MINOR MODIFICATIONS TO THE CITY OF WOODLAND, WATER POLLUTION CONTROL FACILITY, WASTE DISCHARGE REQUIREMENTS ORDER R5-2014-0120 (NPDES PERMIT NO. CA0077950), YOLO COUNTY

Thank you for contacting us regarding the typographical oversight in the Effluent Limitations and Discharge Specifications in Waste Discharge Requirements Order R5-2014-0120 (Order). The Order, section IV.A.1.a, Table 4. Effluent Limitations, includes effluent limitations for ammonia. In Table 4, the units for ammonia are listed as µg/L (micrograms per liter). This is incorrect and the units for ammonia in Table 4 should be mg/L (milligrams per liter). This is a typographical error, as the mass limits are correctly based-on ammonia concentration in mg/L; also, all other sections of the permit package indicate ammonia limits in mg/L. Pursuant to Code of Federal Regulations, 40 CFR 122.63(a), minor modification of an NPDES permit is allowed to correct typographical errors. The following minor modification, shown in underline/strikeout format, is made to section IV.A.1.a, Table 4 (shown in part below) of the Order.

IV. EFFLUENT LIMITATIONS AND DISCHARGE SPECIFICATIONS

A. Effluent Limitations – Discharge Point 001

1. Final Effluent Limitations – Discharge Point 001

The Discharger shall maintain compliance with the following effluent limitations at Discharge Point 001, with compliance measured at Monitoring Location EFF-001 (except for total coliform organisms, which shall be measured at Monitoring Location UVS-002) as described in the Monitoring and Reporting Program, Attachment E:

a. The Discharger shall maintain compliance with the effluent limitations specified in Table 4:
Table 4. Effluent Limitations
