December 19, 2022

The Central Coast Regional Water Quality Control Board (Central Coast Water Board) is the state regulatory agency responsible for the protection of groundwater and surface water quality within the central coast region. As such, Water Board staff provide oversight of the investigation and cleanup of petroleum hydrocarbons released from the underground storage tank (UST) at the above-referenced site. The United States Air Force is the party responsible for investigation and cleanup of the site. We are notifying the site property owner (United States Space Force), surrounding property owners, and other potentially interested parties of the proposed closure of this case. Please provide your comments or concerns regarding closure of this UST case to this office by **February 17, 2023**. It is not necessary to respond if you have no comments. Information on the UST case investigation and cleanup is available for review on the State Water Resources Control Board's GeoTracker database at:

<http://geotracker.waterboards.ca.gov/?gid=T0608300292>

A site location map is available at:

https://geotracker.waterboards.ca.gov/map/?global_id=T0608300292

A draft Case Summary Form is available at:

<https://geotracker.waterboards.ca.gov/?surl=tanj3>

After reviewing the soil and groundwater investigation results, Central Coast Water Board staff have determined that there is no significant threat to groundwater resources, human health, or the environment from this site. Petroleum hydrocarbon concentrations are minimal and limited to soil only, as groundwater is not present at the site. The remaining residual soil pollution is well characterized and is expected to reduce in size. Based on current and historical data, the contaminant mass has undergone significant natural attenuation and contaminant concentrations in the soil are expected to continue to decrease with time. Following the public comment period and resolution of any comments, the Executive Officer may issue a case closure letter pursuant to California Underground Storage Tank Regulations.

If you wish to obtain additional information, provide comments, or if you need assistance accessing GeoTracker, please contact **Bryan Little at (805) 549-3704** or **Sheila Soderberg at (805) 549-3592**, (email addresses are provided below).
