

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

CEASE AND DESIST ORDER NO. R5-2007-XXXX

REQUIRING THE CITY OF COLFAX
WASTEWATER TREATMENT PLANT
PLACER COUNTY
TO CEASE AND DESIST
FROM DISCHARGING CONTRARY TO REQUIREMENTS

The California Regional Water Quality Control Board, Central Valley Region, (hereafter Regional Water Board) finds that:

1. On XX June 2007 the Regional Water Board adopted Waste Discharge Requirements (WDR) Order No. R5-2007-XXXX (NPDES Permit No. CA0079529) prescribing waste discharge requirements for the City of Colfax (hereafter Discharger), Wastewater Treatment Plant (hereafter Facility), Placer County.
2. The Discharger owns and operates a sewage collection system and wastewater treatment plant, and provides sewerage service to the City of Colfax. The wastewater treatment plant includes a storage reservoir to hold excess treated or partially treated flows. The storage reservoir is unlined and has approximately 69,000,000 gallons of storage capacity. It consists of dam/levee on the downstream side of the reservoir. The dam has a spillway, approximately 4 feet below the top of dam, to prevent overtopping and damage to the dam. The storage reservoir is unlined and constructed over bedrock in an area of several natural springs. Seepage from the reservoir has occurred since its initial use in 1979 and the seepage flow is a function of the amount of water stored in the reservoir. The facility previously discharged treated domestic wastewater and storm water to land and treated seepage wastewater from the storage reservoir to an unnamed tributary to Smuthers Ravine, a water of the United States. However, due to concerns over pathogens and/or chlorine in the seepage discharges, the Discharger modified its treatment system and proposed to place a liner in the storage reservoir to prevent further wastewater seepage. The facility now treats domestic wastewater and collected seepage from the storage reservoir in an interim tertiary treatment system and discharges all the effluent to the unnamed tributary to Smuthers Ravine. The Discharger has not yet dewatered the storage reservoir for installation of a liner. Installation of a liner will not prevent further groundwater seepage under the liner, but it would prevent further wastewater seepage.
3. WDR Order No. R5-2007-XXXX contains Discharge Prohibition A which reads as follows:

“A. Discharge of wastewater at a location or in a manner different from that described in the Findings is prohibited.”
4. Although the discharger currently captures seepage at the base of the dam and returns it to the storage reservoir, it is possible that wastewater seepage bypasses this collection system or occurs at other locations and discharges to surface water in violation of

Discharge Prohibition A. Therefore, the Discharger violates or threatens to violate Discharge Prohibition A, of WDR Order No. R5-2007-XXXX.

5. The Regional Water Board adopted Cease and Desist Order (CDO) No. 5-01-181 on 14 June 2001 to require the Discharger to comply with requirements of Waste Discharge Requirements Order No. 5-01-180 due to discharges of wastewater over the spillway of the storage reservoir, and problems with the seepage disinfection system in place at that time. These problems have been corrected, and CDO No. 5-01-181 is no longer necessary.
6. Section 13301 of the California Water Code (CWC) states in part, "*When a regional board finds that a discharge of waste is taking place or threatening to take place in violation of requirements or discharge prohibitions prescribed by the regional board or the state board, the board may issue an order to cease and desist and direct that those persons not complying with the requirements or discharge prohibitions (a) comply forthwith, (b) comply in accordance with a time schedule set by the board, or (c) in the event of a threatened violation, take appropriate remedial or preventative action. In the event of an existing or threatened violation of waste discharge requirements in the operation of a community sewer system, cease and desist orders may restrict or prohibit the volume, type, or concentration of waste that might be added to such system by dischargers who did not discharge into the system prior to the issuance of the cease and desist order. Cease and desist orders may be issued directly by a board, after notice and hearing, or in accordance with the procedure set forth in Section 13302.*"
7. Issuance of this Order is exempt from the provisions of the California Environmental Quality Act (Public Resources Code, Section 21000, *et seq.*), in accordance with Section 15321(a)(2), Title 14, California Code of Regulations.
8. On XX June, 2007, in Sacramento, California, after due notice to the Discharger and all other affected persons, the Regional Water Board conducted a public hearing at which evidence was received to consider a Cease and Desist Order under CWC section 13301 to establish a time schedule to achieve compliance with waste discharge requirements.
9. Any person adversely affected by this action of the Regional Water Board may petition the State Water Resources Control Board to review this action. The petition must be received by the State Water Resources Control Board, Office of the Chief Counsel, P.O. Box 100, Sacramento, CA 95812-0100, within 30 days of the date on which this action was taken. Copies of the law and regulations applicable to filing petitions will be provided on request.

IT IS HEREBY ORDERED THAT Cease and Desist Order No. 5-01-181 is rescinded, and, pursuant to CWC Section 13301:

1. The Discharger shall comply with the following time schedule to ensure compliance with Discharge Prohibition A in WDR Order No. R5-2007-XXXX as described in the above Findings:

<u>Task</u>	<u>Date Due</u>
Submit workplan and schedule for ceasing wastewater seepage discharges from storage reservoir.	60 days after adoption of this order
Submit Progress Reports, including discussion of compliance with workplan and schedule	1 October 2007 1 January 2008 1 June 2008
Full compliance with Discharge Prohibition A	1 October 2008

2. For the compliance schedules required by this Order, the Discharger shall submit to the Regional Water Board on or before each compliance report due date, the specified document or, if appropriate, a written report detailing compliance or noncompliance with the specific schedule date and task. If noncompliance is being reported, the reasons for such noncompliance shall be stated, and shall include an estimate of the date when the Discharger will be in compliance. The Discharger shall notify the Regional Water Board by letter when it returns to compliance with the time schedule.
3. If, in the opinion of the Executive Officer, the City of Colfax fails to comply with the provisions of this Order, the Executive Officer may apply to the Attorney General for judicial enforcement or issue a complaint for Administrative Civil Liability.
4. Any person signing a document submitted under this Order shall make the following certification:

"I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my knowledge and on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

I, PAMELA C. CREEDON, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region, on XX June 2007.

PAMELA C CREEDON, Executive Officer
