ORDER NO. R3-2021-0008

GENERAL PERMIT DESCRIPTIONS

Permit Number	Permit Name	Description
R3-2005-0001	General Waste Discharge Requirements for Fertilizer and Pesticide Handling Facilities in the Central Coast Region.	A regional general permit that provides consistency in methods of containment, transfer, and disposal of dry and liquid fertilizer and pesticide wastes. Applicable for facilities that store, formulate, or handle bulk pesticides and/or fertilizers.
2014-0153-DWQ	General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems	A statewide general permit that regulates small domestic wastewater treatment systems with a monthly average flow of 100,000 gallons or less. Wastewater in this permit is most commonly from residences, campgrounds, restaurants, and small shopping centers with septic systems.
R3-2004-0066	General Waste Discharge Requirements for Discharges of Fruit and Vegetable Processing Waste	A regional general permit that regulates the discharge of fruit and vegetable processing waste, which includes any byproducts of the cutting, cleaning, cooling, drying, sorting, juicing, or packaging of fruits and vegetables, with the exclusion of waste from wineries and mushroom farms. This permit includes a waiver component for discharges less than 10,000 gpd.
R3-2017-0020	General Waste Discharge Requirements Order for Discharges of Winery Waste	A regional general permit that regulates the discharge of winery waste, which includes pomace, lees, process wash water, and water softener waste brine. This permit includes a categorical waiver of waste discharge requirements for wineries producing less than 10,000 cases of pressed wine annually and pose minimal threat to water quality. On January 20, 2021, the State Water Resources Control Board approved a new statewide winery general permit. Most facilities regulated by R3-2017-0020 will be transitioned into the new statewide winery permit over the next couple of years.
Statewide Winery Permit	General Waste Discharge Requirements for Winery Process Water	A statewide general permit that regulates the discharge of winery waste from wineries and other similar facilities producing wine or grape juice. Facilities that discharge winery waste to land for disposal or reuse purposes are eligible for coverage under this general permit.

Permit Number	Permit Name	Description
R3-2020-0020	General Waste Discharge Requirements for Discharges from Domestic Wastewater Systems with Flows Greater than 100,000 gallons per day.	A regional general permit that regulates large domestic wastewater treatment systems with flows greater than 100,000 gallons per day. This general permit allows the production and onsite use of non-potable recycled water with co-compliance with Title 22 regulations.
R3-2019-0089	General Waiver for Specific Types of Discharges	<p>A regional general waiver for a variety of low threat discharges in four categories:</p> <ul style="list-style-type: none"> • Fire sprinkler water; inert wastes; residential swimming pool water; water supply discharges from pipelines, storage tanks, pump tests and well development; and water supply well drilling muds. • In-situ groundwater remediation. • Trenchless construction drilling muds; highway grinding slurry; highway grooving residues; sediment removal from waters of the state; treated groundwater; and monitoring well development and aquifer and well pumping test water. • Dischargers not specified in other sections contingent upon regional board approval.
2016-0068-DDW	Water Reclamation Requirements for Recycled Water Use	A statewide general permit that is applicable to recycled water projects where recycled water is used or transported for non-potable uses such as irrigation of crops and pastureland. The general permit does not regulate the treatment of wastewater.
