

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION**

ORDER R5-2019-0087

RESCINDING WASTE DISCHARGE REQUIREMENTS

The California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board), finds that the Central Valley Water Board adopted the following Orders which are no longer applicable for the reasons shown:

a. BIDWELL CANYON MARINA WASTEWATER TREATMENT AND DISPOSAL SYSTEM, BUTTE COUNTY

Waste Discharge Requirements (WDRs) Order 95-203, adopted by the Central Valley Water Board on 17 August 1995, prescribes requirements for the discharge from Bidwell Canyon Marina wastewater treatment and disposal system, Butte County (Facility). The Facility is comprised of a wastewater collection system, and septic tanks discharging to Sewerage Commission-Oroville Region Wastewater Treatment Plant (SCOR). The Facility does not discharge domestic wastewater to land. Therefore, it is appropriate to rescind WDRs Order 95-203.

b. BUCKEYE WATER TREATMENT PLANT, SHASTA COUNTY

Waste Discharge Requirements Order 95-006, adopted on 27 January 1995, prescribes requirements for the discharge from the City of Redding Buckeye Water Treatment Plant, Shasta County (Facility). The Facility's system is comprised of backwash and system flushing of the water treatment plant filters that discharges to a wash water recovery basin with 426,500 gallons capacity and three sludge settling basins, each with approximately 292,000 gallons capacity. The Facility is now regulated under Resolution R5-2018-0085 (Waiver) for waiver of waste discharge requirements for specific types of discharge within Central Valley Region. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 95-006.

c. BUTTE GLEN COMMUNITY COLLEGE CAMPUS, BUTTE COUNTY

Waste Discharge Requirements Order R5-2003-0143, adopted on 5 September 2003, and prescribes requirements for the discharge from Butte Community College Campus, Butte County (Facility). The Facility is comprised of a wastewater collection system, influent pump station with bar screen, package aerated digester with extended aeration, secondary clarifier and aerobic digester, two (2) stabilization ponds, two (2) primary disposal ponds; or if needed, several shallow marsh disposal ponds. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order R5-2003-0143.

d. CITY OF TURLOCK, REGIONAL WATER QUALITY CONTROL FACILITY, STANISLAUS COUNTY

Time Schedule Order R5-2014-0901 (NPDES Permit CA0078948), adopted on 22 July 2014, provides a time schedule for compliance with water quality-based effluent limitations for chlorodibromomethane and dichlorobromomethane by 31 December 2019 that were established in Waste Discharge Requirements Order R5-2010-0002 and subsequently renewed in Order R5-2015-0027-01 (NPDES Permit CA0078948). The compliance issue has been resolved and Time Schedule Order R5-2014-0901 is no longer necessary. Time Schedule Order R5-2014-0901 is rescinded, effective 31 December 2019.

e. FRENCHMAN LAKE RECREATION AREA, PLUMAS COUNTY

Waste Discharge Requirements Order 94-354, adopted on 9 December 1994, prescribes requirements for the discharge from the Frenchman Lake Recreation Area, Plumas County (Facility). The Facility consists of two campgrounds with treatment ponds, a work center with septic tank and leach field, a campground with a septic tank leach field system, and two campgrounds with vault toilets. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 94-354.

f. GENERAL WASTE DISCHARGE REQUIREMENTS/NPDES PERMIT FOR DEWATERING AND OTHER LOW THREAT DISCHARGES TO SURFACE WATERS ORDER

Waste Discharge Requirements for Dewatering and Other Low Threat Discharges to Surface Water General Order (Low Threat General Order) R5-2013-0074 (NPDES Permit CAG995001) adopted on 31 May 2013 and expired on 1 May 2018, prescribed requirements for dischargers enrolled under this Order. Waste Discharge Requirements Limited Threat Discharges to Surface Water (Limited Threat General Order) R5-2016-0076-01, adopted on 14 October 2016, provides duplicative requirements as the Low Threat General Order. Therefore, dischargers covered under the Low Threat General Order were transferred to the Limited Threat General Order, making the Low Threat General Order obsolete. Therefore, the Low Threat General Order was not renewed after 1 May 2018 and is now being rescinded.

g. HOLLAND RIVERSIDE MARINA LLC AND DELTA WATERWAYS MANAGEMENT LLC, CONTRA COSTA COUNTY

Waste Discharge Requirements (WDRs) Order 5-01-093, adopted on 27 April 2001, prescribes requirements for the discharge of wastewater from the Holland Riverside Marina (Marina). The Marina owns and operates the wastewater treatment system on land owned by Delta Waterways Management LLC. The Marina is located at 7000 Holland Tract Road, Brentwood, in Contra Costa County. Central Valley Water

Board staff determined that the facility can be regulated under the General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems, Order WQ 2014-0153-DWQ. A Notice of Applicability was issued to the dischargers on 11 September 2019, assigning water quality Order 2014-0153-DWQ-R5315 to the facility and discharge. Therefore, it is appropriate to rescind WDRs Order 5-01-93.

h. SHASTA LIVESTOCK AUCTION YARD, SHASTA COUNTY

In 1986, Waste Discharge requirements (WDR) Order No. 86-182 was adopted for Shasta Livestock Auction Yard located at 3917 Main St, Cottonwood, Shasta County. The WDRs was revised in 1996 with WDR Order No. 93-180. The facility was originally placed under the individual WDR due to an off-property discharge. Central Valley Water Board staff inspected the facility on 24 July 2018 and found that it was operating as an auction yard, which qualifies it for WDR Order No. R5-2017-0058 (Bovine General Order). Therefore, it is appropriate to rescind WDR Order No. 93-180 and instead enroll Shasta Livestock Auction Yard under the Bovine General Order.

i. SIERRA UNIFIED SCHOOL DISTRICT, SIERRA JOINT UNION HIGH SCHOOL WASTEWATER TREATMENT FACILITY, FRESNO COUNTY

Waste Discharge Requirements Order 85-230, adopted on 23 August 1985, prescribes requirements for the discharge of wastewater from the Sierra Joint Union High School Wastewater Treatment Facility (Facility) at 33220 Lodge Road near Tollhouse in Fresno County. The Facility is owned and operated by the Sierra Unified School District (Discharger). Central Valley Water Board staff determined that the Facility can be regulated under State Water Resources Control Board's Water Quality Order 2014-0153-DWQ General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems. A Notice of Applicability was issued to the Discharger on 28 August 2019, assigning General Order and Monitoring and Reporting Program 2014-0153-DWQ-R5320 to the Facility. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 85-230.

j. SUGARLOAF RESORT AND MARINA, SHASTA COUNTY

Waste Discharge Requirements Order R5-2007-0103, adopted by the Central Valley Water Board on 2 August 2007, prescribed requirements for the discharge of wastes from Sugarloaf Resort and Marina. The system is designed to treat and dispose up to 8,400 gallons of wastewater per day. However, in 2016 the Facility discontinued houseboat rentals and removed the associated wastewater collection pumps and transfer lines from the docks. There is no longer any discharge of wastewater to land from the Facility. Therefore, it is appropriate to rescind Waste Discharge Requirements Order R5-2007-0103.

k. UNITED STATES DEPARTMENT OF THE AIR FORCE, AIR FORCE REAL PROPERTY AGENCY, FORMER MCCLELLAN AIR FORCE BASE, GROUNDWATER EXTRACTION AND TREATMENT SYSTEM, SACRAMENTO COUNTY.

Waste Discharge Requirements Order R5-2014-0055 (NPDES Permit CA0081850) adopted on 28 March 2014, which prescribed requirements for the United States Department of the Air Force, Air Force Real Property Agency (Discharger), owner and operator of the Former McClellan Air Force Base, Groundwater Treatment and Extraction System (Facility) in Sacramento County. Order R5-2014-0055 authorized the discharge of treated water to Magpie Creek and Beaver Pond (wetlands area adjacent to Don Julio Creek), waters of the United States, tributary to the Sacramento River via Robla (Rio Linda) Creek and Natomas East Main Drainage Canal within the Sacramento River watershed. During 2019, the Discharger submitted information necessary to request coverage under General Order R5-2016-0076-01 for Limited Threat Discharges to Surface Water (Limited Threat General Order). The Executive Officer determined the Facility's discharge is eligible for coverage under the Limited Threat General Order and issued a Notice of Applicability (R5-2016-0076-059) on 26 September 2019. The Notice of Applicability includes effluent limitations with which the Discharger is expected to comply. Consequently, Order R5-2014-0055 is no longer necessary.

IT IS HEREBY ORDERED that the above Orders are rescinded on the date of this order unless otherwise stated above.

I, PATRICK PULUPA, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region on 5 December 2019.

PATRICK PULUPA, Executive Officer
