Subject: phony baloney move the sewer election

"Schicker also said her board has found a willing seller for an alternate sewer location at the Andre site on the east side of town"

The Andre site is not "on the east side of town" it is out of her jurisdiction...

The 14 vote majority was a result of not allowing many land owners in the CSD district the right to vote, even though we will be subject to the same sewer fees as everyone else...

As the sewer assessments are to be added to our property tax bills...isn't this taxation without representation?

The people who live in the valley near where she wants to build her planned, cheaply designed sewer plant (as she said to save money) did not have a right to vote in the phony baloney election either...

She should keep her own CSD sewage in her own backyard....
