

Cannabis Regulatory Program Technical Assistance Providers

The purpose of this list is to connect cultivators with individuals that have the appropriate level of experience and technical expertise to assist growers with environmental compliance, particularly with meeting the requirements found in Attachment A of the Cannabis Policy. Inclusion in this list is in no way an endorsement by the Water Board of a provider’s skills or services, but simply a resource for cultivators. To be added to this list, please email centralcoast.cannabis@Waterboards.ca.gov.

Some plans, including the Disturbed Area Stabilization Plan and Site Erosion and Sediment Control Plan, must be prepared by a Qualified Professional. Refer to the [Cannabis General Order](#) (Order No. WQ 2019-0001-DWQ) for the definition of a Qualified Professional and the water quality services that require a qualified professional.
