Go to the blue navigational column on the left, click on "Email Subscriptions" and follow the instructions provided.

Summary of Recent Well Sampling Results

Wells Sampled with Lab Results ¹	Total # of Wells with TCE ² detections (TCE concentrations below MCL ³)	Total # of wells with TCE concentrations above the MCL	Total # of wells with non-detect TCE concentrations
59	15	11	33

¹ As of 01/29/2016 sixty one (61) wells have been sampled for the Buckley Road Area TCE Investigation; however, two (2) samples are pending laboratory results, therefore fifty nine (59) well samples have laboratory results submitted.

² TCE = Trichloroethene (aka trichloroethylene)

³ MCL = Maximum Contaminant Level (the MCL for TCE is 5.0 micrograms per liter [µg/L])

Buckley Road Area TCE Investigation
Public Meeting Agenda

1. Purpose of meeting
(John Robertson, Water Board)
2. Description of Agency Roles
(John Robertson, Water Board)
3. Introductions
 - a. Water Board and Division of Drinking Water staff
(John Robertson, Water Board)
 - b. San Luis Obispo County Public Health Services staff
(Dr. Penny Borenstein, Public Health)
4. Health effects of TCE
(Dr. Penny Borenstein, Public Health)
5. Effective treatment methods of TCE
(Kurt Souza, Division of Drinking Water)
6. Discussion of well results and TCE source investigation
(Dean Thomas/Thea Tryon, Water Board)
7. Next steps in identifying the source of TCE, collecting additional well samples, and outreach
(John Robertson, Water Board)
8. Questions and Answers
