Subject: Don't end the drought restrictions
Date: Sunday, February 05, 2017 6:31:29 PM

Now that we have become accustomed to conserving water whenever possible, it would be a mistake to ease the drought restrictions and have everyone return to our former profligacy with water.

Other droughts will come; some predict a 'superdrought' within the next few decades. I urge you not to ease the drought restrictions.
