Subject: Proposed new Septic regulations

Dear Mr St.John, it is vitally important that we all comply with regulations to keep the Russian river in a healthy state, and as Jenner homeowners we will do whatever is necessary to comply with the final regulations. However we have only just learned about this situation and how it could dramatically affect us financially. We respectfully request an extension time to the overall analysis, so that the public have sufficient time to fully understand the implications of these new regulations.

Thanks for your consideration

Anthony and Robina Vandersteen (10050 Bonita Ave, Jenner, 95450)
