Notes:
Only constituents historically detected above their respective laboratory reporting limits shown until 2006.
< = Constituent not detected at or above the shown reporting limit
LNAPL = Light non-aqueous phase liquid
NA = Not analyzed
dup. = duplicate sample
trip. = triplicate sample
NR = Not reported in historical data table provided to Parsons
NS = Not sampled

µg/L = micrograms per liter
Last 5 VOCs in table (in italics) are only included in Test America analyses starting 4Q06 to 1Q08.
** = Secondary ion abundances were outside method requirements. Identification based on analytical judgement.
Insufficient = Insufficient water to collect sample
WLO = Water Levels Only, no sample collected
J = estimated value; results are above the method detection limit and below the method reporting limit

Notes:

ug/L = micrograms per liter

LNAPL = Well not sampled due to the presesnce of light non-aqueous phase liquid (LNAPL)

< = Constituent not detected at or above the shown laboratory reporting limit

NA = Not analyzed

Trace = Well not sampled due to the presence of a trace of LNAPL

NS = not sampled

J = estimated value; results are above the method detection limit and below the method reporting limit

Notes:
mg/L = milligrams per liter
Dup = Duplicate sample
LNAPL = Well not sampled due to the presence of light non-aqueous phase liquid
< = Constituent not detected at or above the shown laboratory reporting limit
NA = Not analyzed
Trace = Well not sampled due to the presence of a trace of LNAPL
J = estimated value; results are above the method detection limit and below the method reporting limit

Location ID	Date Measured	Estimated Flow (gpm)	Sample Collected	Sample ID	Comments
A	09/11/09	0.50	N	- -	Wet/moist, 26 fast and 24 slow drip points, sheet flow down left, 18x12 feet area wet.
A	10/09/09	0.27	N	- -	Moist/wet, moist area 15x12 feet, 16 fast and 19 slow points dripping.
A	11/30/09	0.20	N	- -	Moist to wet, Moist area 28 x 15 feet, main seep 15 feet above ground surface.
A	12/17/09	0.10	N	- -	Wet/moist, 4 fast/8 slow points dripping, organic odor but appears natural.
A	01/27/10	3.00	Y	AT-A	Wet with spring and surface flow, sample targeted spring flow, odor to samples.
A	02/25/10	1.00	Y	AT-A	Diffuse wet areas over 20x15 foot area, 7 fast and 8 slow drip points.
A	04/02/10	0.04	N	- -	Wet area 8x10 feet with minor flow, 1 fast drips and 8 slow drips, algal growth present.
A	04/22/10	0.12	N	- -	Wet area 15x15 feet with all independent areas joined, 4 fast drips and 18 slow, algae.
A	05/17/10	0.27	Y	AT-A	Wet area 18x5 feet, with 17 fast drips and 17 slow drips and extensive algal buildup.
A	06/02/10	0.30	Y	AT-A	Wet, flow from planar fracture planes, 19 fast drip and 25 slow drip points, plant growth.
A	07/13/10	0.32	Y	AT-A	Wet, some flow from fracture, one point flowing, significant algal/plant growth, grasses.
A	08/27/10	0.25	Y	AT-A	Wet 9'x10' area, moist 2'x5', slow drip 20, fast drip 14, significant algal/large plant growth
A	09/28/10	0.21	Y	AT-A	Wet 11'x7', moist 2'x'3', abundant algal growth in fracture, grass near top. Flow from fracture, 10 fast, 14 slow drips.
A	10/21/10	0.18	N	- -	Wet 10'x10', moist 3'x4', abundant algal growth and small shrubs, 9 fast, 13 slow drips, flow from planar fracture, not sufficient to sample
A	11/19/10	0.02	N	- -	Wet area 10'x10'; moist area 3'x4'; abundant algae growth with small shrubs; 4 slow drips from planar fracture; insufficient to sample.
A	12/10/10	0.01	N	- -	Moist/wet area 10'x15', abundant algae growth with some small shrubs, 1 fast drip from distinct planar fracture, insufficient flow to sample
A	01/18/11	0.05	Y	AT-A	Wet area 4' x 7'; Moist area 3' x 3'; Abundant algae growth on wet surface; 4 fast drips and 2 slow drips emanating from a distinct planar fracture 5' in length.
A	02/15/11	0.08	Y	AT-A	Two wet 12' x 4' areas adjacent to each other connected by a 3' x 3' moist area; 5 fast drips and 6 slow drips; abundant moss and grass vegetation.
A	06/22/12	0.02	N	- -	No hydrocarbon odor or sheen; 8' x 8' wet area on cliff face; three slow drips; vegetation; insufficient flow to collect sample.
A	07/20/12	0.02	N	- -	No hydrocarbon odor or sheen; 15' x 15' wet area on cliff face; ponded water at toe of cliff; vegetation; insufficient flow to collect sample.

Notes:
V.Low - Flow not determinable due to very low flow.
Fast drip - Approximately 3 drips per second or 40 mL (0.01 gal) in 80 seconds from a point.
Slow drip - Approximately 1 drip per second or 40 mL (0.01 gal) in 240 seconds from a point.

TPH = total petroleum hydrocarbons
SGC = silica gel cleanup
VOCs = volatile organic compounds. Analyzed by U.S. EPA method 8260 unless noted.
PAHs = polycyclic aromatic hydrocarbons. Analyzed by U.S. EPA method 8270C-SIM unless noted.
<1.0 = not indicated at or above the method reporting limit
All results in micrograms per liter (ug/L)
J = Estimated value; results are less than the method reporting limit and above the method detection limit.
NA = not chemically analyzed

RE: Former Unocal Avila Terminal

Work Order: 1204695

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 20-Sep-12 09:33 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Meredith Sprister

Project Manager

Notes and Definitions

R-06	The Reporting Limit has been raised to account for the presence of high levels of analytes.
QR-04	The RPD exceeded the QC control limits.
QM-08	The spike recovery was outside acceptance limits for the MS and/or MSD. The QC Batch was accepted based on LCS/LCSD percent recoveries and RPD values.
J	Detected but below the RL/PQL; therefore, result is an estimated concentration .
ISlowS	The internal standard associated with this sample fails the method criteria on the low side. Results may be biased high.
HT-06	Original analysis done in hold time. Re-analysis done out of hold time.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate (CLP E-flag).
D-06	The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
D-03	The result for this hydrocarbon is elevated due to the presence of single analyte peak(s) in the quantitation range.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Dear Ms. Sprister,

Enclosed are analytical results for two aqueous samples submitted to Zymax on September 21, 2012. The data were obtained from 8270M GC/MS SIM analysis on the extract samples.

The project was performed at Zymax forensics as Laboratory No. 42774.

Please call us at 760-781-3338 or email me at Shantan@zymaxusa.com if you have any questions regarding the analytical results.

Sincerely,

Shan-Tan Lu, Ph.D

RE: Former Unocal Avila Terminal

Work Order: 1205196

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 16-Oct-12 11:10 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Meredith Sprister

Notes and Definitions

QR-04	The RPD exceeded the QC control limits.
QR-02	The RPD result exceeded the QC control limits; however, both percent recoveries were acceptable. Sample results for the QC batch were accepted based on percent recoveries and completeness of QC data.
J	Detected but below the RL/PQL; therefore, result is an estimated concentration .
24-C	Results were evaluated to the MDL (DL), concentrations >= to the MDL (DL) but < RL (LOQ), if found, are qualified with a "J" flag.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Dear Ms. Sprister,

Enclosed are analytical results for one aqueous sample ID 1205196-01 submitted to Zymax on October 18, 2012. The data were obtained from 8270M GC/MS SIM analysis on the extract sample.

The project was performed at Zymax forensics as Laboratory No. 42820.

Please call us at 760-781-3338 or email me at Shantan@zymaxusa.com if you have any questions regarding the analytical results.

Sincerely,

RE: Former Unocal Avila Terminal

Work Order: 1205238

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 17-Oct-12 12:55 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Meredith Sprister

Project Manager

Notes and Definitions

QR-04	The RPD exceeded the QC control limits.
J	Detected but below the RL/PQL; therefore, result is an estimated concentration .
24-C	Results were evaluated to the MDL (DL), concentrations >= to the MDL (DL) but < RL (LOQ), if found, are qualified with a "J" flag.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Dear Ms. Sprister,

Enclosed are analytical results for one aqueous sample ID 1205238-01 submitted to Zymax on October 18, 2012. The data were obtained from 8270M GC/MS SIM analysis on the extract sample.

The project was performed at Zymax forensics as Laboratory No. 42824.

Please call us at 760-781-3338 or email me at Shantan@zymaxusa.com if you have any questions regarding the analytical results.

Sincerely,

Shan-Tan Lu, Ph.D

RE: Former Unocal Avila Terminal

Work Order: 1205597

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 07-Nov-12 15:00 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Roy Diaz

Notes and Definitions

J	Detected but below the RL/PQL; therefore, result is an estimated concentration .
D-06	The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

RE: Former Unocal Avila Terminal

Work Order: 1205635

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 08-Nov-12 16:15 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Roy Diaz

Project Manager

RE: Former Unocal Avila Terminal

Work Order: 1205657

Dear Client:

Enclosed is an analytical report for the above referenced project. The samples included in this report were received on 09-Nov-12 15:42 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Meredith Sprister

Project Manager

Notes and Definitions

R-05	The sample was diluted due to the presence of high levels of non-target analytes resulting in elevated reporting limits.
QR-04	The RPD exceeded the QC control limits.
QM-08	The spike recovery was outside acceptance limits for the MS and/or MSD. The QC Batch was accepted based on LCS/LCSD percent recoveries and RPD values.
J	Detected but below the RL/PQL; therefore, result is an estimated concentration .
D-06	The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
D-03	The result for this hydrocarbon is elevated due to the presence of single analyte peak(s) in the quantitation range.
CCFL	The CCV for this analyte failed low. Results for this analyte may be biased low.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

2S12 CLIFF SPRING MONITORING FORMS

Cliff Spring Monitoring and Sampling Form
Former Unocal Avila Terminal, Avila Beach, California

Date / Time: 7-20-12 / 0700
Monitor Names: Louis Cappel and Pam Landle
Weather Conditions: Clear and Calm

Location ID	Sample Time	Sample ID	Estimated Discharge (gpm)[1]	Observations[2]
A	—	—	0.02	No Hydrocarbon odor or sheen. 15'x15' wet area on cliff face. Ponded water @ toe of cliff. Vegetation.
B			—	No hydrocarbon odor or sheen. 3'x4' moist area on cliff face. Vegetation.
C			0.01	No hydrocarbon odor or sheen. 12'x8' wet area on cliff face. Ponded water at toe of slope. Vegetation.
D			—	No hydrocarbon odor or sheen. DRY.
E			0.01	No hydrocarbon odor or sheen. 8'x10' wet area on cliff face. Ponded water at toe of cliff. Vegetation.
F			—	No hydrocarbon odor or sheen. Covered by rock fall.
G			—	No hydrocarbon odor or sheen, Dry.
H			—	No hydrocarbon odor or sheen. Dry.

Notes:
1 - Visual flow estimation, quantified where possible by filling a container of known volume over a period of time
2 - Including rock/soil discoloration, vegetation patterns and odor/sheen if applicable

A	NA	NA	≈0.05	Approximately 10 drip locations (4 fast, 6 slow) small ponded water area at base ≈ 10'×4' and 6'×10' wet areas, w/vegetation. No odor or sheen observed
B	NA	NA	No measurable flow	Slightly damp at location, ≈ 2'×6' area w/minimal vegetation, No visible drip locations, No odor or sheen observed
C	NA	NA	≈0.02	Approximately 6 drip locations (2 fast, 4 slow) small ponded water area at base, vegetation at location, ≈ 7'×4' wet area, No odor or sheen observed
D	NA	NA	No measurable flow	Location is DRY, no visible discharge in area, No odor or sheen observed
E	NA	NA	No measurable flow	Slightly damp at location ≈ 6'×8' area w/tall vegetation, no visible drips, No odor or sheen observed
F	NA	NA	NA	Location covered by rock fall, unable to observe spring area
G	NA	NA	No measurable flow	Location is DRY, no visible discharge in area, mostly covered by rock, No odor or sheen observed
H	NA	NA	No measurable flow	Location is DRY, some vegetation but no visible discharge, No odor or sheen observed

Notes:
1 - Visual flow estimation, quantified where possible by filling a container of known volume over a period of time
2 - Including rock/soil discoloration, vegetation patterns and odor/sheen if applicable

Date: 9/21/12, 0800
Sampling Personel: Cody Montoya / Paul Lavelle
Weather Conditions: Cool partly overcast

Location ID	Sample Time	Sample ID	Estimated Discharge (gpm)[1]	Observations[2]
A	NA	NA	≈0.10	Approximately 20' x 20' wet area ≈ 19 drip locations (15 fast, 4 slow); ponded water at base; no visible sheen or odor, vegetation/algae
B	NA	NA	No measurable flow	4 seperate Damp locations with location B ≈ 8' x 8' damp areas; some vegetation; no visible drips
C	NA	NA	≈0.05	Approximately 18' x 10' wet area; ≈ 9 drip locations (3 fast, 6 slow); abundant vegetation and algae; ponded water at base of cliff; slight sulfur odor; no visible sheen
D	—	—	—	Unable to access; low tide of 2.54'
E	NA	NA	No measurable flow	Approximately 15' x 10' damp/wet area; no visible drips but ponded water at base; no visible sheen or odor; abundant vegetation/algae
F	—	—	—	location covered by rock fall; unable to observe
G	—	—	—	location covered by rockfall; unable to observe
H	—	—	—	location covered by rockfall; unable to observe

Date / Time: 10/26/12 1500
Monitor Names: Harleigh Overton, Cody Montoya
Weather Conditions: Sunny, calm

Location ID	Sample Time	Sample ID	Estimated Discharge (gpm)[1]	Observations[2]
A	NA	NA	NA	5'x5' wet area with 5 drips (1 fast and 4 slow), abundant algae growth and grass vegitation, no sheen or odor. 4'x 12' wet area 2 fast / 5 slow drips, algae and grass vegitation, slight Sulfur like odor.
B	NA	NA	NA	~~Location is damp~~ (2'x6' and 3x4) wet no drips, some vegitation growing on wet/damp areas, no sheen or odor Damp
C	NA	NA	NA	Approximately 5 drip locations (2 fast, 3 slow), 4'x8' wet area, small pond at base of location (≈ 0.5'x2'), abundant algae and Vegitation. No odor or sheen observed
D	Na	Na	Na	Location is dry, no visable discharge area, no odor, no vegitation.
E	NA	NA	NA	6'x8' wet area, no drips, water ponded at bottom (0.5'x1'), Tall vegitation, abundant algae growth, no sheen or odor.
F	NA	NA	NA	Location covered by rock fall, unable to access.
G	NA	NA	NA	Location mostly covered by rock no observed discharge, Vegitation (grass/iceplant) at location. Location is Dry
H	NA	NA	NA	Location is Dry, yellow sulfur like deposits at location, some grass vegitation.
