

Jeanine

I writing you about the proposed regulations concerning Mandatory Conservation Regulations. I manage the Nick C. DeGroot Water Treatment Plant and we wholesale treated drinking water to the Cities of Manteca, Tracy and Lathrop. I am curious how these new regulations will affect us as a wholesaler. I have already forwarded your notice to each of the three Cities and I have asked about their conservation measures. They indicated that they do have conservation programs in place. My question is as a wholesaler what will be the requirements for us? Do we also supply the Board with a monthly flow report for each City as well as corresponding monthly data for 2013, and if so is this enough to satisfy our obligations under these new orders?
