Kenneth A. Harris, Jr.
Executive Officer
California Regional Water Quality Control Board
Central Coast Region
895 Aerovista Place, Suite 101
San Luis Obispo, California 93401-7906

Dear Mr. Harris:

Thank you for submitting the complete Central Coast Regional Water Quality Control Board (Regional Board) Basin Plan Amendment (BPA) for pesticides Total Maximum Daily Loads (TMDLs) in the Santa Maria River watershed on November 4, 2014, for approval by the U.S. Environmental Protection Agency (EPA). We find that all the federal required elements are adequately addressed, and we approve the pesticides TMDLs pursuant to CWA section 303(d)(2). The TMDLs, upon complete implementation, will result in attainment of the applicable water quality standards in the Santa Maria River watershed.

The Regional Board, State Water Resources Control Board (State Board), and Office of Administrative Law (OAL) took action on the BPA on the following dates:

- Regional Board adoption on January 30, 2014 (Resolution No. R3-2014-0009)
- State Board adoption on July 2, 2014 (Resolution No. 2014-0033)
- OAL approval on October 29, 2014 (2014-0017-02S)
- Regional Board signed submittal letter on November 4, 2014, to EPA requesting approval of the TMDLs

The State has provided adequate opportunities for public review and comment on the TMDLs and demonstrated how public comments were considered in the final TMDL. By including TMDLs for waterbodies that are not currently impaired, as well as for those that are impaired, the TMDLs appropriately used an antidegradation approach to develop numeric targets and load and wasteload allocations to protect beneficial uses in the waters identified. The TMDLs appropriately considered seasonal variation and critical conditions, and provided an adequate margin of safety.

The TMDL submittal contains the State’s implementation strategy and schedule. Implementation of the TMDLs is a critical next step to realize improvements in water quality in the watershed. While EPA is not taking action on the implementation strategy specifically, as we are not required by section 303(d) or its implementing regulations to approve or disapprove implementation plans submitted with TMDLs, we support the State’s proposed implementation approaches to protect and restore water quality, including use of regulatory authorities. We encourage the Regional Board to continue its work with stakeholders to implement these strategies consistent with California’s Nonpoint Source Management Plan as approved by EPA under the Clean Water Act Section 319, when appropriate. We remain available to
provide support where possible to assist both the regulated community and the Regional Board in fostering ongoing watershed stewardship to achieve the TMDLs.

If you have any questions concerning this approval, please call me at (415) 972-3438, or Janet Hashimoto at (415) 972-3452.

Sincerely,

Michael Montgomery
Acting Director, Water Division
