REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION**

STAFF REPORT FOR REGULAR MEETING JULY 11, 2008
Prepared on June 16, 2008

ITEM NUMBER: 9

SUBJECT: Enforcement Report

DISCUSSION

Violations Listing

Staff uses the California Integrated Water Quality System (CIWQS) to track Water Board data, including violations and enforcement actions. The following pages contain a list of violations generated from CIWQS that occurred between February 1, 2008, and March 30, 2008.

CIWQS is still a work in progress, and the attached report has some deficiencies. However, we are providing the report to demonstrate the current and future capabilities of CIWQS. This listing has improved and should continue to improve in future editions. CIWQS has a new sewer system overflow (SSO) module which provides better tracking and reporting of such spills.

Summary of Enforcement Activities

The following information summarizes significant enforcement action taken by the Water Board during the period between April 1, 2008, and May 31, 2008, including several Notices of Violation (NOV) for California Water Service Company (Cal Water). Cal Water's well development and the frequent water sampling required by California Department of Public Health produce large quantities of water which are discharged to nearby surface water bodies. Cal Water's NOV's were issued for four supply wells whose discharge is regulated by NPDES General Order No. R3-2006-0063. The General Order requires all new enrollees to analyze the wastewater for 126+ priority pollutants as required by the State Implementation Policy. The 126+ priority pollutants scan for VOCs, Semi-VOCs, chlorinated pesticides, and inorganics. The NOV's are in response to Cal Water's failure to analyze for some of these constituents and for reporting the constituents at a reporting limit higher than what is required by the State Implementation Policy.
