

## Central Valley Regional Water Quality Control Board

30 September 2016

John Hardin  
Sacramento Yacht Club  
3365 South River Road  
Sacramento, CA 95691

CERTIFIED MAIL  
91 7199 9991 7035 8417 7389

***CLEAN WATER ACT SECTION 401 TECHNICALLY CONDITIONED WATER QUALITY CERTIFICATION; SACRAMENTO YACHT CLUB, SACRAMENTO YACHT CLUB MAINTENANCE DREDGING PROJECT (WDID#5A57CR00144), YOLO COUNTY***

This Order responds to the 5 April 2016 application submitted by the Sacramento Yacht Club (Applicant) for the Water Quality Certification of the Sacramento Yacht Club Maintenance Dredging Project (Project), permanently impacting 2.8 acres of waters of the United States.

This Order serves as certification of the United States Army Corps of Engineers' Nationwide Permit #35 (SPK-2010-00218) under Section 401 of the Clean Water Act, and a Waste Discharge Requirement under the Porter-Cologne Water Quality Control Act and State Water Board Order 2003-0017-DWQ.

### **WATER QUALITY CERTIFICATION STANDARD CONDITIONS:**

- 1. This Water Quality Certification (Certification) is not valid until coverage under Section 10 of the Rivers and Harbors Act is obtained. If the Project, including the area of impact (as described) is modified through this process, this Certification will not be valid until amended by the Central Valley Water Board.**
2. This Order serves as a Water Quality Certification (Certification) action that is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Section 13330 of the California Water Code and Section 3867 of the California Code of Regulations.
3. This Certification action is not intended and shall not be construed to apply to any discharge from any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license unless the pertinent Certification application was filed pursuant to Section 3855(b) of the California Code of Regulations, and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

4. The validity of any non-denial Certification action shall be conditioned upon total payment of the full fee required under Section 3860(c) of the California Code of Regulations.
5. This Certification is no longer valid if the Project (as described) is modified, or coverage under Section 10 of the Rivers and Harbors Act has expired.
6. All reports, notices, or other documents required by this Certification or requested by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) shall be signed by a person described below or by a duly authorized representative of that person.
  - (a) For a corporation: by a responsible corporate officer such as: 1) a president, secretary, treasurer, or vice president of the corporation in charge of a principal business function; 2) any other person who performs similar policy or decision-making functions for the corporation; or 3) the manager of one or more manufacturing, production, or operating facilities if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.
  - (b) For a partnership or sole proprietorship: by a general partner or the proprietor.
  - (c) For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official.
7. Any person signing a document under Standard Condition number 5 shall make the following certification:

“I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.”

#### **TECHNICAL CERTIFICATION CONDITIONS:**

In addition to the above standard conditions, the Applicant shall satisfy the following:

1. The Applicant shall notify the Central Valley Water Board in writing seven (7) days in advance of the start of any work within waters of the United States.
2. Except for activities permitted by the United States Army Corps of Engineers under Section 10 of the Rivers and Harbors Act, soil, silt, or other organic materials shall not be placed where such materials could pass into surface water or surface water drainage courses.
3. The Applicant shall maintain a copy of this Certification and supporting documentation (Project Information Sheet) at the Project site during construction for review by site

personnel and agencies. All personnel (employees, contractors, and subcontractors) performing work on the proposed Project shall be adequately informed and trained regarding the conditions of this Certification.

4. The Applicant shall perform surface water sampling:
  - a) when performing any in-water work;
  - b) in the event that Project activities result in any materials reaching surface waters; or
  - c) when any activities result in the creation of a visible plume in surface waters.

The sampling requirements in Table 1 shall be conducted upstream out of the influence of the Project, and 300 feet downstream of the work area. The sampling frequency may be modified for certain projects with written approval from Central Valley Water Board staff.

**Table 1: Monitoring Requirements**

Parameter	Unit	Type of Sample	Minimum Sampling Frequency	Required Analytical Test Method
Turbidity	NTU	Grab <sup>(1)</sup>	Every 4 hours during in-water work	(2, 4)
Settleable Material	mL/L	Grab <sup>(1)</sup>	Every 4 hours during in-water work	(2)
Visible construction related pollutants <sup>(3)</sup>	Observations	Visual Inspections	Continuous throughout the construction period	—

<sup>(1)</sup> Grab samples shall not be collected at the same time each day to get a complete representation of variations in the receiving water.  
<sup>(2)</sup> Pollutants shall be analyzed using the analytical methods described in 40 Code of Federal Regulations Part 136; where no methods are specified for a given pollutant, the method shall be approved by Central Valley Water Board staff.  
<sup>(3)</sup> Visible construction-related pollutants include oil, grease, foam, fuel, petroleum products, and construction-related, excavated, organic or earthen materials.  
<sup>(4)</sup> A hand-held field meter may be used, provided the meter utilizes a USEPA-approved algorithm/method and is calibrated and maintained in accordance with the manufacturer's instructions. A calibration and maintenance log for each meter used for monitoring shall be maintained onsite.

Surface water sampling shall occur at mid-depth. A surface water monitoring report shall be submitted within two weeks of initiation of in-water construction, and every two weeks thereafter. In reporting the sampling data, the Applicant shall arrange the data in tabular form so that the sampling locations, date, constituents, and concentrations are readily discernible. The data shall be summarized in such a manner to illustrate clearly whether the Project complies with Certification requirements. The report shall include surface water sampling results, visual observations, and identification of the turbidity increase in the receiving water applicable to the natural turbidity conditions specified in the turbidity criteria below.

If no sampling is required, the Applicant shall submit a written statement stating, "No sampling was required" within two weeks of initiation of in-water construction, and every two weeks thereafter.

5. The Central Valley Water Board adopted a *Water Quality Control Plan for the Sacramento River and San Joaquin River Basins*, Fourth Edition, revised April 2016 (Basin Plan) that designates beneficial uses, establishes water quality objectives, and contains implementation programs and policies to achieve those objectives for all waters addressed through the plan. Turbidity and settleable matter limits are based on water quality objectives contained in the Basin Plan and are part of this Certification as follows:

- a) Activities shall not cause turbidity increases in surface water to exceed:
  - i. where natural turbidity is less than 1 Nephelometric Turbidity Units (NTUs), controllable factors shall not cause downstream turbidity to exceed 2 NTUs;
  - ii. where natural turbidity is between 1 and 5 NTUs, increases shall not exceed 1 NTU;
  - iii. where natural turbidity is between 5 and 50 NTUs, increases shall not exceed 20 percent;
  - iv. where natural turbidity is between 50 and 100 NTUs, increases shall not exceed 10 NTUs; and
  - v. where natural turbidity is greater than 100 NTUs, increases shall not exceed 10 percent.

Appropriate averaging periods may be applied, provided that beneficial uses will be fully protected.

Exceptions to the above limits will be considered when a dredging operation can cause an increase in turbidity. In those cases, an allowable zone of dilution within which turbidity in excess of the limits may be tolerated will be defined for the operation and prescribed in a discharge permit.

For Delta waters, the general objectives for turbidity apply subject to the following: except for periods of storm runoff, the turbidity of Delta waters shall not exceed 50 NTUs in the waters of the Central Delta and 150 NTUs in other Delta waters.

- b) Activities shall not cause settleable matter to exceed 0.1 mL/L in surface waters as measured in surface waters within 300 feet downstream of the Project.
6. The Applicant shall notify the Central Valley Water Board immediately if the above criteria for turbidity, settleable matter, or other water quality objectives are exceeded.
  7. The Applicant shall adequately participate in the Delta Regional Monitoring Program (Delta RMP) through in-kind services or financial contributions to support the monitoring and reporting efforts of the Delta RMP. Confirmation of participation in the Delta RMP must be submitted to the Central Valley Water Board by 30 December 2016.
  8. In-water work shall occur during periods of no precipitation.

9. Activities shall not cause visible oil, grease, or foam in the receiving water.
10. Refueling of equipment within the floodplain or within 300 feet of the waterway is prohibited. If critical equipment must be refueled within 300 feet of the waterway, spill prevention and countermeasures must be implemented to avoid spills. Refueling areas shall be provided with secondary containment including drip pans and/or placement of absorbent material. No hazardous materials, pesticides, fuels, lubricants, oils, hydraulic fluids, or other construction-related potentially hazardous substances should be stored within a floodplain or within 300 feet of a waterway. The Applicant must perform frequent inspections of construction equipment prior to utilizing it near surface waters to ensure leaks from the equipment are not occurring and are not a threat to water quality.
11. The Applicant shall develop and maintain onsite a project-specific Spill Prevention, Containment and Cleanup Plan outlining the practices to prevent, minimize, and/or clean up potential spills during construction of the Project. The Plan must detail the Project elements, construction equipment types and location, access and staging and construction sequence.
12. Raw cement, concrete (or washing thereof), asphalt, drilling fluids, lubricants, paints, coating material, oil, petroleum products, or any other substances which could be hazardous to fish and wildlife resulting from or disturbed by project-related activities, shall be prevented from contaminating the soil and/or entering waters of the United States.
13. The discharge of petroleum products, any construction materials, hazardous materials, pesticides, fuels, lubricants, oils, hydraulic fluids, raw cement, concrete, asphalt, paint, coating material, drilling fluids, or other construction-related potentially hazardous substances to surface water and/or soil is prohibited. In the event of a prohibited discharge, the Applicant shall notify the Central Valley Water Board Contact within 24-hours of the discharge.
14. Silt fencing, straw wattles, or other effective management practices must be used along the construction zone to minimize soil or sediment along the embankments from migrating into the waters of the United States through the entire duration of the Project.
15. The use of netting material (e.g., monofilament-based erosion blankets) that could trap aquatic dependent wildlife is prohibited within the Project area.
16. All areas disturbed by Project activities shall be protected from washout and erosion.
17. All temporarily affected areas shall be restored to pre-construction contours and conditions upon completion of construction activities.
18. All materials resulting from the Project shall be removed from the site and disposed of properly.
19. This Certification does not allow permanent water diversion of flow from the receiving water. This Certification is invalid if any water is permanently diverted as a part of the project.

20. The Applicant shall apply for a name change or amendment to this Certification should any of the following occur: a) a change in the ownership of all or any portion of the Project; b) any change in the Project description; c) any change involving discharge amounts, temporary impacts, or permanent impacts; or d) amendments, modifications, revisions, extensions, or changes to the United States Army Corps of Engineers' Nationwide Permit #35, the United States Fish and Wildlife Service decision document, the National Marine Fisheries Service decision document, or the California Department of Fish and Wildlife Streambed Alteration Agreement.
21. The Applicant shall comply with all California Department of Fish and Wildlife requirements, including those requirements described in Lake or Streambed Alteration Agreement No. 1600-2016-0132-R3.
22. The Applicant shall comply with all United States Fish and Wildlife requirements, including those requirements described in the Biological Opinion (08FTBT00-2016-0161).
23. The Applicant shall comply with all National Marine Fisheries Service requirements, including those requirements described in the Biological Opinion (WCR-2016-5265).
24. The Conditions in this Certification are based on the information in the attached "Project Information Sheet" and the application package. If the actual project, as described in the attached Project Information Sheet and application package, is modified or changed, this Certification is no longer valid until amended by the Central Valley Water Board.
25. In the event of any violation or threatened violation of the conditions of this Certification, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under state and federal law. The applicability of any state law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to ensure compliance with this Certification.
  - (a) If the Applicant or a duly authorized representative of the Project fails or refuses to furnish technical or monitoring reports, as required under this Certification, or falsifies any information provided in the monitoring reports, the applicant is subject to civil liability, for each day of violation, and/or criminal liability.
  - (b) In response to a suspected violation of any condition of this Certification, the Central Valley Water Board may require the Applicant to furnish, under penalty of perjury, any technical or monitoring reports the Central Valley Water Board deems appropriate, provided that the burden, including cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.
  - (c) The Applicant shall allow the staff of the Central Valley Water Board, or an authorized representative(s), upon the presentation of credentials and other documents, as may be required by law, to enter the Project premises for inspection,

including taking photographs and securing copies of project-related records, for the purpose of assuring compliance with this Certification and determining the ecological success of the Project.

**NOTIFICATIONS AND REPORTS:**

26. The Applicant shall provide a Notice of Completion (NOC) no later than 30 days after the Project completion. The NOC shall demonstrate that the Project has been carried out in accordance with the Project description in the Certification and in any approved amendments. The NOC shall include a map of the Project location(s), including final boundaries of any on-site restoration area(s), if appropriate, and representative pre and post construction photographs. Each photograph shall include a descriptive title, date taken, photographic site, and photographic orientation.
27. The Applicant shall submit all notifications, submissions, materials, data, correspondence, and reports in a searchable Portable Document Format (PDF). Documents less than 50 MB must be emailed to: [centralvalleysacramento@waterboards.ca.gov](mailto:centralvalleysacramento@waterboards.ca.gov). In the subject line of the email, include the Central Valley Water Board Contact, Project name, and WDID number as shown in the subject line above. Documents that are 50 MB or larger must be transferred to a disk and mailed to the Central Valley Water Board Contact.

**CALIFORNIA ENVIRONMENTAL QUALITY ACT:**

The Central Valley Water Board has determined that this project meets the Categorical Exemption, under Section 15304 of the California Code of Regulations, which exempts minor public or private alterations in the condition of land, water, and/or vegetation and includes maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.

## **WATER QUALITY CERTIFICATION:**

I hereby issue an Order certifying that any discharge from the Sacramento Yacht Club, Sacramento Yacht Club Maintenance Dredging Project (WDID#5A57CR00144) will comply with the applicable provisions of Section 301 ("Effluent Limitations"), Section 302 ("Water Quality Related Effluent Limitations"), Section 303 ("Water Quality Standards and Implementation Plans"), Section 306 ("National Standards of Performance"), and Section 307 ("Toxic and Pretreatment Effluent Standards") of the Clean Water Act. Through this Order, this discharge is also regulated under State Water Resources Control Board Water Quality Order No. 2003-0017 DWQ "Statewide General Waste Discharge Requirements For Dredged Or Fill Discharges That Have Received State Water Quality Certification (General WDRs)".

Except insofar as may be modified by any preceding conditions, all Certification actions are contingent on: a) the discharge being limited and all proposed mitigation being completed in compliance with the conditions of this Certification, the Sacramento Yacht Club's application package, and the attached Project Information Sheet; and b) compliance with all applicable requirements of the *Water Quality Control Plan for the Sacramento River and San Joaquin River Basins*, Fourth Edition, revised April 2016.

Any person aggrieved by this action may petition the State Water Resources Control Board to review the action in accordance with California Water Code Section 13320 and California Code of Regulations, Title 23, Section 2050 and following. The State Water Resources Control Board must receive the petition by 5:00 p.m., 30 days after the date of this action, except that if the thirtieth day following the date of this action falls on a Saturday, Sunday, or state holiday, the petition must be received by the State Water Resources Control Board by 5:00 p.m. on the next business day. Copies of the law and regulations applicable to filing petitions may be found on the Internet at: [http://www.waterboards.ca.gov/public\\_notices/petitions/water\\_quality](http://www.waterboards.ca.gov/public_notices/petitions/water_quality) or will be provided upon request.

## PROJECT INFORMATION SHEET

**Application Date:** 5 April 2016

**Applicant:** John Hardin  
Sacramento Yacht Club  
3365 South River Road  
Sacramento, CA 95681

**Applicant Representative:** Kent Baker  
Baker-Williams Engineering  
6020 Rutland Drive, #19  
Carmichael, CA 95608

**Project Name:** Sacramento Yacht Club Maintenance Dredging Project

**Application Number:** WDID#5A57CR00144

**Date on Public Notice:** 8 April 2016

**Date Application Deemed Complete:** 2 May 2016

**Type of Project:** Boating and Navigation

**Approved Months of Project Implementation:** 1 August through 30 November annually, as authorized by the National Marine Fisheries Service and United States Fish and Wildlife Service

**Project Location:** Township 8 North, Range 4 East, MDB&M.  
Latitude: 38°32'12" N and Longitude: 121°31'04" W

**County:** Yolo County

**Receiving Water(s) (hydrologic unit):** Sacramento River, Sacramento Hydrologic Basin, Sacramento Delta Hydrologic Unit #510.00

**Water Body Type:** Streambed

**Designated Beneficial Uses:** The *Water Quality Control Plan for the Sacramento River and San Joaquin River Basins*, Fourth Edition, revised April 2016 (Basin Plan) has designated beneficial uses for surface and ground waters within the region. Beneficial uses that could be impacted by the project include, but are not limited to: Municipal and Domestic Water Supply (MUN); Agricultural Supply (AGR); Industrial Supply (IND); Hydropower Generation (POW); Groundwater Recharge (GWR); Water Contact Recreation (REC-1); Non-Contact Water Recreation (REC-2); Warm Freshwater Habitat (WARM); Cold Freshwater Habitat (COLD); Preservation of Biological Habitats of Special Significance (BIOL); Rare, Threatened, or Endangered Species (RARE); Migration of Aquatic Organisms (MIGR); Spawning,

Reproduction, and/or Early Development (SPWN); and Wildlife Habitat (WILD). A comprehensive and specific list of the beneficial uses applicable for the project area can be found at [http://www.waterboards.ca.gov/centralvalley/water\\_issues/basin\\_plans/index.shtml](http://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/index.shtml).

**303(d) List of Water Quality Limited Segments:** The Sacramento River is the receiving water for the Sacramento Yacht Club Maintenance Dredging Project. The Sacramento River in the Delta Waterways (northern portion) is on the 303(d) list for chlordane, chlorpyrifos, DDT, diazinon, dieldrin, group A pesticides, invasive species, mercury, and PCBs. The most recent list of approved water quality limited segments is found at:  
[http://www.waterboards.ca.gov/water\\_issues/programs/tmdl/integrated2010.shtml](http://www.waterboards.ca.gov/water_issues/programs/tmdl/integrated2010.shtml).

**Project Description:** The Sacramento Yacht Club Maintenance Dredging Project (Project) is located at the Sacramento Yacht Club in Yolo County. The Project consists of regular maintenance dredging activities at the Sacramento Yacht Club marina. The entire marina is 4.5 acres and is located on South River Road in West Sacramento. Project activities include dredging river sediment to a depth of approximately -3.0 feet mean lower low water (MLLW), which is the average of the lowest observed water height within a 24 hour tidal day, in the dock areas and -5.0 feet MLLW for the channel, as authorized by Nationwide Permit #35 (SPK-2010-00218) issued on 6 August 2016 from the United States Army Corps of Engineers. Dredging spoils will be placed at 650 feet on the landside of the levee adjacent to the Project area. No return water from the spoils will drain into waters of the United States.

This Certification covers the in-water work for the Project. The disposal of dredged materials to land is covered under *Waiver of Reports of Waste Discharge and Waste Discharge Requirements for Specific Types of Discharge within the Central Valley Region, Resolution R5-2013-0145*. The Project is assigned R5-2013-0145-017 for the discharge to land.

The Delta waterways are listed pursuant to Clean Water Act (CWA) section 303(d) as impaired for chlordane, chlorpyrifos, DDT, diazinon, dieldrin, group A pesticides, invasive species, mercury, and PCBs. The Delta Regional Monitoring Program (Delta RMP) was created to coordinate the Delta-wide monitoring, reporting, and assessment of water quality necessary for understanding regional water quality conditions and trends. Currently the Delta RMP Monitoring Design is focusing on pesticides and toxicity, pathogens, nutrients, and mercury, and is monitoring several of these constituents at various locations throughout the Delta.

Project activities will change the geometry of the channel and water residence time, which has the potential to affect the methylation of mercury, dissolved oxygen levels, and exacerbate the effects of nutrient concentrations which may lead to increased production of blue-green algae, macrophytes (water hyacinth and *Egeria densa*), shifts in algal species composition, and taste and odor problems in drinking water. Dredging activities also have the potential to impact chlorpyrifos, DDT, diazinon, and other pesticide levels by disturbing sediment, which may mobilize these chemicals. Because dredging activities will impact these long-term Delta water quality concerns, the Applicant is required by this Certification to adequately participate in the Delta RMP through in-kind services or financial contributions to support the monitoring and reporting efforts of the RMP. The Delta RMP Steering Committee will determine what

constitutes adequate participation in the Delta RMP. Confirmation of participation in the Delta RMP must be submitted to the Central Valley Water Board by 30 December 2016.

No dewatering will occur within the Project area. No wet concrete will be placed into waters of the United States. No materials will be placed into waters of the United States and no more than 5,000 cubic yards of river sediment will be dredged from approximately 2.8 acres of waters of the United States over a one year period. The Project will permanently impact 2.8 acres of waters of the United States.

**Preliminary Water Quality Concerns:** Construction activities may impact surface waters with increased turbidity and settleable matter.

**Proposed Mitigation to Address Concerns:** The Applicant will implement Best Management Practices to control sedimentation and erosion. The Applicant will conduct turbidity and settleable matter testing during in-water work, stopping work if Basin Plan criteria are exceeded or observations indicate an exceedance of a water quality objective.

All temporary affected areas will be restored to pre-construction contours and conditions upon completion of construction activities to provide 1:1 mitigation for temporary impacts.

**Excavation/Fill Area:** No materials will be excavated from waters of the United States.

No materials will be placed into waters of the United States.

**Dredge Volume:** Approximately 5,000 cubic yards of native soil will be dredged from 2.8 acres of waters of the United States annually for a total of 25,000 cubic yards of native soil dredged from 2016 through 2021.

**California Integrated Water Quality System Impact Data:** The Project will permanently impact 2.8 acres of stream bed habitat from dredging activities.

**Table 2: Impacts from Dredging Activities**

Aquatic Resource Type	Temporary			Permanent					
				Physical Loss of Area			Degradation of Ecological Condition Only		
	Acres	Cubic-yards	Linear-feet	Acres	Cubic-yards	Linear-feet	Acres	Cubic-yards	Linear-feet
Stream Channel	-	-	-	2.8	25,000	-	-	-	-

**United States Army Corps of Engineers File Number:** SPK-2010-00218

**United States Army Corps of Engineers Permit Type:** Nationwide Permit #35

**California Department of Fish and Wildlife Lake or Streambed Alteration Agreement:**  
 1600-2016-0132-R3

**Possible Listed Species:** North American green sturgeon, Central Valley steelhead, Winter-run Chinook salmon, and Spring-run Chinook salmon.

**Status of CEQA Compliance:** The Central Valley Water Board has determined that this project meets the Categorical Exemption, under Section 15304 of the California Code of Regulations, which exempts minor public or private alterations in the condition of land, water, and/or vegetation and includes maintenance dredging where the spoil is deposited in a spoil area authorized by all applicable state and federal regulatory agencies.

The Central Valley Water Board will file a Notice of Exemption with the State Clearinghouse within five (5) days of the date of this Certification.

**Compensatory Mitigation:** The Central Valley Water Board is not requesting compensatory mitigation for the Sacramento Yacht Club Maintenance Dredging Project.

**Application Fee Provided:** Total fees of \$600.00 have been submitted to the Central Valley Water Board as required by Section 3833(b)(3)(A) and Section 2200(a)(3) of the California Code of Regulations.
