# Quality Control Board Members:

At a time when all we want to do is to "keep up" with our monthly bills and mortgage payments for no immediate need or mandated requirement, the members of the Water Quality Control want to triple our sewer bills.

I find this very disturbing in a time when unemployment is at its highest and you are just looking at "another way" to raise your rates.

It would be nice if you would consider this "upgrade to cleaner water" at a later date.

D. E. Mahoney
