Acknowledgements

Waterkeeper Alliance thanks the United States Environmental Protection Agency for their generous grant to make this report possible. Waterkeeper Alliance also thanks Michel Cavigelli from the Agriculture Research Service, Diana Friedman from Sustainable Agriculture Research Education, Andrew Hanson from Midwestern Environmental Advocates, and Lee Telega from Cornell Cooperative Extension PRO-DAIRY for their thoughtful and valuable reviews of the report. Additionally, many thanks go to the Waterkeeper Alliance staff and interns who diligently read and reviewed the report in their spare time. Catherine White was indispensable for her editing and artistic talents. A special thanks to Tim Fessenden at Fessenden Dairy and Tender Loving Compost, Bob Aman at AA Dairy and Field of Dreams Compost, and the folks at DeVries Dairy for taking time out of their busy schedules to show the author around their farms. The author would also like to express her deepest appreciation to her husband Steve, who was always ready with a smile and a hug at the end of the day.

The views presented in the document do not necessarily reflect the opinions of those who were interviewed or who reviewed the report. Neither Waterkeeper Alliance nor the Environmental Protection Agency endorse any of these technologies; we do not claim that any single treatment technology will eliminate the manure management, social, or economic problems associated with confined livestock operations.

About Waterkeeper Alliance

Waterkeeper Alliance is the international guardian of more than 125 local Waterkeepers defending everyone's right to clean water. Standing together gives each Waterkeeper access to significant legal, scientific, and organizational resources to help protect water and enforce the law.

| TITLE PAGE | |
| ACKNOWLEDGEMENTS | |
| TABLE OF CONTENTS | i |
| TABLE OF TABLES | vi |
| TABLE OF FIGURES | vii |
| TABLE OF EQUATIONS | ix |
| EXECUTIVE SUMMARY | 1 |
| CHAPTER ONE: BACKGROUND | |
| 1.1 Preface | 5 |
| 1.2 Introduction | 7 |
| 1.3 Manure Pollutants | 8 |
| 1.3.1 Nutrients | 8 |
| a. Nitrogen | 9 |
| b. Phosphorus | 11 |
| 1.3.2 Suspended Solids | 12 |
| 1.3.3 Pathogens | 12 |
| 1.3.4 Biodegradable Organics | 13 |
| 1.3.5 Manure Gases | 13 |
| 1.4 Manure Collection and Handling | 14 |
| 1.4.1 Bedding..... | 15 |
| 1.4.2 Liquid Handling | 15 |
| 1.4.3 Solid and Semi-Solid Handling | 16 |
| 1.5 Manure Management | 16 |
| 1.5.1 Disciplines | 16 |
| 1.5.2 Nutrient Management Plans | 17 |
| 1.6 Treatment Approaches | 18 |
| 1.7 Land Application of Manure | 18 |
| Referenced Materials | 21 |
| CHAPTER TWO: STORAGE COVERS | |
| 2.1 Introduction | 25 |
| 2.2 Advantages and Disadvantages of Storage Covers | 26 |
| 2.2.1 Advantages | 26 |
| 2.2.2 Disadvantages | 26 |
| 2.3 Types of Storage Cover Designs | 27 |
| 2.3.1 Bank-to-Bank | 27 |
| 2.3.2 Balloon | 28 |
| 2.3.3 Modular..... | 29 |

2.4 Types of Storage Cover Materials 30

 2.4.1 Straw 31

 2.4.2 Polystyrene Foam Board 32

 2.4.3 Geotextile 32

 2.4.4 Plastic 33

 2.4.5 Concrete, Wood, and Metal 33

2.5 Summary 34

Referenced Materials 35

CHAPTER THREE: SOLIDS SEPARATION

3.1 Introduction..... 37

3.2 Advantages and Disadvantages of Solids Separation 39

 3.2.1 Advantages 39

 3.2.2 Disadvantages 40

3.3 Types of Solids Separation Designs..... 40

 3.3.1 Source Separation 40

 a. Belt Separation..... 41

 3.3.2 Delayed Separation..... 42

 a. Gravity Separation 42

 1. Settling Channel 43

 2. Settling Basin 44

 3. Settling Pond..... 45

 b. Mechanical Separation 45

 1. Sloping Stationary Screen..... 46

 2. Vibrating Screen 47

 3. Screw Press..... 48

 4. Drag Chain 49

 5. Roller Press..... 49

 6. Centrifuge 49

 c. Chemical Separation 51

3.4 Summary 51

3.5 A Closer Look at Solids Separation 52

Referenced Materials 53

CHAPTER FOUR: AEROBIC DIGESTION

4.1 Introduction..... 55

4.2 Advantages and Disadvantages of Aerobic Digestion 56

 4.2.1 Advantages 56

 4.2.2 Disadvantages 56

4.3 Aerobic Process 57

 4.3.1 Aeration..... 57

 4.3.2 Additives 58

 4.3.3 Nutrient Treatment and Transformation 58

4.4 Types of Aerobic Digestion Designs 59

 4.4.1 Fixed Film..... 59

 a. Trickling Filter 59

 b. Rotating Biological Contactor..... 60

 4.4.2 Suspended Growth 60

 a. Batch Reactors 61

| | |
|---|-----------|
| b. Continuous-flow Stirred Tank Reactor | 61 |
| c. Aerobic Lagoon..... | 62 |
| d. Low-rate Aeration Processes | 63 |
| e. Combination Processes | 64 |
| 4.5 Summary | 64 |
| Referenced Materials | 65 |

CHAPTER FIVE: ANAEROBIC DIGESTION

| | |
|--|-----------|
| 5.1 Introduction..... | 67 |
| 5.2 Advantages and Disadvantages of Anaerobic Digestion | 68 |
| 5.2.1 Advantages | 69 |
| 5.2.2 Disadvantages | 70 |
| 5.3 Anaerobic Process | 70 |
| 5.3.1 Liquefaction | 71 |
| 5.3.2 Acidogenesis..... | 71 |
| 5.3.3 Methanogenesis | 71 |
| 5.4 Anaerobic Digestion Design Considerations | 72 |
| 5.4.1 Solids Separation | 72 |
| 5.4.2 Mixing..... | 72 |
| 5.4.3 Digestion Reactor | 72 |
| a. Size..... | 73 |
| b. Material | 73 |
| c. Structural Integrity | 73 |
| d. Insulation and Heating..... | 74 |
| e. Manure Flow | 74 |
| 5.4.4 Storage | 75 |
| 5.4.5 Energy Conversion | 75 |
| 5.5 Types of Anaerobic Digestion Designs | 75 |
| 5.5.1 Mixed Reactors | 75 |
| a. Contact Reactor | 76 |
| b. Sequencing Batch Reactor..... | 76 |
| c. Temperature-Phased Digestion | 77 |
| d. Acid-Phased Digestion | 77 |
| 5.5.2 Fixed Film Reactor..... | 77 |
| 5.5.3 Plug-Flow Reactor | 78 |
| 5.5.4 Lagoons..... | 79 |
| a. Ambient Lagoon | 79 |
| b. Heated Mixed Lagoon..... | 80 |
| 5.6 Biogas Collection and Utilization | 80 |
| 5.6.1 Biogas Production..... | 80 |
| 5.6.2 Biogas Storage | 81 |
| 5.6.3 Biogas Cogeneration..... | 81 |
| 5.7 Anaerobic Digester Operation and Maintenance | 82 |
| 5.7.1 Start-Up..... | 82 |
| 5.7.2 Maintenance | 83 |
| 5.7.3 Safety | 83 |
| 5.8 Summary | 83 |
| 5.9 A Closer Look at Anaerobic Digestion | 84 |
| Referenced Materials | 85 |

| | |
|--|-----|
| CHAPTER SIX: NITRIFICATION-DENITRIFICATION | 87 |
| 6.1 Introduction | 88 |
| 6.2 Advantages and Disadvantages to Nitrification-Denitrification | 88 |
| 6.2.1 Advantages | 88 |
| 6.2.2 Disadvantages | 89 |
| 6.3 Nitrification Process | 89 |
| 6.3.1 Types of Nitrification Designs | 89 |
| a. Suspended Growth Processes | 89 |
| b. Attached Growth Processes | 90 |
| 6.3.2 Nitrification Design Considerations | 90 |
| a. Temperature and pH | 90 |
| b. Aeration | 90 |
| c. Loading Rate | 91 |
| d. Retention Time | 91 |
| 6.4 Denitrification Process | 91 |
| 6.4.1 Types of Denitrification Designs | 92 |
| 6.4.2 Denitrification Design Considerations | 92 |
| a. Oxygen Level | 92 |
| b. Temperature and pH | 92 |
| c. Carbon Content | 92 |
| d. Loading Rate | 92 |
| 6.5 Combined Nitrification-Denitrification Processes | 93 |
| 6.6 Summary | 94 |
| Referenced Materials | |
| | |
| CHAPTER SEVEN: COMPOSTING | 95 |
| 7.1 Introduction | 96 |
| 7.2 Advantages and Disadvantages of Composting | 96 |
| 7.2.1 Advantages | 97 |
| 7.2.2 Disadvantages | 97 |
| 7.3 Composting Process | 98 |
| 7.4 Composting Design Considerations | 98 |
| 7.4.1 Carbon to Nitrogen Ratio | 99 |
| 7.4.2 Bulk Density | 99 |
| 7.4.3 Moisture Content | 100 |
| 7.4.4 Tipping Fees | 100 |
| 7.4.5 Aeration | 100 |
| 7.4.6 Temperature | 101 |
| 7.4.7 Fly and Pest Control | 102 |
| 7.4.8 Design Summary | 103 |
| 7.5 Types of Composting Designs | 103 |
| 7.5.1 Static Pile | 103 |
| a. Un-aerated Static Pile | 103 |
| b. Aerated Static Pile | 104 |
| 7.5.2 Windrow | 104 |
| a. Passively Aerated Windrow | 105 |
| b. Turned Windrow | 106 |
| 7.5.3 In-Vessel | |

7.5.4 Other Composting Designs.....106
 a. Pit107
 b. In-barn107
 c. Vermicomposting107
7.6 Compost as a Value-Added Product107
 7.6.1 Compost Class108
 a. Class A Biosolids108
 b. Class B Biosolids108
 7.6.2 Compost Quality108
 a. Boutique108
 b. Bagged108
 c. Bulk109
7.7 Summary109
7.8 A Closer Look at Composting110
Referenced Materials111

CHAPTER EIGHT: CONSTRUCTED WETLANDS

8.1 Introduction.....113
8.2 Advantages and Disadvantages of Constructed Wetlands115
 8.2.1 Advantages115
 8.2.2 Disadvantages115
8.3 Constructed Wetland Design Considerations116
 8.3.1 Water Loading.....116
 8.3.2 Solids Loading116
 8.3.3 Nutrient Loading.....117
 8.3.4 Wetland Vegetation117
 a. Plant Establishment117
 1. Mechanical Seeding118
 2. Transplantation118
 3. Natural Establishment118
 8.3.5 Wetland Cell Size and Shape118
 8.3.6 Wetland Discharge119
8.4 Constructed Wetland Management119
8.5 Constructed Wetland Performance.....120
 8.5.1 Nitrogen Removal.....120
 8.5.2 Phosphorus Removal121
 8.5.3 Odor Reduction.....121
 8.5.4 Performance Summary121
8.6 Types of Constructed Wetlands.....122
 8.6.1 Open Wetlands122
 8.6.2 Subsurface Flow Wetlands123
 8.6.3 Floating Aquatic Plant Wetlands124
 a. Water Hyacinth.....124
 b. Duckweed.....125
 8.6.4 Comparison of Open, Subsurface Flow, and Floating Aquatic Plant
 Constructed Wetlands126
 8.6.5 Reciprocating Wetlands127
8.7 Summary128
Referenced Materials129

CHAPTER NINE: MISCELLANEOUS TREATMENT TECHNOLOGIES

| | |
|---|-----|
| 9.1 Introduction | 131 |
| 9.2 Black Soldier Fly Manure Treatment | 131 |
| 9.3 Vermicomposting | 134 |
| 9.4 Phytoremediation | 137 |
| Referenced Materials | 141 |

| | |
|--------------------------------------|-----|
| CHAPTER TEN: CONCLUSION | 143 |
|--------------------------------------|-----|

| | |
|--------------------------------|-----|
| GLOSSARY OF TERMS | 145 |
|--------------------------------|-----|

| | |
|-----------------------------------|-----|
| ADDITIONAL RESOURCES | 151 |
|-----------------------------------|-----|

LIST OF TABLES

| | |
|---|----|
| Table ES 1: Alternative treatment technologies and potential benefits | 3 |
| Table 1.1: Comparison of livestock wastes | 7 |
| Table 1.2: Principal pollutants in animal agriculture | 8 |
| Table 1.3: Nitrogen (N) and phosphorus (P) in livestock manure | 8 |
| Table 1.4: Most common forms of nitrogen | 10 |
| Table 1.5: Common pathogens transmitted to humans from animal manure | 12 |
| Table 1.6: Composition of biodegradable organic compounds in manure | 13 |
| Table 1.7: Select manure gases and exposure information | 14 |
| Table 1.8: Factors to consider when evaluating and selecting a treatment approach | 19 |
| Table 2.1: Potential storage cover benefits | 25 |
| Table 2.2: Percent reduction in ammonia concentration in headspace in laboratory testing | 32 |
| Table 2.3: Plastic cover material characteristics | 34 |
| Table 2.4: Summary of storage cover materials and designs | 34 |
| Table 3.1: Potential solids separation benefits | 37 |
| Table 3.2: Examples of animal waste handling situations that suggest inclusion of some form of solid-liquid separation | 38 |
| Table 3.3: Settling basin performance, results in wet basis | 44 |
| Table 3.4: Performance of a settling tank with 30 minute retention time receiving 1.2 percent total solids flushed swine manure | 44 |
| Table 3.5: Typical constituent removal for a sloping screen receiving beef or dairy cow manure slurry with an initial solids concentration between one and two percent | 47 |
| Table 3.6: Anticipated solids removal efficiencies of centrifuges treating dilute manure slurries | 51 |
| Table 4.1: Potential aerobic digestion benefits | 55 |
| Table 5.1: Potential anaerobic digestion benefits | 67 |
| Table 5.2: Advantages and disadvantages of anaerobic processes compared to aerobic processes | 68 |
| Table 5.3: Anticipated biogas production for anaerobic digestion of manure from 1000 lbs of livestock and poultry | 81 |
| Table 6.1: Potential nitrification-denitrification benefits | 87 |
