RECENT REFURBISHMENT PROJECTS IN SOUTHERN CALIFORNIA

MARKLAND INDUSTRIES- METAL FINISHER

*They have 30 cu.ft. softeners with old timed regen valves.
New 2" control valves with meters were installed.
35% salt savings – minimal investment*

BELMONT LAUNDRY

*Old Aquamatic diaphragm valves manually regenerated on a schedule!!
New 2" Hydrus valves and meters installed.
Salt consumption dropped from 12,000 lbs. a month to 3,000 lbs
And corresponding water usage.*

YEE YUAN LAUDRY

Aquamatic manual system was removed.

*Whole new system was installed.
Salt consumption went from 300,000 lbs a year to 145,000 lbs.
And corresponding water usage.*

BRAUN LAUNDRY

*Aquamatic steel tank system was refurbished with new valves and meters only.
Salt consumption went from 600,000 lbs a year to 120,000 lbs. a year.*

This one refurbishment project at this one laundry freed up enough "New Capacity" to allow a typical California city of 16,000 to have residential softeners without affecting the TMDL's.*

**(typical family's of four with an average market penetration of 30%)*
