Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation).

Board,

Please consider reducing the water reduction requirement for San Juan Water district. We have worked exceptionally hard to achieve the results we have and have sacrificed both our lifestyles and our aesthetics in an effort to meet your goal which we were not fully able to do. We would appreciate setting a standard that is both attainable and liveable so that we can have a long term conservation goal. The 33% reduction is not sustainable without damage to our community.

Your consideration is appreciated.

Craig Nagler
