

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION
895 Aerovista Place, Suite 101
San Luis Obispo, California**

**Order No. R3-2008-0048
July 11, 2008**

**Individual Conditional Waiver of Waste Discharge Requirements
Camp Lindblad 1-07-119 SCR
Santa Cruz County**

WHEREAS, the California Regional Water Quality Control Board, Central Coast Region (hereinafter Water Board or Regional Board) finds that:

1. California Water Code (CWC) Section 13260(a) requires that any person discharging waste or proposing to discharge waste within any region that could affect the quality of the waters of the State of California (hereinafter the State), other than into a community sewer system, shall file with the appropriate Water Board a report of waste discharge (ROWD) containing such information and data as may be required by the Water Board.
2. The Water Board prescribes waste discharge requirements, except where the Water Board finds that a waiver of waste discharge requirements for a specific type of discharge is in the public interest pursuant to CWC Section 13269.
3. California Water Code Section 13269 authorizes the Water Board to waive the issuance of waste discharge requirements provided that the waiver of waste discharge requirements is consistent with applicable water quality control plans and is in the public interest. In addition, any waiver must be conditional, may not exceed five years in duration, and may be terminated at any time. The waiver must also include monitoring unless the Regional Board determines that the discharges do not pose a significant threat to water quality.
4. On July 8, 2005, in accordance with CWC Sections 13267 and 13269, the Water Board adopted Order No. R3-2005-0066 – General Conditional Waiver of Waste Discharger Requirements – Timber Harvest Activities in the Central Coast Region (General Waiver), which includes Eligibility Criteria. The Water Board uses the Eligibility Criteria to numerically evaluate a timber plan based on factors such as intensity of infrastructure (soil disturbance factor), intensity of harvesting over the past 15 years in the same watershed (cumulative effects ratio), and number and type of streams in the harvest area (drainage density index). The Eligibility Criteria provide the Water Board with a method for ranking timber harvest activities and assigning them an appropriate monitoring tier. The four monitoring tiers are described as:

Tier I: CDF Forest Practice Rules compliance monitoring.
Road inventory program.
Forensic monitoring as necessary.

Tier II: CDF Forest Practice Rules compliance monitoring.
Road inventory program.
Forensic monitoring as necessary.
Visual and photo monitoring of harvest infrastructure.

Tier III: CDF Forest Practice Rules compliance monitoring.
Road inventory program.
Forensic monitoring as necessary.
Visual and photo monitoring of harvest infrastructure.
Water Column monitoring.

Tier IV: Individual Conditional Waiver of Waste Discharge Requirements
with appropriate monitoring or
Waste Discharge Requirements with appropriate monitoring

5. On February 7, 2008, the Water Board received a complete report of waste discharge (ROWD) for Timber Harvest Plan 1-07-119 SCR Camp Lindblad.
6. Water Board staff evaluated the Camp Lindblad harvest plan using the Eligibility Criteria. According to the Eligibility Criteria, the Camp Lindblad harvest falls into Tier IV. The Camp Lindblad has a high cumulative effects ratio, high drainage density index, medium soil disturbance factor.
7. In accordance with CWC Section 13269, the Water Board will regulate by Individual Conditional Waiver of Waste Discharge Requirements (Individual Waiver) the discharge of waste associated with the timber harvest activities of the Timber Harvest Plan (THP) 1-07-119 SCR Camp Lindblad.
8. The Water Board has adopted the Water Quality Control Plan for the Central Coast Region (Basin Plan), which establishes beneficial uses, water quality objectives, waste discharge prohibitions, and implementation policies that apply to waters of the State and discharges to waters of the State within the Central Coast Region.
9. Pursuant to the Basin Plan and California State Water Resources Control Board (hereinafter State Water Board) Plans and Policies, including State Water Board Resolution No. 88-63, the existing and potential beneficial uses of the Kings Creek Watershed potentially affected by the activity include:
 - a. Cold Freshwater Habitat (COLD)
 - b. Commercial and Sportfishing (COMM)
 - c. Ground Water Recharge (GWR)
 - d. Migration of Aquatic Organisms (MIGR)
 - e. Municipal and Domestic Supply (MUN)

- f. Water Contact Recreation (REC-1)
- g. Non-contact Water Recreation (REC-2)
- h. Preservation of Biological Habitats of Special Significance (BIOL)
- i. Spawning, Reproduction, and Development (SPWN)
- j. Wildlife Habitat (WILD)

10. The Basin Plan contains water quality objectives developed to protect the above-listed beneficial uses of water. The factors in CWC Section 13241, including economic considerations, were considered as required by law during the development of these objectives. Prohibitions, provisions, and specifications contained in this Order implement these previously developed water quality objectives. Compliance with water quality objectives will protect the beneficial uses listed in the above Finding.
11. The Water Board analyzed the potential water quality impacts associated with the Camp Lindblad harvest as described in the THP and ROWD. The Water Board finds that the proposed discharge will comply with State Water Board Resolution No. 68-16, "Statement of Policy with Respect to Maintaining High Quality of Waters in California." Resolution No. 68-16 requires the Water Board to maintain the high quality of waters of the state unless the Water Board determines that some degradation of waters is consistent with maximum benefit to the people of the state, will not unreasonably affect present and anticipated beneficial use of such water and will not result in water quality less than set forth in the Basin Plans. The Water Boards must assure that waste discharge requirements will result in best practicable treatment or control of the discharge necessary to assure that pollution or nuisance will not occur and the highest water quality is maintained. In short, the degradation may not violate water quality objectives and must not unreasonably affect existing and designated beneficial uses.
12. In general, timber harvesting and associated activities can cause the discharge of sediment, and can cause temperature and turbidity increases in receiving waters. The Water Board finds that the harvest, including the discharge of these constituents, will not result in any appreciable or significant adverse changes to water quality due to erosion, sediment discharges, temperature increases or turbidity if the Discharger complies with the THP, Forest Practice Rules, Board of Forestry Regulations, the conditions of Order No. R3-2008-0048, and Monitoring and Reporting Program No. R3-2008-0048.
13. The California Department of Forestry and Fire Protection (CDF) and the California Board of Forestry (BOF) regulate timber harvest activities on non-federal lands in accordance with the Z'berg-Nejedly Forest Practice Act (Public Resources Code, Section 4511 et seq.) and the California Forest Practice Rules (Title 14, California Code of Regulations, Chapter 4, Section 895 et seq.). CDF is the state agency with primary jurisdiction over timber activities. The Water Board regulates water quality impacts of timber plans CDF has found to be in conformance with the Forest Practices Act and Board of Forestry regulations. The Water Board does not have

legal authority to require an alternative project but can impose conditions under the CWC.

14. The Secretary of the Resources Agency has approved that the CDF's timber harvest plan regulatory program as a certified regulatory program, which exempts CDF from the requirement to adopt an Environmental Impact Report or a negative declaration (CEQA Guidelines § 15251). Registered Professional Foresters submit either a Non-Industrial Timber Management Plan (NTMP) or Timber Harvest Plan (THP) and only CDF has the authority to grant discretionary approval for these projects. CDF considers all the significant environmental effects of the project and makes a finding under CEQA Guidelines section 15091 for each significant effect. If CDF finds that the timber operations will not have a significant effect on the environment, a THP serves as a substitute negative declaration. If CDF finds that the timber operations may have a significant effect on the environment, the THP serves as a substitute environmental impact report, and includes mitigation of potential impacts. CDF considered all the potential significant environmental effects of the Camp Lindblad harvest and made a finding that the timber operations identified in the THP will not have a significant effect on the environment. Therefore, the above-referenced THP serves as a substitute negative declaration for the timber harvest.
15. During their review process in accordance with California Forest Practice Rules (Title 14, California Code of Regulations, Article 2, Subchapter 7, Section 1037.5), Water Board staff participated on the CDF interdisciplinary review team for Camp Lindblad. CDF considered the recommendations made on Camp Lindblad by the interdisciplinary review team before determining that Camp Lindblad conforms to the Forest Practices Act and Board of Forestry Regulations.
16. CDF regulates timber harvesting practices in the State and requires the Discharger to implement practices to control water quality impacts, including erosion and sedimentation. The Discharger must also comply with any local ordinances that also require various controls to protect water quality. The conditions of this Order protect beneficial uses by:
 - (i) Prohibiting pollution, contamination or nuisance;
 - (ii) Requiring monitoring and compliance with applicable water quality control plans;
 - (iii) Requiring the Discharger to grant access to Water Board staff to perform inspections; and
 - (iv) Requiring approval of the THP by CDF.
17. Management practices are the most feasible treatment method to prevent or control the discharges. If a timber harvest is conducted in the manner prescribed in the THP and the conditions of this Order, an Individual Waiver is in the public interest and is consistent with applicable water quality control plans, including the Basin Plan.

18. The winter period for the Central Coast Region shall be October 15 through April 15.
19. The rain year for the Central Coast Region shall be July 1 through June 30.
20. The Camp Lindblad Timber Harvest Plan (THP) lays out a 150 acre selective harvest utilizing a combination of tractor, rubber tired skidder, and skyline cable yarding within the Kings Creek Watershed. The harvest covers 150 acres, or just less than two percent of the 7,774 acre planning watershed (Kings Creek Watershed - CalWater V2.2: 3304.120101). Approximately 26 percent of the watershed has been selectively harvested within the last 15 years.
21. In accordance with CWC section 13267 and 13269, the Discharger is required to conduct visual, photo, turbidity, and temperature monitoring as a condition of the Individual Waiver. The Water Board needs this information to verify that these Individual Waiver requirements are the appropriate regulatory tool for Timber Harvest activities for THP 1-07-119 SCR Camp Lindblad. Evidence that supports the need for this information was presented in the Discharger's ROWD.
22. Pursuant to California Water Code Section 13269, this action waiving the issuance of waste discharge requirements for this THP: (a) is conditional, (b) may be terminated at any time, (c) does not permit an illegal activity, (d) does not preclude the need for permits which may be required by other local or governmental agencies, and (e) does not preclude the Water Board from administering enforcement remedies (including civil liability) pursuant to the California Water Code.
23. The Water Board has considered the THP in the adoption of this Order. This Order requires the Discharger to comply with all requirements of the THP and Monitoring and Reporting Program R3-2008-0048.
24. The Water Board finds that the adoption of this Order will not have a significant impact on the environment and will be in the public interest, provided that the Discharger:
 - (a) Complies with the conditions of the Order, and
 - (b) Complies with applicable State Board and Water Board plans and policies and as those plans and policies may be amended from time to time through the amendment process.
25. This Order does not regulate or approve point-source discharges that require a National Pollutant Discharge Elimination System (NPDES) permit under the Clean Water Act, including but not limited to silvicultural point-source discharges, as defined in 40 CFR Chapter 1 Part 122.27.

26. The Executive Officer may terminate the applicability of the Individual Waiver for 1-07-119 SCR Camp Lindblad if the Executive Officer makes any of the following determinations:
- (a) The timber harvest activity is not in compliance with any applicable condition of this Individual Waiver.
 - (b) The timber harvest activity has varied in whole or in part from the approved THP, unless these changes result in better protection of water quality.
27. The Executive Officer or Water Board may terminate the applicability of this Individual Waiver at any time when such termination is in the public interest and / or the timber harvest activities could affect the quality or beneficial uses of the waters of the State.
28. The Water Board conducted a public hearing on July 11, 2008, in Watsonville, California, and considered all testimony and evidence concerning this matter.
29. Any person affected by this action of the Water Board may petition the State Water Board to review the action in accordance with section 13320 of the California Water Code and Title 23, California Code of Regulations, Section 2050. The petition must be received by the State Water Board within thirty (30) days of the date of this Order. Copies of the law and regulations applicable to filing petitions will be provided upon request.

THEREFORE IT IS HEREBY ORDERED:

1. In accordance with CWC Section 13269, the waste discharges associated with timber harvest activities of THP 1-07-119 SCR Camp Lindblad in the Central Coast Region shall be subject to the following conditions, and the requirement to obtain waste discharge requirements is hereby waived, subject to the following conditions:
 - a. "Discharger" means the landowner and anyone working on behalf of the landowner in the conduct of timber harvest activities.
 - b. The Discharger shall comply with all requirements of applicable water quality control plans adopted by the Water Board and approved by the State Water Board, and water quality control plans and policies adopted by the State Water Board.
 - c. The Discharger shall conduct timber harvest activities in accordance with the approved THP and with all applicable sections of the Forest Practice Rules.
 - d. The Discharger shall notify the Water Board concurrently when submitting a request to CDF for a minor or major amendment.

- e. The Discharger shall notify the Water Board concurrently when notifying CDF of Commencement of Operations pursuant to California Forest Practice Rules, Title 14 CCR 1035.4 Notification of Commencement of Operations.
- f. The Discharger shall obtain and comply with all local, state and federal permits required by law. The Discharger shall comply with all applicable county ordinances related to timber operations, including zoning ordinances.
- g. The Discharger shall not create a condition of pollution, contamination, or nuisance, as defined by CWC Section 13050.
- h. The Discharger shall not discharge any waste not specifically regulated by this Individual Waiver, except in compliance with CWC Section 13264. Waste specifically regulated by this Order includes: earthen materials including soil, silt, sand, clay, rock; and organic materials such as slash, sawdust, or bark. Examples of waste not specifically regulated by this Order include petroleum products, hazardous materials, or human wastes.
- i. The Discharger shall not cause alteration in stream temperature that exceeds Basin Plan requirements. The Basin Plan requirement for stream temperature states that, "At no time or place shall the temperature be increased by more than 5°F above natural receiving water temperature."
- j. The Discharger shall not cause alteration in turbidity that exceeds Basin Plan requirements.
- k. The Discharger shall allow Water Board staff reasonable access, pursuant to Public Resources Code 4604 (b), onto THP 1-07-119 SCR Camp Lindblad, for the purpose of performing inspections to determine compliance with these requirements.
- l. Pursuant to California Water Code Sections 13267 and 13269, the Discharger shall comply with Monitoring and Reporting Program (MRP) No. R3-2008-0048.
- m. The Discharger shall take immediate action to repair failed crossings, culverts, roads and other sources of sediment as soon as possible.
- n. The Discharger shall maintain all erosion and sediment control devices, management measures and mitigations prescribed in the THP for the term of this Order.
- o. The Discharger shall comply with all requirements of the Executive Officer pursuant to Monitoring and Reporting Program (MRP) No. R3-2008-0048.
- p. The Discharger must develop a long-term road inventory and erosion control inspection and maintenance program (road program). The road program must outline how the discharger will utilize, inspect, and maintain the road system and

associated timber harvest infrastructure for the long-term protection of water quality. Long-term means 15 years from the acceptance of the CDF Work Completion Report, or until the next Timber Harvest Plan is implemented, whichever comes first.

2. This Order shall not create a vested right to discharge and all such discharges shall be considered a privilege, as provided for in CWC Section 13263.
3. Upon receipt of notice of termination of applicability of the Individual Waiver, the Discharger shall immediately cease all timber harvest activities that may result in discharges to waters of the State, other than activities necessary to control erosion. Upon notice of termination, the discharger must file a report of waste discharge and applicable filing fee. Timber harvest activities that may result in discharges that could affect the quality of waters of the State may commence only upon enrollment by the Executive Officer under general waste discharge requirements or individual waste discharge requirements, or in accordance with CWC Section 13264(a).
4. This Order shall become effective on July 11, 2008, and shall expire on July 11, 2013, unless terminated or renewed by the Water Board. The Water Board may terminate this Individual Waiver at any time.
5. As provided by CWC Section 13350(a), any person who, in violation of any waiver condition, discharges waste, or causes or permits waste to be deposited where it is discharged, into the waters of the state, is subject to administrative or civil liability for the violation.

I, Roger W. Briggs, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Coast Region, on July 11, 2008.

Roger W. Briggs, Executive Officer
