Subject: Comment Letter – Cambria WDR Update

Greetings--

As full-time residents of Cambria who have witnessed the long-running struggles to obtain a permanent water security solution, we want to voice our support for the Emergency Water Supply (also known as the Sustainable Water Facility). It is critical that our community get the permits required to run this facility as needed. We believe the EWS/SWF is a viable and environmentally sound solution to our need for a local, drought-proof source of water.

Sincerely--

Nick Lyons
