SWRCB members and staff,

First let me say that I support the changes you have made in Appendix K.

More broadly, I would support further restrictions on diversions from our rivers. The research clearly indicates the San Joaquin and tributaries need more than 50% of unimpaired flows to protect and restore our fish and other river dependent wildlife populations. Nevertheless, I understand the Board has to balance agricultural and other human uses along with the needs of our environment.

Thanks for your service on this very difficult task,

Heinrich Albert
