Subject: Comments on the Tentative NPDES Permit issued March 20, 2007, for NPDES No. CA0078174, Sanger Sand and Gravel Plant, Sanger, Fresno County

Dear Mr. Mathis:

This letter confirms the comments of Vulcan Materials Company, dba Calmat Company, on the March 20, 2007 Tentative NPDES Permit ("Tentative Permit") for the Sanger mine facility. The comments we submitted in our letter dated March 20, 2007, represent Vulcan's comments on the Tentative Permit (noting that page references have changed slightly), with one addition. Please delete Section G.1 of the Fact Sheet, page F-7, titled "Planned Changes." The potential changes noted there are not pertinent to the discharge covered by this NPDES permit renewal, and including this section is potentially confusing.

We appreciate your consideration of our comments, and look forward to the opportunity to discuss these comments with you and to providing other information you may need.

Sincerely,
ENV America Incorporated
