I am writing to the board asking you to take appropriate action to insure that the EWS Project continues on its path to completion for this communities benefit. I am a 29 year full time resident and have been thru several droughts. I now have much greater respect for water and monitor my use. I do not feel it is good to not flush toilets, not put enough water down sink drains and not fun taking "navy" showers. Money has been invested in the facility (I did tour it) and would be a terrible waste if we can not use it. The need is going to be great as we see what it happening all over with climate change. I am now eighty years old and would enjoy a slightly more comfortable life. Thank you for your consideration.

Pat Taylor
