Re: Restarting the Los Osos Sewer Project

Dear Mr. Young,

The purpose of this letter is to request your immediate assistance in restarting construction on the Los Osos sewer. As a resident and property owner, I have patiently waited with the community for over 17 years for a sewer. We cannot wait any longer. The Morro Bay Estuary continues to be polluted and our ground water quality deteriorates. Our tax dollars including the sewer assessment disappear with no results.

As a business owner, I know that the local economy has stagnated. No new businesses mean no new full time jobs for our residents and no new part time jobs for our high school and college students. Ultimately, these conditions lead to lower business and personal income tax revenue. This situation has to be remedied.

The new CSD board does not comprehend the reality of the environmental implications of delaying the sewer construction for additional years. Nor do they understand the financial implications of RWQCB enforcement fines, CSD bankruptcy, contractor litigation, and the loss of State funding.

Please help this community solve our problem by using every measure at your disposal to immediately restart the Los Osos sewer construction.

Very truly yours,

Dennis C. Schneider, Ph.D.
