STATE WATER RESOURCES CONTROL BOARD RESOLUTION NO. 82-31

AUTHORIZING FUNDING FOR THE PRINTING AND DISTRIBUTION
OF THE FINAL REPORT FOR THE SEPTIC TANK EFFLUENT
PUMPING SEWER DEMONSTRATION PROJECT FOR
MANILA COMMUNITY SERVICES DISTRICT

WHEREAS:

- A less expensive method of wastewater collection than gravity sewers would have a significant beneficial impact upon the State's water quality programs by reducing the cost of wastewater management projects in unsewered areas.
- Low pressure sewer systems have potentially significant capital cost savings compared to conventional gravity collection systems.
- 3. The State Board, recognizing the foregoing, resolved to fund a research and demonstration project at Manila Community Services District, including a low pressure sewer system.
- 4. After two years of monitoring and evaluating this system, a comprehensive report has been produced as a guidance manual for the installation of low pressure sewer systems in other communities.

THEREFORE BE IT RESOLVED:

- 1. The State Board approves the final report on the design, installation, operation and maintenance of the Manila Community Services District's septic tank effluent pumping sewer system and leachfield.
- The State Board authorizes the Executive Director to spend \$1,600 in bond funds to print five hundred copies of this report for distribution to grantees and consultants, upon request.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on June 17, 1982.

Clint Whitney
Executive Director
