Darlene Jackson

Central Valley Water Board
11020 Sun Center Ln. #200
Rancho Cordova, CA 95670

To the Board:

I am writing you regarding your plans to implement a new water treatment plant, at a cost of Billions of dollars. This new treatment plant will not have enough scientific difference to warrant the dramatic and catastrophic effect the cost on consumers bills will produce. I own a Condominium and my current sewer Bill is \$60.00 every two months. If this increase is implemented my bill if tripled would increase to \$180.00. I myself would be forced out of my

(2)

home. I also feel this would also further devastate a struggling housing market by causing further foreclosures. I would also believe it would kill even more jobs. I implore the Board to reconsider such a catastrophic financial strain on a struggling economy.

Sincerely,
Darlene Jackson

P.S. Please advise me if possible when the meeting in either December or January is set.
