Notice of Board Meeting and Opportunity to Comment Proposed Emergency Regulations for Electronic Reporting of Drinking Water Quality Data

The State Water Resources Control Board will conduct a Board Meeting on June 2, 2026, to consider adoption of the proposed emergency regulations for electronic reporting of drinking water quality data. If adopted, the regulations will allow the State Water Board to enforce the current electronic reporting requirements directly against public water systems, which are responsible for utilizing laboratories to provide analysis of drinking water that report regulatory results through the California Laboratory Intake Portal (CLIP). Additional information about this project is provided below.

Background

The State Water Board already adopted the reporting requirements for environmental laboratories in 2020. (See Cal. Code Regs., tit. 22, § 64814, subd. (k), effective January 1, 2021.) These regulations required laboratories to submit analytical results electronically using the California Laboratory Intake Portal (CLIP). CLIP has been officially implemented since September 2021, and laboratories have been submitting their drinking water analysis data through CLIP for over four years.

The proposed emergency regulation amends section 64469 to allow the State Water Board to enforce the current electronic reporting requirements directly against public water systems, which are responsible for utilizing laboratories to provide analysis of drinking water that report regulatory results through CLIP.
