## Central Coast Regional Water Quality Control Board

### **PUBLIC NOTICE Pending Case Closure Plantronics, Inc. (Poly) 345 Encinal Street, Santa Cruz**

*Si desea obtener información en español,  
póngase en contacto con Monica Barricarte al (805) 549-3881*

**October 11, 2021**

The Central Coast Regional Water Quality Control Board (Central Coast Water Board) is the state regulatory agency responsible for the protection of groundwater and surface water quality within the central coast region. As such, we are overseeing the investigation and cleanup of volatile organic compounds from the historical below grade sump leaks at the above-referenced site. Plantronics, Inc. (now Poly, since March 2019) is the party responsible for investigation and cleanup of the site. We are notifying the site property owner, surrounding property owners, and other potentially interested parties of the proposed closure of this case. Please provide your comments or concerns regarding closure of this Site Cleanup Program (SCP) case to this office by **November 15, 2021**. It is not necessary to respond if you have no comments. Information on the SCP case investigation and cleanup is available for review at the State Water Resources Control Board's GeoTracker database:

<http://geotracker.waterboards.ca.gov/?gid=SL0608715614>

You can view a site location map at:

[https://geotracker.waterboards.ca.gov/map/?global\\_id=SL0608715614](https://geotracker.waterboards.ca.gov/map/?global_id=SL0608715614)

After reviewing the soil investigation, groundwater monitoring, and cleanup results, Central Coast Water Board staff has determined that there is no significant threat to groundwater resources, human health, or the environment from this site. Residual volatile organic pollutants remaining in soil and groundwater are well characterized and declining in volume and concentration. The pollutant mass has been removed from the site to the maximum extent practicable, is localized and limited in extent, and historical monitoring data indicate pollutant concentrations in groundwater are expected to continue decreasing to below cleanup goals in a reasonable time. Following the public

comment period and resolution of any comments, and pending proper monitoring well destruction, the Executive Officer may issue a case closure letter.

The final draft of the Case Summary Form is available for review at:

<https://geotracker.waterboards.ca.gov/?surl=wuync>

If you wish to obtain additional information, provide comments, or if you need assistance accessing GeoTracker or the Case Summary Form, please contact Dillon Kass at (805) 542-4648 or Greg Bishop at (805) 549-3132 (email addresses are provided in the cc section).
