Re: City of Angels Wastewater Treatment Plant Discharge Requirements NPDES Permit

Dear Mr. James D. Marshall,

Our Center has reviewed the above-mentioned permit and has the following request. We ask that Board require public warnings to be posted in the newspaper and/or at regular intervals around areas commonly used for public access along the Angels Creek if standards contained in this permit are exceeded. Since Angels Creek has been designated as having the beneficial use of contact recreation, this information should be provided and visible to the public in the event effluent exceeds the permitted standards.

Thank you,

Michael Milne, staff biologist
