Subject: Comment Letter – Cambria WDR Update

Jon Rokke
Water Resource Control Engineer
Jon.rokke@waterboards.ca.gov

Mr Rokke,

I am writing in support in support of the proposed updates of Order No. R3-2014-0050, Waste Discharge Requirements (WDRs) and Waste Recycling Requirements (WRRs) for the Cambria CSD Emergency Water Treatment Facility and Recycled Water Re-Injection Project.

Cambrians are in dire need of a permanent water supply facility that can be operated to meet Cambria's water demands and improve overall supply reliability, year-round. The fully permitted water facility will meet that need.

We need to protect our natural water supply and environment. The fully permitted water facility will meet that need.

We need to ensure health, safety and economic vitality of the Cambria community. The fully permitted water facility will meet that need.

I urge the Central Coast Regional Water Quality Control Board to adopt the proposed Order in its entirety.

Respectfully submitted,

Andy Pickar
