Comment Letter – Cambria WDR Update

Re: Draft updated order #R3-2014-0050

Dear Central Coast Regional Water Quality Control Board:

We have been Cambria full time owners since 2013. We love our community and need your help in approving our Emergency Water Project to becoming a permanent water supply facility that can be operated year-round if needed during a drought.

We lived through the previous drought and it was tough hauling water in from outside sources. As we get older it becomes physically harder to manually help our elderly neighbors hauling large containers of water.

We will be at your meetings in May in support of the new update so we can move on to a permanent water supply facility.

Thank you,

Charlie and Linda Casale
