, staff attended a meeting in Ventura County with growers from the McGrath Lake sub-watershed to discuss compliance options for TMDL related requirements of the TMDL. Also, on December 15, 2023, VCAILG submitted the Notice of Exceedances Documented under Order 2021-0045-A02, as required

under the newly adopted WDRs. This Notice of Exceedance triggered individual discharge limitations, specifically in the McGrath Lake drainage area.

On December 12, 2023, staff met with USFS representatives and other stakeholders for the East Fork of the San Gabriel River to discuss the Nonpoint Source Trash Waiver and the Clean Water Act Section 319(h) grant funding process. The meeting is the first step in working toward developing a 319(h) grant application to secure funds for the ongoing trash issue.

Watershed Regulatory Section (WRS)

- On November 2, 2023, Watershed Regulatory section staff joined the Metropolitan Water District of Southern California to dedicate the demonstration plant at Pure Water Southern California as the Grace F. Napolitano Water Southern California Innovation Center. The retiring congresswoman Napolitano was joined at the ceremony by local and federal leaders, including U.S. Bureau of Reclamation Commissioner Camille Touton and retired Major General U.S. Army Corps of Engineers Mark Toy. Throughout her legislative tenure, Napolitano has supported efforts to increase the use of recycled water and secure federal funds for recycled water projects.

The Grace F. Napolitano Pure Water Southern California Innovation Center is testing the innovative purification process to produce purified water that can meet or exceed California's water quality standards and that will enable optimal design of the full scale of the Pure Water Southern California facility. Once built, the Pure Water Southern California is expected to be one of the largest water-recycling projects in the world, producing enough water, 150 million gallons of purified water each day, to serve 1.5 million Southern Californians through the purification of wastewater.

- On November 2, 2023, Los Angeles Water Board staff and other agency representatives attended the Southern California Coastal Water Research Project (SCCWRP) Commission's Technical Advisory Group (CTAG) Meeting. SCCWRP is a public research and development institute that develops innovative science for informed water-quality management in Southern California. The meeting updated the representatives on the statuses of SCCWRP's current research, such as droplet digital polymerase chain reaction (ddPCR), eDNA and cell-based bioassays, and also discussed other projects such as the new data portal.
- On November 5, 6 and 7, 2023, representatives of the State Water Board, Los Angeles Water Board and other regional water boards attended the WaterReuse California Annual Conference, held in Palm Desert, California. The annual WaterReuse Conference serves as an essential summit for California's water recycling community, providing a platform for education, learning, and the exchange of the latest advancements in research, design, operation, and management of water recycling facilities and projects. The focus of this year's presentations centered on the upcoming direct potable reuse regulations and their implementation throughout California. However, the conference also featured success stories in areas such as indirect potable reuse, stakeholder engagement, research on constituents of emerging concerns (CECs), stormwater capture, and CEC treatment technologies. The insights gained from the conference will help staff make more informed regulatory decisions and enhance the Region's recycled water program.
- On December 15, 2023, Los Angeles Water Board staff attended a press event for the VenturaWaterPure Ocean Outfall Project, toured the Ventura Water Reclamation Facility (WRF), and observed the construction progress of the new ocean outfall. VenturaWaterPure will recover, treat, and reuse effluent from the Ventura WRF that is currently discharged to the Santa Clara River Estuary, creating a locally owned, drought-resilient water source. Once VenturaWaterPure is fully operational, it will provide up to 20 % of the city of Ventura's water supply.

The Secretary of the U.S. Department of the Interior Deb Haaland was joined at the tour by Joe Schroeder, the city of Ventura Mayor, and Michael Brain, a deputy assistant secretary

for water and science of the Interior Department, and Congressman Salud Carbjal. The treatment process in the Ventura WRF will consist of membrane bioreactors, reverse osmosis, ultraviolet light, and advanced oxidation. This treatment process will produce advanced-treated recycled water that could be used for nonpotable and indirect potable reuse. There currently is no infrastructure at the Ventura WRF to dispose of the brine waste from this treatment process, so a new ocean outfall is currently under construction. The ocean outfall will be located about 1.25 miles offshore and about 50 feet water depth. The ocean outfall will take approximately 11 months to build and will be permitted under the National Pollutant Discharge Elimination System.

2. Adoption/Issuance/Termination

- a. The revised tentative permit and response to comments for the Edward C. Little Water Recycling Facility were distributed on November 2, 2023. The WDRs/WRRs were adopted at the November 16, 2023, Board hearing.
- b. The revised tentative permit and response to comments for the Albert Robles Center for Water Recycling and Environmental Learning Advanced Water Treatment Facility NPDES permit were distributed on November 1, 2023. The NPDES permit was adopted at the November 16, 2023, Board hearing.
- c. The Tentative Juanita Millender-McDonald Carson Regional Water Recycling Plant NPDES permit was distributed for public comments on December 18, 2023.
- d. The revised tentative and response to comments on the Zenith Energy West Coast Terminals LLC, Dominguez Hills Tank Farm NPDES permit were distributed on November 2, 2023. The NPDES permit was adopted at the November 19, 2023, Board hearing.
- e. The revised tentative and response to comments on the Time Schedule Order (TSO) for AES Alamitos LLC, Alamitos Generating Station were distributed on November 11, 2023. The TSO was adopted at the November 19, 2023, Board hearing.
- f. Staff attended the Public Meeting hosted by the Santa Susana Stormwater Expert Panel for the Boeing Santa Susana Field Laboratory on the recent stormwater sampling results and management activities held on November 29, 2023.
- g. The revised tentative WDRs/WRRs and response to comments for the City of

Santa Monica's Sustainable Water Infrastructure Project were distributed on December 1, 2023. The WDRs/WRRs were adopted at the December 18, 2023 ,Board hearing.
