Subject: Give the Tuolumne MORE WATER!

I've been recreating on the Tuomne river for 60 years with 3 generations of my family

YOU need to protect it and all the ecosystems it supports.

Agricultural water rights take a back seat to preserving that gorgeous and delicate environment - which is UNIQUE IN THE WORLD!

The entire SF Bay ecosystem is affected by reduced flows, and the residents of this area have demonstrated CLEARLY that they willingly conserve water with the clear intention of helping the environment. And our economy is growing at breakneck speed right along with water conservation.

I've observed an outrageous amount of water waste in agriculture. They need to be brought under control. It's a sin against Nature, morally void and possibly a sin against God that they waste so many millions of gallons of such a precious resource.

Get them to install drip irrigation systems instead of broadcast watering in the middle of the day when it's 100 degrees and the wind is blowing 40 mph. I've seen this in the San Joaquin Valley with my own eyes and it really, *really* pisses me off! Moat of that water never even reaches the ground. It just evaporates!

Don't cow to agriculture! Save our River Damnit!

Hot under the collar,

LaVive Kiely
