DIVISION OF WATER QUALITY

Desalination Facilities: The Division of Water Quality continues to participate in activities related to desalination of seawater in addition to its work on the draft Ocean Plan Amendment Addressing Desalination Facilities. On September 25, 2014, the Deputy Director for Water Quality testified before the California Assembly Select Committee on Coastal Protection on the topic of Seawater Desalination. The Committee took testimony on impingement and entrainment impacts, brine discharge impacts, and policy perspectives relating to seawater desalination. The Deputy Director for Water Quality also spoke at the Third Annual CalDesal Conference on October 7, 2014. In addition, Division of Water Quality staff spoke about the draft amendment at the 6th Annual Monterey Bay American Public Works Association Training Conference on October 7, 2014.

Groundwater Monitoring in Areas of Oil and Gas Production: Senate Bill 4 (SB 4 - Pavley, statutes of 2013), requires the State Water Board to develop, by July 1, 2015, model criteria for groundwater monitoring related to oil well stimulation activities. The model criteria are being developed in consultation with Division of Oil, Gas, and Geothermal Resources (DOGGR), other stakeholders, and experts. Until the final criteria are implemented, oil operators are required to follow the interim DOGGR regulations regarding groundwater monitoring.

State Water Board staff participated in the annual conference for the Groundwater Resources Association of California on October 15, 2014 in Sacramento. Presentations included State Board staff participation on a panel discussion with representatives from DOGGR, industry, and environmental justice regarding the implementation of SB 4.

Regional and State Water Board staff met with California Resources (formerly Occidental) of Elk Hills staff in Bakersfield on October 22 and 23, 2014. Staff toured the Elk Hills Oil Field to observe an oil well stimulation treatment. Staff discussed and reviewed technical information on geologic and engineering field practices specific to Elk Hills. Staff also discussed the status of developing model criteria for groundwater monitoring, as set forth by SB 4.

State and Regional Water Board staff are continuing to review letters of written concurrence and also reviewing groundwater monitoring plans in conjunction with DOGGR.

National Pollutant Discharge Elimination System Discharge Monitoring Reports: The United States Environmental Protection Agency (U.S. EPA) regulations require major dischargers with NPDES permits to submit Discharge Monitoring Reports (DMRs) to the State Water Board per the frequency specified in their permits. Historically, these major dischargers have been submitting paper DMRs which State Water Board staff process for entry by U.S. EPA’s contractor into its Integrated Compliance Information System (ICIS) database. This past summer, a State Water Board contractor completed an online interface that allows major dischargers to submit DMRs electronically to the State Water Board’s California Integrated Water Quality System (CIWQS) database. As of October 2, 2014, 90 percent of major dischargers required to submit DMRs by October 1, 2014 have submitted electronic DMRs.
through CIWQS. Staff will provide an update on the submission status of electronic DMRs in the next Executive Director’s report.

**Online Nitrate Information Tool:** In mid-November 2014, the State Water Board released an interactive tool, accessible at [http://www.waterboards.ca.gov/](http://www.waterboards.ca.gov/), called “Is My Property Near a Nitrate-Impaired Water Well?” The interactive tool allows private domestic well owners to view the locations of wells with at least one detection above the maximum contaminant level (since 2000) and determine if their location is within 2,000 feet of a nitrate-impacted well. The interactive tool will aide well owners in making informed decisions about their groundwater source. Included with the interactive tool is the Frequently Asked Questions flier “Nitrate in Groundwater” that provides information about nitrate contamination and best management practices for reducing or preventing nitrate contamination.

**Salt and Nutrient Management Planning:** The Regional Water Boards’ second quarter 2014 updates indicate that approximately 91 percent of Groundwater Ambient Monitoring and Assessment priority basins by area, and approximately 47 percent of all basins in California are covered by 45 salt and nutrient management planning groups. Fifteen final or draft Salt and Nutrient Management Plans (SNMPs) have been received by the Regional Water Boards. The Regional Water Board staff are currently reviewing these SNMPs and considering possible Basin Plan amendments. The remaining salt and nutrient management planning groups have requested extensions to complete their SNPMs, which will result in 25 additional SNMPs by 2016. Thus far, extensions have been granted to the Central Valley planning group by Resolution R5-2013-0149; and the Lahontan, Colorado River, and Los Angeles planning groups by their respective Regional Board Executive Officers.

**Statewide Marijuana Task Force:** The multi-agency strategic plan for regulation and enforcement of marijuana cultivators was signed by the State Water Board Executive Director on July 8, 2014. In mid-September, the Cannabis Identification Prioritization System, the technology used for locating grow sites, was demonstrated by Formation Environmental and Vestra Resources at the State Water Board. The Statewide Marijuana Task Force (Task Force) met on September 25, 2014 to resume discussions on the development of a consistent approach for regulating marijuana cultivation operations. Draft permits in development for the North Coast and Central Valley Regional Boards will serve as templates to enable statewide consistency. Various meetings were held over the past summer in Northern California to solicit cooperation from local boards of supervisors, coalitions, and marijuana associations with implementation of the pilot program. The November 7, 2014 Task Force meeting focused on the details of the North Coast Draft Permit that address discharges of waste associated with marijuana cultivation.

**Water Research Needs Meeting:** The State Water Board’s Division of Water Quality and Division of Drinking Water at the State Water Board hosted a Research Needs Workshop on October 29, 2014 at the offices of the Southern California Coastal Water Research Project (SCCWRP). The purpose of the meeting was to provide the opportunity to foster coordination and communication regarding water reclamation and reuse. Two goals were identified by the State Water Board for the meeting: (1) to provide an opportunity for Water Board executive managers and research organizations to meet decision makers from the drinking water, wastewater and storm water agencies who are potential suppliers and distributors of recycled and reused water, and (2) to bring together recycled water producers and water supply agencies to begin to identify research gaps in the areas of recycled water and storm water capture and use that should be addressed in order to ensure that water supplies from these sources are safe for people and the environment.
There were a total of 57 attendees representing water districts, sanitation districts, utilities districts, joint power authorities, cities, trade associations, research groups, federal government, and state government. Topics discussed during breakout session groups included: Water Quality and Human Health; Performance Reliability (Treatment, Operations, and Training); Ambient Water Effects; and Financial, Environmental, and Social Factors of Water Reuse. A workshop summary will be jointly developed by the research groups for circulation.

**State Water Board Irrigated Lands Regulatory Program (ILRP):** This month’s ILRP report is included in Appendix A at the end of this report.

**Statewide Policies/Significant General Permits:** This month’s Policy and Permits Table is included in Appendix B at the end of this report.

## DIVISION OF FINANCIAL ASSISTANCE

### Program Activity

**LOAN/GRANT ADMINISTRATION SECTION:**

**California Financing Coordinating Committee:** On October 9, 2014, State Water Board staff participated in the final 2014 California Financing Coordinating Committee (CFCC) Funding Fair in Sacramento (Cal/EPA Headquarters). The CFCC is comprised of six member agencies (four state, and two federal agencies). Member agencies conduct funding fairs each year to educate interested parties about the CFCC and the financial and technical resources available for infrastructure projects. Information on the 2014 Funding Fairs and the CFCC is available on the CFCC’s webpage at: [www.cfcc.ca.gov](http://www.cfcc.ca.gov).

**Tribal Training:** On October 12, 2014, State Water Board staff participated in a one day class designed for Tribal Members, Tribal Council Members and Environmental Directors to learn about the structure and programs of the California Water Boards.

**California Association of Sanitation Agencies (CASA) 2014 Fall Seminar:** State Water Board staff participated in the CASA Fall Seminar on October 16, 2014, in Fountain Valley and October 23, 2014, in Sacramento. State Water Board staff presented information covering some of the newest aspects of the Water Recycling and Clean Water SRF programs, as well as an overview and walkthrough of the Financial Assistance Application Submittal Tools (FAAST) and Funding Option Tool.

**U.S. EPA Region 9, 22nd Annual Tribal/EPA Conference:** On October 16, 2014, the State Water Board’s Wastewater Operator Certification Program staff presented information regarding the examination waiver process for tribal operators at wastewater treatment plants at the US EPA Region9, 22nd Annual Tribal/EPA Conference. In addition to presenting information on the examination waiver application process, staff also provided eligibility for reciprocity to wastewater operators on tribal lands. The Clean Water and Drinking Water SRF Marketing and Outreach Unit also provided program information at the events information table.
U.S. EPA Region 9 Borrowers Training Workshop: On October 16, 2014, State Water Board staff hosted and conducted (along with U.S. EPA and Northbridge Environmental Consultants) a workshop to educate borrowers and stakeholders about the Clean Water and Drinking Water SRF programs. State Water Board staff also participated as panelists during the Q&A sessions and provided clarification to various SRF program questions.

ADMINISTRATION SECTION:

Wastewater Operator Certification Program (WWOCP): WWOCP staff presented information regarding the examination waiver process for tribal operators at wastewater treatment plants at the U.S. Region 9, 22nd Annual Tribal/EPA Conference co-sponsored by the Owens Valley Indian Water Commission. The presentation was on October 16, 2014 and highlighted the examination waiver application process and provided clarification to wastewater operators on tribal lands.

The Office of Operator Certification (OOC) administered the Wastewater Treatment Plant Operator Examination on October 4, 2014. The exam was held at ten sites throughout the State of California. There were 630 participants. The examination included five grade levels of operators. This allowed participants the opportunity to enter into a new career or promotional opportunities within the industry.

Drinking Water Operator Certification Program (DWOCP): DWOCP staff hosted the semi-annual Stakeholders’ meeting. The meeting was comprised of Drinking Water representatives throughout the state of California. The meeting provides an opportunity for the industry to address any operator issues with the certifying body of the State Water Boards. The meeting took place on Tuesday October 14, 2014 at the California Rural Water Association (CRWA) in Sacramento.

DWOCP released the results of the September 20, 2014 distribution operator examination of which 2,200 applicants participated.

BONDS SECTION:

Cleanup and Abatement Account – Interim Emergency Drinking Water Funding Programs: The Division has approved approximately $2.7 million under the SB 103 $4 million set-aside for the following 10 projects (http://www.waterboards.ca.gov/board_decisions/adopted_orders/resolutions/2014/rs2014_0019.pdf):

Tecopa Vending Machine for Individual Well Owners $109,000 (Inyo County);
Bottled Water for Individual Homeowners in Tulare County $500,000;
Bottled Water for Soults Mutual Water Company $43,000 (Tulare County);
Bottled Water for Schools in Tulare County $1 million;
Bottled Water for Allensworth Community Services District $243,000 (Tulare County);
Bottled Water for Pershing High School $17,000 (Fresno County); and
Engineering Alternative Evaluation for Grizzly Lake Community Services District $18,000 (Plumas County);
Bottled Water for Lanare Community Services District (through Self Help) $236,000 (Fresno County);
Bottled Water for Kettleman City Community Services District $333,000 (Kings County); and
Vending Machines for Arvin Community Services District $222,765 (Kern County).
The Division has also approved a total of approximately $1.26 million for 15 projects from the $2.12 million the State Water Board allocated for Interim Emergency Drinking Water in June 2014 (http://www.swrcb.ca.gov/board_decisions/adopted_orders/resolutions/2014/rs2014_0028.pdf):

**Bottled Water for Sequoia Union School** $25,000 (Tulare County);
**Reverse Osmosis Units for Washington Union School** $50,000 (Fresno County);
**Bottled Water for Tuleville Mutual Water Company** $50,000 (Tulare County);
**City of Delano Biological Treatment Pilot Study for Nitrate Treatment**, coordinated funding with DWR $134,000 (Kern County);
**Bottled Water for Seville** $45,000 (Tulare County);
**Test Wells for the City of Live Oak** $80,000 (Sutter County);
**Bottled Water for Beverly Grand Mutual Water Company** $50,000 (Tulare County);
**Bottled Water for City of Lindsay** $17,000 (Tulare County);
**Bottled Water for Parajo Mesa Community Services District** $79,000 (Monterey County);
**Bottled Water for Yurok Tribe** $32,000 (Humboldt County);
**Vending Machine for Yurok Tribe** $108,000 (Humboldt County);
**Bottled Water and Point of Use Devices for State and Local Smalls around Springfield Terrace and Las Lomas** $134,000 (Monterey County);
**Emergency Intertie with Lake Elsinore Valley Water District** $113,000 (Riverside County);
**Bottled Water for East Orosi Community Services District** $199,000 (Tulare County); and
**Bottled Water for Individual Homeowners in Orange Center** $150,605 (Fresno County).

*It should be noted that Tulare County has withdrawn the request for funding for a vending machine in Seville. A recently installed well provides drinking water that meets the standard for nitrate; therefore, the vending machine is no longer necessary.*

Staff is working on executing the agreements and is also evaluating and working with the Division of Drinking Water District Offices and other funding programs on an additional 12-15 potential projects.

**Drought Response Outreach Program for Schools (DROPS):** The Division hosted a DROPs application assistance workshop in Los Angeles on October 20, 2014, and also participated in a webinar to provide DROPS application assistance in Sacramento in coordination with Coalition for Adequate School Housing (CASH) on October 15, 2014. The Division will be participating in additional DROPS application assistance workshops in Fresno on November 6, 2014 and in Santa Cruz on November 13, 2014. Division staff will conduct site visits to evaluate potential DROPS projects in the Los Angeles Unified School District in late November 2014.

**Proposition 84 Stormwater Grant Program:** Division Staff and Chief Deputy Director Mr. Jonathan Bishop participated in two ribbon cutting ceremonies on October 30, 2014 to celebrate the completion of two stormwater management projects funded by Proposition 84 Stormwater grant funds. Mr. Bishop attended a ribbon cutting ceremony for the Ventura County Center Parking Lot Stormwater Retrofit Project Program. This project included the installation of pervious gutters, infiltration basins, drywells and permeable pavement to remove pollutants from stormwater and reduce run-off into the Santa Clara River. Division Staff attended a ribbon cutting ceremony for the Green Parking Lot Demonstration and Monitoring Project in Citrus Heights (Sacramento County). This project included the installation of bioswales and rain gardens. These Low Impact Development (LID) features will provide removal of stormwater pollutants from a parking lot and promote stormwater infiltration.
DIVISION OF WATER RIGHTS

2014 Water Rights and Water Quality Training for Tribes: On October 13, 2013, the State Water Board held water rights and water quality training for Tribes. The training was designed for Tribal members, Tribal Council Members and Environmental Directors, and others interested in learning about the structure and programs of the California Water Boards. Office of Chief Council staff provided an overview of the California water rights system including complaints and protests. The training included an exposition and poster session that featured information on: beneficial uses and designations by Division of Water Quality staff; the California Environmental Data Exchange Network by Office of Information Management and Analysis staff; the Electronic Water Rights Information Management System by Division of Water Rights staff; funding opportunities by Division of Financial Assistance staff; and filing environmental complaints by Division of Water Rights staff. A question and answer panel was also part of the training, which provided participants with an opportunity to inquire about the State Water Board’s 2014 drought related actions and the wastewater treatment operator certification program.

WATER QUALITY CERTIFICATION UNIT

Water Quality Certification Issued for the Yuba County Water Agency Log Cabin Diversion Dam Apron Curtain Repair Project: On October 28, 2014, the State Water Board issued a water quality certification (certification) for the Log Cabin Diversion Dam Apron Repair Project (Project). The Project involves the repair of two scour areas on the toe of the diversion dam spill apron. The Applicant, Yuba County Water Agency (YCWA), planned to repair the scour areas during the same time period that sediment removal work was planned in 2014. Conducting both activities at approximately the same time would avoid the need to dewater the area around the dam separately for each maintenance project. The certification is available online at: http://www.waterboards.ca.gov/waterrights/water_issues/programs/water_quality_cert/401_certifications.shtml

Minimum Instream Flow Variances for Federal Energy Regulatory Commission Projects:
Division of Water Rights staff issued two letters related to requests for minimum instream flow variances for two Federal Energy Regulatory Commission (FERC) projects, specifically the: (1) Upper American River Hydroelectric Project; and (2) the Potter Valley Hydroelectric Project. A brief description of each variance requests and related information are provided below:

Upper American River Hydroelectric Project (UARP) - On September 19, 2014, the Sacramento Municipal Utility District (SMUD) provided notification of low natural inflow to Buck Island Reservoir from Highland Creek and Rockbound Creek. The notification stated that after October 15, 2014, due to the existing low water surface elevation at Buck Island Reservoir, SMUD could no longer guarantee the provision of the required minimum instream flow of one cubic feet per second (cfs) below Buck Island Reservoir as outlined in the water quality certification (certification) for UARP. On October 9, 2014, the State Water Board received an additional letter from SMUD which stated that, absent additional precipitation, the predicted date for involuntary non-compliance with the UARP flow requirements would be October 23, 2014. The October 9, 2014 letter also requested, as permitted by the terms of the certification, approval from the Deputy Director, Division of Water Rights to suspend the minimum instream flow requirement below Buck Island Reservoir. The flow variance request was granted on October 20, 2014 with the conditional requirements that SMUD shall:
(1) evaluate the ability to resume the flow requirement after each measurable precipitation event; (2) resume the required flows within 72-hours of an affirmative determination that flows can be provided; and (3) submit notification of the terms of the conditional approval to FERC. The streamflow measured below Buck Island Reservoir dropped below the required one cfs requirement on November 4, 2014.

**Potter Valley Hydroelectric Project** – On October 29, 2014, State Water Board staff submitted a comment letter to FERC providing comments on Pacific Gas and Electric Company's (PG&E) request to decrease minimum flows to the East Branch of the Russian River in order to repair its facilities. The comments included a recommendation that PG&E consult with the State Water Board, Sonoma County Water Agency, the California Department of Fish and Wildlife, United States Fish and Wildlife Service, Redwood Valley Water District, City of Ukiah, Millview County Water District and the National Marine Fisheries Service; to develop a compensatory flow plan and schedule to offset the flows that would have otherwise been provided to downstream water users, and complete the repairs as quickly as possible in order to return to the license required minimum stream flows as soon as possible. On November 4, 2014, FERC issued an order approving PG&E’s request for variance and requiring that PG&E consult with the agencies listed above to develop a compensatory flow regime and schedule.

**PUBLIC TRUST UNIT**

**8th Biennial Bay-Delta Science Conference - Phase 4 Poster Presentation:** Public Trust Unit staff presented a poster on Phase 4 of the Bay-Delta effort at the 8th Biennial Bay-Delta Science Conference on October 28 and 29, 2014. The poster detailed the goals and objectives of Phase 4, recommendations on the development of a flow criteria method, and the upcoming release of the Phase 4 Strategy. Public Trust Unit staff attended one poster session each day to answer questions and discuss Phase 4 with other scientists working in the Bay-Delta system. Staff plans to continue to use the poster as a public outreach tool and present it at other conferences and meetings, as identified.

**Update Regarding Emergency Curtailment Where Insufficient Flows are Available to Protect Fish in Certain Watersheds (Items Related to Emergency Regulations §877 et seq. in Mill, Deer, and Antelope Creeks):** On October 14, 2014, Division of Water Rights (Division) issued Water Rights Order WR 2014-0029-DWR (Order) requiring curtailment of diversions from Deer Creek to maintain drought emergency instream flows of 50 cubic feet per second (cfs) pursuant to §877(c)(2). The Order requires the emergency instream flows effective October 15, 2014 at 5:00pm. The Order was issued in response to an October 10, 2014 memo from the California Department of Fish and Wildlife (CDFW) and National Marine Fisheries Service (NMFS) to the Division summarizing the presence of migrating Central Valley steelhead in the Sacramento River in the vicinity of Deer Creek and requesting the drought emergency instream flows be provided for adult steelhead passage. In Mill Creek, voluntary agreements with diverters, CDFW, and NMFS remained in effect whereby diverters agreed to bypass a minimum instream flow of 50 cfs beginning October 15, 2014. In Antelope Creek, voluntary agreements with diverters and CDFW require bypass of 35 cfs beginning November 1, 2014. Gauge data in Antelope Creek is periodically checked by CDFW staff for compliance and are not available in real time.
**Curtailment Actions:** On October 3, 2014, the State Water Board notified curtailed water right holders in the Eel, Russian and Sacramento San Joaquin River watersheds of its intent to temporary lift curtailments to allow diversion and storage during significant precipitation events.

- **Eel River** - On October 24, 2014, curtailments were lifted for remaining post-1914 water rights on the Eel River. The permission to divert is still in effect.

- **Sacramento-San Joaquin** - On October 31, 2014, the State Water Board temporary lifted curtailments of all post-1914 water rights in the Sacramento-San Joaquin watershed. The notice provided for diversions until 7 AM on Monday, November 3. This end time was based on streamflow projections provided by the California Nevada River Forecast Center.

**ENFORCEMENT**

**Failure to File:** On October 17, under delegated authority, the Assistant Deputy Director for Water Rights issued 373 draft Cease and Desist Orders against permittees and licenses holders for failing to file required online reports of water diversion and use. Over 60 percent of these deficient reports are for diversions within curtailed watersheds. Diverters have 20 days to complete reports or request hearing. Failure to take action will result in final CDO and potential penalties.

**PERMITTING AND LICENSING SECTION**

**Buyers/Sellers Water Transfers Meeting:** On October 8, 2014, the Department of Water Resources (DWR), U.S. Bureau of Reclamation (Reclamation) and the State Water Resources Control Board (State Water Board) held a Buyers/Sellers Water Transfers Meeting. The purpose of the meeting was to discuss the water transfer season and plan for the 2015 water transfer season. DWR, Reclamation and the State Water Board discussed the 2014 water transfers, multi-agency coordination and operational issues with the state and federal water projects. Water buyers and sellers also discussed transfer successes and challenges. Proposed changes to DWR’s Water Transfer Technical Information report were mentioned. The State Water Board staff discussed development of a water transfer order template.

**DIVISION OF DRINKING WATER**

**Southern Region:** Various members of the Southern California Section attended and Kurt Souza, Section Chief, presented at the Metropolitan Water District of Southern California’s Water Quality Managers Meeting on October 9, 2014. The meeting celebrated the 40th anniversary of the signing of the Safe Drinking Water Act. The SDWA is the most important drinking water legislation in the American history. A presentation on the history of water laws and policy (Mic Stewart, MWD-SC), a history of the State of California’s Drinking Water Program (Kurt Souza), 40 years of the SDWA (Alan Roberson, AWWA) and a summary of achievements (Bruce Macler, U.S. EPA) were presented at the meeting. The State of California’s Drinking Water Program will be celebrating its 100-year anniversary next year, in 2015.
**Safe Drinking Water Plan for California:** The Division of Drinking Water released a draft of the Safe Drinking Water Plan for California on October 6, 2014. The draft includes the State Water Board’s assessment of the overall quality of the state’s drinking water, the identification of specific water quality problems, an analysis of the known and potential health risks that may be associated with drinking water contamination in California, and specific recommendations to improve drinking water quality. Division of Drinking Water staff presented an overview of the draft plan and invited the public to comment on the assessment, analysis and recommendations in the document at 6 workshops throughout California, including Salinas, Fresno, Redding, Los Angeles, Coachella, and Sacramento.

**DIVISION OF ADMINISTRATIVE SERVICES**

**Program Activity:**

**Update on Fee Stakeholder Process:** Since the last Executive Director’s update, Division of Administrative Services staff met with Regional Board Dairy Program staff to discuss their participation in the proposed stakeholder process and to obtain information specific to each region’s dairy program. In addition, members of the Management Coordinating Committee (MCC) discussed the Dairy Program at their October meeting, and were requested to provide support for this stakeholder process, particularly in programmatic aspects of the discussions. Staff also met with several key dairy industry representatives to discuss and receive feedback on their expectations for the proposed stakeholder process and ways these dairy industry groups could assist staff in improving the process. Staff plans to continue to work with Regional Board program staff and the dairy industry representatives to obtain data on potential stakeholders to ensure all dairy fee payers are represented.

As part of developing the overall process for all water quality and water rights fee stakeholders, staff is working with the Office of Research Planning and Performance to create a survey that will be sent to stakeholders to obtain feedback on the fees and the stakeholder process, and how the Water Board can improve our stakeholder fee process. Staff has also scheduled a general stakeholder webcast meeting for December 19, 2014 to explain the annual budget process, how the upcoming stakeholder meetings will fit in with that process and a general discussion of what types of information will be presented at those meetings.

Staff are currently completing the planning phases for a proposed fee stakeholder process plan. The proposed fee stakeholder process plan will be presented as an informational item at the December 2, 2014 board meeting.

APPENDIX A

IRRIGATED LANDS REGULATORY PROGRAM
FOR OCTOBER 2014

STATE WATER RESOURCES CONTROL BOARD:
On October 8, 2014, Irrigated Lands Regulatory Program (ILRP) staff participated in a meeting with CalRecycle and California Department of Food and Agriculture (CDFA) regarding Publically Owned Treatment Works (POTW) co-digestion of cow blood and a proposed Napa project. Other co-digestion issues were discussed as needed.

On October 9, 2014, ILRP staff participated in a meeting with State Water Board and DWQ management to discuss common issues and information sharing.

On October 13, 2014, ILRP staff attended a meeting hosted by the California Water Quality Monitoring Council (CWQMC). The presentation covered CWQMC goals and ongoing efforts to increase collaboration and make monitoring data and assessment information available to the science and management community.

On October 29, 2014 ILRP staff participated in a Farm Food Safety Conservation Network (FFSCN) conference call to determine the future direction of the FFSCN.

On October 30, 2014, ILRP staff participated in a joint training provided by CalRecycle and California Association of Sanitary Agencies (CASA) to POTW operators, regional board staff and other interested stakeholders. The training was regarding co-digestion of anaerobically digestible material (ADM) at a POTW.

On October 31, 2014, ILRP staff participated in a conference call with EPA to provide input on a template EPA is developing that will eventually be used to track the implementation progress of the National Water Quality Initiative (NWQI). EPA will be asking for information related to all NWQI watersheds and the subset of monitored NWQI watersheds. EPA will use the information to create a written status report on NWQI implementation. The Natural Resources Conservation Service (NRCS) will also be providing summary information on conservation practices. In addition, EPA will be tracking 319 investment information through the 319 Grants Reporting and Tracking System (GRTS). This information will be of great interest to the Office of Management and Budget, NRCS and EPA leadership, and all states and stakeholders that have invested in the success of the NWQI.

REGIONAL WATER BOARD:
This month’s Irrigated Lands Regulatory Program (ILRP) report covers up through the month of October 2014 and will provide an update on the activities of the Central Valley Regional Water Quality Control Board (Regional Water Board) ILRP as provided by the Regional Water Board October 9-10, 2014 Executive Officer report.

Future monthly reports will alternate between the status of the ILRP from the Central Valley Regional Water Board for one month, and the status of other Regional Water Board ILRPs for the alternate month.
Current and past ILRP program monthly reports can be found on the State Water Board Irrigated Lands Regulatory Program website:

http://www.waterboards.ca.gov/water_issues/programs/agriculture/

For additional information on the statewide ILRP, please contact State Water Board staff: Johnny Gonzales (916) 341-5510 johnny.gonzales@waterboards.ca.gov

For specific program information on the Central Valley Water Board ILRP, contact Mr. Joe Karkoski, program manager, at (916) 464-4668. joe.karkoski@waterboards.ca.gov

CENTRAL VALLEY REGIONAL WATER QUALITY CONTROL BOARD
IRRIGATED LANDS REGULATORY PROGRAM (ILRP)
OCTOBER 2014

1. Waste Discharge Requirements (WDRs) Development

a) Grasslands Bypass Project
A workshop on the draft WDR and monitoring reporting program (MRP) was presented to the board on August 8, 2014. Regional Water Board members requested the Grassland Bypass Project and Grassland Drainage Area WDRs and MRPs be presented together before the board to determine how the requirements in the two Orders are related and would be integrated.

On August 25, 2014 a conference was arranged between representatives of the Grassland Area Farmers and the U.S. Bureau of Reclamation to discuss the board’s request and the additional information needed for the two Orders. Another conference call is scheduled September 15, 2014 to discuss further coordination and scheduling.

b) Sacramento River Watershed WDR
On June 4, 2014, the Executive Officer issued a Conditional Notice of Applicability and conditional approval of the Northern California Water Association (NCWA) to serve as the third-party group under Order R5-2014-0030. The conditional approval required submittal of an addendum containing additional documentation related to organizational governance and accountability to complete the NCWA’s application. An addendum was submitted by NCWA on June 27, 2014, which partially met the requested documentation. On August 12, 2014, the Executive Officer issued a Request for Supplemental Information from NCWA, which is due by September 12, 2014 and must include (1) the methods by which summaries of fees and revenues are readily available to Members, and (2) copies of bylaws of the subsidiary organizations and copies of agreements between collaborating organizations.

By July 16, 2014, one comment letter was received on the Sacramento Valley Water Quality Coalition’s proposed Farm Evaluation template. Regional Water Board staff is preparing a final Farm Evaluation template, as well as a final Managed Wetlands Evaluation Template to be used by members in the Coalition area. Templates will be issued by the Executive Officer.
c) Western San Joaquin River Watershed WDRs
On July 29, 2014, the Executive Officer issued the final Managed Wetland Evaluation Template for Members who are wetlands managers in the Westside San Joaquin River Watershed Coalition (Coalition). Wetlands managers must use the template to report practices in managed wetlands in lieu of submitting the Farm Evaluation Template. The Coalition and wetlands managers coordinated with Regional Water Board staff to develop the template.

d) Eastern San Joaquin River Watershed WDRs
On August 5, 2014, the State Water Board adopted Order WQ 2014-0135, which orders that the State Water Board will review Waste Discharge Requirements Order No. R5-2012-0116 on its own motion. This action allows the State Water Board more time to review the issues raised in the three petitions of the Eastern San Joaquin River Watershed WDRs.

2. State Water Resources Control Board Agricultural Expert Panel
The State Water Board's Agricultural Expert Panel released their final report and recommendations and presented it to the State Water Board at the State Water Board's meeting on September 23, 2014. The final report is available at:
http://www.itrc.org/swrcb/Presentations/downloads.htm#MeetingDocs

On July 18, 2014, the Executive Officer provided testimony to the Expert Panel at a public meeting to receive comments on the Panel’s draft report.

On July 28, 2014, Regional Water Board staff attended a meeting of the Expert Panel Advisory Committee. The Advisory Committee developed several consensus recommendations related to the Expert Panel’s draft report -
http://www.itrc.org/swrcb/Files/advisory_committee_consensus_comments_to_expert_panel.pdf

3. Compliance & Outreach – East San Joaquin Agricultural Parcel Inspections
In July and August 2014, Regional Water Board ILRP staff inspected 120 parcels in the East San Joaquin River Watershed. The purpose of these inspections is to determine if the parcels are commercial irrigated lands that require coverage under the Eastern San Joaquin River Watershed General Order. Data gathered during these inspections will be used to focus and prioritize the issuance of 13260 directives to commercial irrigated lands that are not covered by the Eastern San Joaquin River Watershed General Order.

4. Compliance & Outreach – Water Code section 13260 Directives
In August, Regional Water Board ILRP staff mailed 67 Directives to landowners who staff has determined own irrigated agriculture. Landowners in the Eastern San Joaquin River Watershed whose parcels are used for commercial irrigated lands (as determined by staff inspections) are being mailed the directives that require the recipients to submit proof of coalition membership or a Notice of Intent to get regulatory coverage.

5. Compliance & Outreach – Letters to San Joaquin County & Delta Growers
In July and August 2014, Regional Water Board ILRP staff mailed 991 initial notice letters and 1,983 final notice letters to likely owners of irrigated lands in the San Joaquin County & Delta Coalition area. The letters advised owners of irrigated lands to join the Coalition before the August 23, 2014 “open enrollment” deadline. After this deadline, new Coalition members must submit a Notice of Intent and processing fee to the Central Valley Water Board in addition to applying to join the Coalition.
6. Compliance & Outreach – Letter to Sacramento Valley Growers
In July and August 2014, Regional Water Board ILRP staff mailed 5,747 notice letters to likely owners of irrigated lands in the Sacramento Valley Water Quality Coalition area. The letters advised owners of irrigated lands to join the Coalition before the October 2, 2014 “open enrollment” deadline. After this deadline, new Coalition members must submit a Notice of Intent and processing fee to the Central Valley Water Board in addition to applying to join the Coalition. Regional Water Board staff is working with Sacramento Valley Water Quality Coalition representatives to determine landowner response to the outreach letters. Follow up outreach to these landowners is pending response results.

7. Compliance & Outreach – Letters to Tulare Lake Basin Area Growers
Since the last Executive Officer report, 801 outreach letters have been issued throughout the Tulare Lake Basin Area, bringing the total number of outreach letters issued in the basin to 28,176. The outreach letter efforts are now complete for the Tulare Lake Basin Area, and Regional Water Board staff will be conducting compliance inspections for unenrolled growers during the upcoming months.

8. Compliance & Outreach - Enforcement
On August 28, 2014, the Assistant Executive Officer of the Central Valley Water Board issued a proposed settlement agreement (Stipulated Order) between the Central Valley Water Board Prosecution Team and David L. and Linda M. Davis Trust (Davis Trust). The settlement is for an Administrative Civil Liability Complaint (Complaint) issued to Davis Trust for failure to respond to a 13260 Directive to obtain regulatory coverage under the Irrigated Lands Regulatory Program.

This Stipulated Order was prepared in response to a memorandum that the Central Valley Water Board’s Advisory Team issued to the Prosecution Team tentatively rejecting an earlier proposed settlement of the Complaint. The Prosecution Team revised the penalty methodology for the Stipulated Order in response to the Advisory Team’s comments to better explain how the proposed settlement adequately addresses the Central Valley Water Board’s regulatory interests.

The Assistant Executive Officer and Davis Trust have tentatively agreed to the terms of the Stipulated Order. However, the settlement agreement will not become final until after a 30-day public notice and comment period and adoption of the Stipulated Order by the Central Valley Water Board, or its delegate. The public comment period ended on October 6, 2014.

9. Coalition Groups
   a) East San Joaquin Water Quality Coalition
   On July 8, 2014, Regional Water Board staff met with the East San Joaquin Water Quality Coalition (Coalition) to discuss concerns identified by staff during review of the Coalition’s Sediment Discharge and Erosion Assessment Report (SDEAR). As a result of the meeting, the Coalition submitted a revised approach for the SDEAR on August 15, 2014. Following completion of Regional Water Board staff’s review, the Coalition will submit a revised SDEAR.

   On August 1, 2014, the Coalition submitted their surface water Monitoring Plan Update (MPU) for the 2015 water year. Per the WDR Order, the MPU provides a comprehensive monitoring schedule, including core sites, represented sites, parameters and frequency of monitoring. Regional Water Board staff review is currently underway.
On August 8, 2014, the Executive Officer approved a 90-day extension for submittal of the East San Joaquin Water Quality Coalition’s (Coalition) revised Groundwater Quality Assessment Report (GAR). The GAR determines high and low vulnerability areas, establishes priorities within high vulnerability areas, and provides a basis for further workplan and management plan requirements. The Coalition must submit the revised GAR by November 10, 2014.

On September 3, 2014, the Coalition submitted a request for extension of the sixth priority Management Plan Performance Goals; specifically for Performance Measures 2.1 and 2.2, which involve obtaining management practice surveys from targeted growers. The request is currently under Regional Water Board staff review.

b) Sacramento Valley Water Quality Coalition (SVWQC)
On August 1, 2014, the Sacramento Valley Water Quality Coalition (Coalition) submitted their surface water Monitoring Plan Update (MPU) for the 2015 water year. Per the WDR Order, the MPU provides a comprehensive monitoring schedule, including representative sites, special study sites, parameters and frequency of monitoring. Regional Water Board staff review is underway.

On September 2, 2014, the Coalition submitted a Groundwater Assessment Report (GAR) Outline, per requirements of the WDR Order. Regional Water Board staff review is currently underway. The GAR determines high and low vulnerability areas, establishes priorities within high vulnerability areas, and provides a basis for further workplan and management plan requirements. The Final GAR is due on June 4, 2015.

c) San Joaquin County and Delta Water Quality Coalition
On August 1, 2014, the San Joaquin County and Delta Water Quality Coalition submitted its 2014 Monitoring Plan Update report in accordance with Attachment B of the Order. The plan is under Regional Water Board staff review.

On August 21, 2014, the Executive Officer approved the Coalition’s final Farm Evaluation Template after receiving comments from the public. The template is used to comply with the requirements of the General Order. Coalition members must submit their farm evaluations to the Coalition by June 15, 2015.

On August 22, 2014, based on the information provided in a June 2014 request letter, the Executive Officer approved the completion of certain management plans within the San Joaquin County and Delta Water Quality Coalition.

d) Tulare Lake Basin Area Third-party Groups
On July 29, 2014, Regional Water Board staff met with representatives of the Cawelo Water District Coalition to discuss the development of the Surface Water Monitoring Report and proposed monitoring locations. The Groundwater Assessment Report and designation of high vulnerability areas were also discussed.

On August 6, 2014, Regional Water Board staff traveled to western Fresno County to conduct a trial run of irrigated lands compliance inspections.

On August 18 and 19, 2014, Regional Water Board staff issued reviews of Surface Water Monitoring Report outlines for Cawelo Water District Coalition and Westside Water Quality Coalition. The deadlines for submittal of the final Surface Water Monitoring Plans are October 23 and November 17, 2014, respectively.

On August 22, 2014, the Executive Officer issued revised Notices of Applicability to the Cawelo Water District Coalition and the Kern River Watershed Coalition Authority to revise a shared boundary between the coalitions.

On August 27, 2014, Regional Water Board staff met with the representatives of the Kaweah Basin Water Quality Coalition and Fig Growers Laboratory to discuss quality control and data formatting issues.

On September 3, 2014, Regional Water Board staff met with representatives of the Buena Vista Coalition to discuss the development of the Groundwater Assessment Report and designation of high vulnerability areas.

e) Western Tulare Lake Basin Area Third-Party Group

f) Westside San Joaquin River Watershed Coalition

g) Groundwater Quality Assessment Reports
On July 23, 2014, the Executive Officer and Regional Water Board staff met with representatives from a number of coalition groups to discuss the preparation of Groundwater Quality Assessment Reports. One of the points emphasized was the need to include consideration of disadvantaged communities in establishing priorities in high vulnerability areas.
10. Other Projects

a) Data Management
Data from 2009 through mid-2013 for all Coalitions are available to the public on California Environmental Data Exchange Network (CEDEN). The next transfer is planned for September 2014 and will add data through early 2014. New data will continue to be transferred to CEDEN on a quarterly basis.

Data reports received in September 2014 for the 2nd quarter are currently being processed and loaded into the CEDEN comparable database provided by the Central Valley Regional Data Center (CV RDC).

Regional Water Board staff is currently processing the Westside San Joaquin Watershed Coalition data. Once complete, these sets will complement the existing data on CEDEN providing all of the data submitted by the Coalition since program inception. The current goal is to complete and load the Westside San Joaquin River Watershed Coalition data to CEDEN by end of September this year.

In August of 2013, CEDEN released the most updated and consolidated version of its electronic data templates. Over the course of late 2014 and into early 2015, the ILRP will be transitioning to the use of these new CEDEN templates for Excel based data submissions from Coalitions. This transition will assist all parties in better maintaining comparability and efficient use of resources. Regional Water Board and CEDEN staff met in late September 2014 and updated the webpage with links to the new templates and resources. The update also includes a revised schedule for the transition.

b) Managed Wetlands Workgroup
During the WDR Order adoption hearings for the Long-term ILRP, the Board directed the Executive Officer and Regional Water Board staff to address issues raised by wetlands managers. Following an initial meeting with the Executive Officer, a work group consisting of representatives from public and private managed wetlands formed to address concerns about the applicability of the ILRP framework for regulating discharges from managed wetlands. Following a meeting on March 19, 2014, the workgroup developed a preliminary list of desirable outcomes for a managed wetlands regulatory framework. During a meeting held on July 31, 2014, the Managed Wetlands Workgroup began discussing potential regulatory options. The key concerns expressed were the effects of regulatory program costs on the ability of wetlands managers to optimize wetland habitat and the lack of benefits to their programs under the current program. The next meeting of the Managed Wetlands Workgroup was held on September 16, 2014.

c) Prop 84 Grant Funding
To date, sixty-eight projects have been completed and invoiced. Nine projects are still open. The completion and invoicing of projects are required by December 2014.

The CURES website at http://www.curesworks.org/bmp/projects84.asp has additional information on the Prop 84 funding and photos of completed projects.

d) Rice Pesticides Program
A meeting to discuss the 2014 season monitoring results for the Rice Pesticides Program was held on October 13, 2014 at the Rancho Cordova office.
e) Pesticide Evaluation Advisory Workgroup

The Waste Discharge Requirements for irrigated lands include requirements to monitor pesticides in surface water, which are to be identified as part of a process by Regional Water Board staff with input from qualified scientists and in coordination with the California Department of Pesticide Regulation (DPR). A Pesticide Evaluation Advisory Workgroup was formed and meetings were held on July 9, 2014 and August 5, 2014. The Workgroup has reviewed pesticide monitoring prioritization efforts developed by other entities and incorporated elements into a preliminary pesticides prioritization process. Detailed discussion of the process will continue in the next meeting on September 25, 2014. Additional Workgroup information is available at: http://www.waterboards.ca.gov/centralvalley/water_issues/irrigated_lands/new_waste_discharge_requirements/stakeholder_advisory_workgroup/index.shtml

<td>A</td>
<td>Antidegradation Policy</td>
<td>2014-10-31</td>
<td>The State Water Board is considering preparation of an Implementation Plan Appendix to the existing Antidegradation Policy, or an additional policy, to address application of the Antidegradation Policy to groundwater. Focused stakeholder meetings were held in October and November 2013. The work team, composed of members from the State Water Board and Regional Water Boards, convened in Sacramento on April 21 and June 27, and in Riverside on August 15, 2014, to consider stakeholder comments, review staff discussion papers, and work on the framework for the Implementation Plan or policy. The project web page went live in September, 2014, and contains summaries of purpose, background, and process; an estimated time line; and links to associated documents. Staff is preparing a draft white paper for internal review and discussion by the work team in November 2014. State Water Board executive management and Board briefings are projected for December 2014/January 2015, and additional focused stakeholder group meetings are projected to take place in February/March 2015.</td>

<td>Russian River Frost Protection Regulation</td>
<td>2014-09-26 The Russian River Frost Protection Regulation became effective on December 29, 2011. However, in January 2012, two lawsuits were filed against the regulation and the Mendocino County Superior Court issued an order that stayed the enforcement of the regulation. A court hearing was held in June, 2012. On September 26, 2012 the court issued a decision invalidating the regulations, and on March 6, 2013 issued an amended decision stating that the State Water Board failed to follow CEQA in adopting the regulation. The State Water Board appealed the court decision in May 2013. On June 16, 2014, the First District Court of Appeal issued a unanimous, decision in Light v. State Water Resources Control Bd. (A138440) turning back all the facial and CEQA challenges to the regulation. Both parties appealed the case on July 24th and 28th, respectively by filing petitions with the California Supreme Court.</td>

<td>Sediment Quality Objectives (SQOs) for Enclosed Bays and Estuaries: Phase II*</td>
<td>2014-08-06 Development of human health objectives is in progress. Staff, the SQO Advisory Committee, and Agency Coordinating Committee have met quarterly to create a process for implementing the tiered assessment framework developed by Southern California Coastal Water Research Project (SCCWRP). Staff is also meeting monthly with the Los Angeles Regional Water Quality Control Board, the Ports of Los Angeles and Long Beach, and SCCWRP (known as the Harbor Technical Work Group [HTWG]) to collaborate on studies that will assist in the development, testing, and implementation of Phase II SQO's. The HTWG will refine plans in support of the ports' TMDL activities. Staff established a sediment quality workgroup to coordinate contracts and projects, and address technical issues within coastal regions. The advisory committee met on August 6, 2014 and the Harbor Technical work group met on August 7, 2014. Staff anticipates release of the draft SQO amendments and substitute environmental document in July 2016.</td>

<td>Mercury TMDL (Reservoirs)</td>
<td>2014-11-05 Staff from Regions 2 and 5 are developing a TMDL and implementation plan to address fish mercury impairments in 74 reservoirs around the state. In March 2012, staff held CEQA Scoping meetings in Sacramento, Oakland, Riverside and Redding. Currently staff is working on the scientific and technical analysis (source analysis, linkage, targets, allocations, and implementation plan considerations). Staff is developing a framework document to outline the elements that could be in a statewide plan to reduce fish mercury levels in the reservoirs. Focused stakeholder group meetings are being held in summer 2014. In addition, staff met with the reservoir operators on March 17, May 16, and September 30. On October 9 we presented to a large group of reservoir managers at the CA Lake Management Society. The purpose of the reservoir meetings is to develop ideas and criteria for water chemistry and fisheries management studies and pilot tests.</td>

(Nitrate loading/source reduction for long term solution continues on many fronts - notably Ag, septic systems, and municipal treatment plants)</td>
<td>2014-09-24 Provided free domestic well sampling to 90 wells/households in 2012/2013 through USGS in Salinas and Pajaro Valley areas in conjunction with GAMA Priority Basin Project. Provided results to participants with additional info and resources. Currently preparing bid and contract documents in coordination with DFA and OPP staff for region-wide domestic well sampling project with accompanying outreach and education effort (utilizing combination of CAA and FY 14/15 discretionary funds). Ongoing coordination with EJ groups to identify DACs and disadvantaged individuals, and their drinking water issues/needs. Sent letter to all County Public Health Officers in 2010 with additional testing and notification recommendations for affected well users. Ongoing follow-up and communication with county level drinking water and well permitting programs. Mapped out 970 local small and state small water systems (by parcels served; well locations unknown) in Monterey County with respect to nitrate concentration (see R3 CCAMP-GAP website). Compiled and evaluated nitrate data for 1,627 domestic wells sampled since 2010 (see July 31-August 1, 2014 R3 Board Meeting agenda, Item No. 11). Following up with county officials regarding nitrate data per Board direction. Board allocated $119K in settlement funds for two projects focused on providing safe drinking water to DACs and limited resource farmers in R3. Issues: Local, regional and statewide EJ groups either do not exist or lack capacity to implement or support DAC drinking water needs assessments and help identify and implement interim and long-term solutions. Counties also generally lack capacity or are not willing to support EJ/DAC related efforts.</td>

<td>Mercury and Nutrient TMDL/Control Program in Clear Lake Watershed - Sacramento River and San Joaquin River Basin Plan</td>
<td>The Westside Sacramento Integrated Regional Water Management Plan, for which Lake County is a member, was just recently adopted. One outcome of this planning effort was the need to update the Clear Lake Integrated Regional Watershed Management Plan. Facilitated stakeholder meetings occurred from the end of 2013 to the summer of 2014. Recognizing that funding was not secured for updating the document, the group forum morphed into a Clear Lake information discussion forum. Lake County will now provide leadership of this group and coordinate quarterly meetings. For the Sulphur Bank mercury mine, DTSC and the Regional Board are in discussion with U.S. EPA on the final remedy to remediate the mine, and the EPA is preparing an addendum to the Feasibility Study (FS) to evaluate alternatives to pump and treat. This FS addendum is expected by Jan 2015.</td>

<td>Phase I update of the Bay-Delta Plan: San Joaquin River flows and southern Delta salinity.</td>
<td>Draft Substitute Environmental (SED) released on December 31, 2012 for public comment. Hearing to receive comments on the SED was held on March 20-21, 2013, and comments were received by March 29, 2013. Revised Draft SED to be recirculated for public comment winter 2014/2015. Draft plan amendment to be brought to the Board for consideration in summer of 2015.</td>
<td>Yes</td>
<td>SB (DWR) Diane Riddle</td>
</tr>
<tr>
<td>(A-16*)</td>
<td>Phase II update of the Bay-Delta Plan: Comprehensive Review</td>
<td>State Water Board staff is in the process of a phased review and update of the 2006 Water Quality Control Plan for the Bay-Delta (2006 Bay-Delta Plan). The second phase of the review focuses on the following issues: (1) Delta outflow objectives, (2) export/inflow objectives, (3) Delta Cross Channel Gate closure objectives, (4) Suisun Marsh objectives; (5) potential new reverse flow objectives for Old and Middle Rivers; (6) potential new floodplain habitat flow objectives; (7) potential changes to the monitoring and special studies program, and (8) other potential changes to the program of implementation. Staff is preparing a Scientific Basis Report that will provide the underlying scientific support for proposed flow and water quality objectives. The Report will consider recommendations provided in the Delta Science Program’s Workshops Panel Summary Reports on Delta Outflows and Related Stressors (May 2014) and Interior Delta Flows and Related Stressors (July 2014). The Scientific Basis Report is expected to be released for public review in winter 2014/2015. Staff is also developing a Substitute Environmental Document that will provide an evaluation of the potential environmental impacts of the proposed changes to the Bay-Delta Plan. This document is expected to be released for public review in 2016.</td>

<tr>
<td>(A*)</td>
<td>Russian River Frost Protection Regulation</td>
<td>The Russian River Frost Protection Regulation became effective on December 29, 2011. However, in January 2012, two lawsuits were filed against the regulation and the Mendocino County Superior Court issued an order that stayed the enforcement of the regulation. A court hearing was held in June, 2012. On September 26, 2012 the court issued a decision invalidating the regulations, and on March 6, 2013 issued an amended decision stating that the State Water Board failed to follow CEQA in adopting the regulation. The State Water Board appealed the court decision in May 2013. On June 16, 2014, the First District Court of Appeal issued a unanimous, decision in Light v. State Water Resources Control Bd. (A138440) turning back all the facial and CEQA challenges to the regulation. Both parties appealed the case on July 24th and 28th, respectively by filing petitions with the California Supreme Court.</td>
