Subject: Fwd: Draft WDRs for Compost Solutions

>>> "Don Holm" <dholm@glenncountyhealth.net> 5/10/2007 4:41 PM >>>
Jacqueline,

As we discussed, this business will not require a full solid waste facility permit. It will operate under a lower regulatory level known as an "operation." Operations require submission of a notification and do not require concurrence by the CIWMB. We are required to inspect Ag Material Composting Operations quarterly during operation.

I suggest the following language for paragraph 6 of the first section of the draft WDRs:

6. The California Integrated Waste Management Board (CIWMB) has adopted regulations governing the composting of green material, animal material, sewage sludge and municipal solid waste under Title 14, Division 30, Chapter 3.1. There are significant differences in the scope, authority and focus of the CIWMB's regulations governing composting and the requirements necessary, under this Order, for the protection of water quality. The Glenn County Environmental Health Department regulates this site as an Agricultural Material Composting Operation under CIWMB regulations.

Give me a call if you have any questions or comments in this matter.

Don
