Subject: Notice of Proposed Emergency Rulemaking – Sacramento-San Joaquin Delta Watershed
Date: Monday, July 25, 2022 4:31:00 PM

On July 20, 2022, the State Water Resources Control Board (State Water Board) revised and readopted an emergency curtailment and reporting regulation for the Sacramento-San Joaquin Delta (Delta) watershed. The State Water Board has released a [Notice of Proposed Emergency Rulemaking](#) for the revised and readopted emergency regulation and will soon submit the emergency regulation to the Office of Administrative Law (OAL) for review and approval.

Government Code section 11346.1, subdivision (a)(2), requires that, at least five working days prior to the submission of a proposed emergency action to OAL, the adopting agency must provide a notice of the proposed emergency action to every person who has filed a request for notice of regulatory action with the agency. The document linked above provides the required notice. After the submission of the proposed emergency regulation to OAL, OAL will allow interested persons five calendar days to submit comments on the proposed emergency regulation as set forth in Government Code section 11349.6.

The finding of emergency, informative digest, and fiscal impact statement associated with the proposed emergency regulation are available on the [Delta Drought webpage](#).
