Subject: Comment Letter – Cambria WDR Update

Re: The EWS Project and the proposed update Draft Updated Order No. R3-2014-0050.

and The CCSD Sustainable Water Facility, CDP DRC2013-00112

We need the EWS/SWF for our health and safety as this would do the following:

- (1) Provide a permanent water supply facility that could be operated to meet Cambria's water demands and improve overall supply reliability, year-round.
- (2) Cambria would be safeguarded against water shortages and maintain its self-sufficiency.
- (3) Prevent the migration of secondary wastewater effluent into the San Simeon Creek well field production wells. •
- (4) Relieve stress on both San Simeon Creek and Santa Rosa Creek, thereby protecting wildlife and providing a buffer for agricultural water use.

Please include this letter in the administrative record for this proceeding.

Thank you,

Lonnie and Gloria Coffie
