### **BACKGROUND**

The CWSRF program provides low-cost financing statewide for wastewater treatment and recycling, non-point source, estuary, storm water, and combined sewer system projects. The SCWW funding supplements the CWSRF program, providing grants through Prop 1, Prop 68, and other sources to small disadvantaged communities and small severely disadvantaged communities for wastewater projects.

The DWSRF program provides low-cost financing to public water systems statewide to address drinking water quality and capacity issues. It also subsidizes a portion of California's public water system supervision program under the Division of Drinking Water. The Prop 1 and Prop 68 Drinking Water programs provide funding for public water system infrastructure improvements and related actions to meet safe drinking water standards, to ensure affordable drinking water, or both. Prop 1 and Prop 68 Drinking Water funds will be administered consistent with the DWSRF IUPs, the DWSRF Policy, and the Safe and Affordable Funding for Equity and Resilience (SAFER) Fund Expenditure Policy and Plan to the extent allowed by federal regulations and state law.

The IUPs outline the State Water Board's business plans for the SRF programs as well as the funding sources that complement the SRF programs during SFY 2021-22. It identifies the available funding, the projects the State Water Board anticipates financing,

the associated financing terms, and the measures that will be used to track the programs' performance.

The IUPs are required by federal statutes and regulations and will be included in the applications submitted to the United States Environmental Protection Agency (U.S. EPA) for the FFY 2021 SRF Capitalization and ASADRA Grants.
