Re: NPDES Permit Renewal and Proposed Increase in Surface Water Discharge (Permit #CA0084697)

Dear Board Members:

I am the managing member of Envy, LLC, owner of a 14+ acre parcel to the North East of the Thunder Valley Casino site. Despite pre-tribal EIR representations, the United Auburn Indian Community has abandoned any attempts to connect to the Lincoln Waste Treatment facility. The result is a remarkable increase on proposed treated wastewater being discharged into what has historically been a seasonal stream. The proposed increase may severally harden our site's ability to discharge wastewater and limit our land use as a result while diminishing our potential treatment and discharge. A proposal to the Tribe to treat our effluent was rejected. The current proposal dismisses connecting to Lincoln, increases the Tribal discharge, and potentially diminishes our ability to fully develop our site.

The Tribe mismanaged the effluent and violations of Department of Fish and Games rules and regulations occurred. We are concerned about the change of nature of the creek. Its flora and fauna and the possibly of future violations are worrisome.

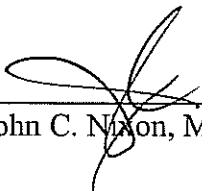

Please consider Envy, LLC as a designated party. We will submit additional evidence and comments prior to December 10, 2010.

Please advise me of our status as soon as possible. Thank you.

Sincerely,

Envy, LLC
