RE: Return of Approved Rulemaking Materials
OAL File No. 2014-0325-01S

OAL hereby returns this file your agency submitted for our review (OAL File No. 2014-0325-01S regarding Lower Salinas River & Reclamation Canal Basin Nutrient TMDLS).

Enclosures If this is an approved file, it contains a copy of the regulation(s) stamped “ENDORSED APPROVED” by the Office of Administrative Law and “ENDORSED FILED” by the Secretary of State. The effective date of an approved regulation is specified on the Form 400 (see item B.5). Beginning January 1, 2013, unless an exemption applies, Government Code section 11343.4 states the effective date of an approved regulation is determined by the date the regulation is filed with the Secretary of State (see the date the Form 400 was stamped “ENDORSED FILED” by the Secretary of State) as follows:

1. January 1 if the regulation or order of repeal is filed on September 1 to November 30, inclusive.
2. April 1 if the regulation or order of repeal is filed on December 1 to February 29, inclusive.
3. July 1 if the regulation or order of repeal is filed on March 1 to May 31, inclusive.
4. October 1 if the regulation or order of repeal is filed on June 1 to August 31, inclusive.

If an exemption applies concerning the effective date of the regulation approved in this file, then it will be specified on the Form 400. The Notice of Approval that OAL sends to the state agency will contain the effective date of the regulation. The history note that will appear at the end of the regulation section in the California Code of Regulations will also include the regulation’s effective date. Additionally, the effective date of the regulation will be noted on OAL’s Web site once OAL posts the Internet Web site link to the full text of the regulation that is received from the state agency. (Gov. Code, secs. 11343 and 11344.)

Please note this new requirement: Unless an exemption applies, Government Code section 11343 now requires:

1. Section 11343(c)(1): Within 15 days of OAL filing a state agency’s regulation with the Secretary of State, the state agency is required to post the regulation on its Internet Web site in an easily marked and identifiable location. The state agency shall keep the regulation posted on its Internet Web site for at least six months from the date the regulation is filed with the Secretary of State.

2. Section 11343(c)(2): Within five (5) days of posting its regulation on its Internet Web site, the state agency shall send to OAL the Internet Web site link of each regulation that the agency posts on its Internet Web site pursuant to section 11343(c)(1).
OAL has established an email address for state agencies to send the Internet Web site link to for each regulation the agency posts. Please send the Internet Web site link for each regulation posted to OAL at postedregslink@oal.ca.gov.

**NOTE ABOUT EXEMPTIONS.** Posting and linking requirements do not apply to emergency regulations; regulations adopted by FPPC or Conflict of Interest regulations approved by FPPC; and regulations not subject to OAL/APA review. However, an exempt agency may choose to comply with these requirements, and OAL will post the information accordingly.

**DO NOT DISCARD OR DESTROY THIS FILE**
Due to its legal significance, you are required by law to preserve this rulemaking record. Government Code section 11347.3(d) requires that this record be available to the public and to the courts for possible later review. Government Code section 11347.3(e) further provides that “…no item contained in the file shall be removed, altered, or destroyed or otherwise disposed of.” See also the State Records Management Act (Government Code section 14740 et seq.) and the State Administrative Manual (SAM) section 1600 et seq.) regarding retention of your records.

If you decide not to keep the rulemaking records at your agency/office or at the State Records Center, you may transmit it to the State Archives with instructions that the Secretary of State shall not remove, alter, or destroy or otherwise dispose of any item contained in the file. See Government Code section 11347.3(f).

Office of Administrative Law
CONCISE SUMMARY OF REGULATORY PROVISIONS

TITLE 23. Waters
Division 4. Regional Water Quality Control Boards
Chapter 1. Water Quality Control Plans, Policies, and Guidelines
Article 3. Central Coast Region

The following section 3929.10 is to be added to Title 23 of the California Code of Regulations:

Resolution No. R3-2013-0008 establishes the Lower Salinas River and Reclamation Canal Basin and the Moro Cojo Slough Subwatershed Total Maximum Daily Loads (TMDLs) and Implementation Plan for nitrate, nitrogen, unionized ammonia and orthophosphate. The TMDLs address nutrient-related impairments of the lower Salinas Valley, which includes the following waterbodies: Alisal Creek, Alisal Slough, Blanco Drain, Chualar Creek, Esperanza Creek, Espinosa Slough, Gabilan Creek, Merrit Ditch, Moro Cojo Slough, Natividad Creek, Old Salinas River, Quail Creek, the Reclamation Canal, the Lower Salinas River (downstream of Gonzalez), Salinas River Lagoon (north), Santa Rita Creek, and Tembladero Slough.

Current nutrient and nutrient-related impairments in lower Salinas Valley waters are impairing a range of current or potential designated beneficial uses including aquatic habitat (COLD, WARM, SPWN), drinking water supply (MUN), groundwater recharge (GWR), water contact recreation (REC-1), and agricultural supply (AGR). The TMDLs set numeric targets for nitrate, nitrogen, unionized ammonia, orthophosphate, dissolved oxygen, chlorophyll a, and microcystins consistent with the Basin Plan narrative and numeric water quality objectives protective of the aforementioned beneficial uses.

Responsibility for achieving waste load allocations and load allocations falls upon several entities as described in the Basin Plan amendment. An implicit margin of safety is utilized in the TMDLs to account for uncertainties. The Water Board is relying on existing regulatory measures (i.e., the Agricultural Order and storm water permits) to ensure implementation actions are carried out by implementing parties. Interim and final implementation milestones of 12, 20, and 30 years are established for showing progress and achieving the TMDLs. The Water Board will track progress towards achieving the TMDLs through review of implementation actions and monitoring conducted by the implementing parties. Water Board staff will conduct triennial reviews of implementation actions and monitoring results.
