Subject: COMMENT LETTER --CAMBRIA WDR UPDATE

ATTENTION: Mr. Jon Rokke

Water Resource Control Engineer

Central Coast Regional Water Quality Control Board

(RWQCB)

As citizens of Cambria, we must and do accept the fact that we need water security and must augment our source of water to sustain our future as a viable town. It is therefore, mandatory for us to support the proposed updates of water discharge and waste recycling requirements for Cambria's Sustainable Water Facility. All activities necessary to insure proper brine disposal which you have approved and recommend for adoption are essential and I support them 100%. They are reasonable and allow us to continue toward our objective of being able to utilize the SWF that the overwhelming majority of our residents support wholeheartedly for the reasons stated above.

I am a full time resident of Cambria, a homeowner and have lived here and owned my home for over 20 years.

Very truly yours

Richard J Morse
